Change In Cambodia 1975 1993Objective. Long-term information on lifestyle changes among  
 prostate survivors is lacking. In this nationwide, population-based study we investigated the  
 prevalence of lifestyle changes, factors associated with lifestyle changes and associations between  
 lifestyle changes and general quality of life.Changes in lifestyle among prostate cancer survivors: A  
 ...After excluding survivors without a job before diagnosis, 403 survivors remained; 197 (49%)  
 experienced no changes in their work situation following cancer diagnosis, 69 (17%) were working  
 fewer hours, and 137 (34%) stopped working or retired. A medium educational level was significant  
 in reducing the risk of work changes.Long-term cancer survivors experience work changes after
