*An Inquiry into the Existence of Global Values* Routledge

This book aims to enrich the thinking and discussion in relation to the importance that citizenship, immigration, rights and private laws play in the modern world. This is in a time when social cohesion and national identity is being challenged. It will explore the impact these laws have had on Australia, European Union (EU) and Slovenia. Identity and social cohesion are contested concepts and can invoke different responses. The challenges states and the EU are likely to face in retaining and even strengthening their respective identities and social cohesion from continued geopolitical shocks, security, economic volatility and environmental degradation is likely to be formidable. These alone pose some of the most complex political and policy issues facing the world. The EU can be held up as a polity that, has developed an identity and level of cohesion, while allowing member states to retain their national identities. It has, to date, also been successful in managing the rise of nationalism. However, that has come under threat in recent times. Thus, the very foundations of liberal democracy could be diluted from the impact of these challenges. Moreover, the basic foundations of rights have, in part, already been diluted from the rise of terrorism (which is acceptable), however, the geopolitical differences pose a significant challenge, in, and of

themselves.

How many questions could you answer in a pub quiz about British values?

Designed to ensure new migrants have accepted British values and integrated, the UK's citizenship test is often portrayed as a bad pub quiz with answers few citizens know. With the launch of a new post-Brexit immigration system, this is a critical time to change the test. Thom Brooks draws on first-hand experience of taking the test, and interviews with key figures including past Home Secretaries, to expose the test as ineffective and a barrier to citizenship. This accessible guide offers recommendations for transforming the citizenship test into a 'bridge to citizenship' which fosters greater inclusion and integration.

This book explores the relationship between political memories of migration and the politics of migration, following over two hundred years of commemorating Australia Day. References to Europeans' original migration to the continent have been engaged in social and political conflicts to define who should belong to Australian society, who should gain access, and based on what criteria. These political memories were instrumental in negotiating inherent conflicts in the formation of the Australian Commonwealth from settler colonies to an immigrant society. By the second half of the twentieth century, the Commonwealth employed Australia Day commemorations specifically to incorporate new arrivals, promoting at first citizenship and, later on, multiculturalism. The commemoration has been contested throughout its history based on two distinct forms of political memories providing conflicting modes of civic and communal belonging to Australian politics and policies of migration. Introducing the concept of Political Memories, this book offers a novel understanding of the social and

political role of memories, not only in regard to migration.

The world appears to be globalising economically, technologically and even, to a halting extent, politically. This process of globalisation raises the possibility of an international legal framework, a possibility which has gained pressing relevance in the wake of the recent global economic crisis. But for any international legal framework to exist, normative agreement between countries, with very different political, economic, cultural and legal traditions, becomes necessary. This work explores the possibility of such a normative agreement through the prism of national constitutional norms. Since 1945, more than a hundred countries have adopted constitutional texts which incorporate, at least in part, a Bill of Rights. These texts reveal significant similarities; the Canadian Charter of Rights and Freedoms, for instance, had a marked influence on the drafting of the Bill of Rights for South Africa, New Zealand and Hong Kong as well as the Basic Law of Israel. Similarly, the drafts of Eastern European constitutions reflect significant borrowing from older texts. The essays in this book examine the depth of these similarities; in particular the extent to which textual borrowings point to the development of foundational values in these different national legal systems and the extent of the similarities or differences between these values and the priorities accorded to them. From these national studies the work analyses the rise of constitutionalism since the Second World War, and charts the possibility of a consensus on values which might plausibly underpin an effective and legitimate international

legal order.

**Handbook of Research on Study Abroad Programs and Outbound Mobility** Cambridge University Press  
September 11 2001 marked a change in Australian attitudes towards immigrants. The spotlight was on Muslims. This collection of thought-provoking essays looks at multiculturalism's successes and failures in providing a secure, well-integrated, free and fair Australia. Philosopher and writer Raimond Gaita has gathered some of Australia's leading writers in the field to examine an issue that goes to the heart of Australia's identity. Author and lawyer Waleed Aly examines the role that the media has played in anti-Islamic myth-making in popular Western culture. Writer and researcher Shakira Hussein looks at how Australia's immigration policy has changed the cultural landscape. Geoffrey Brahm Levey writes on multiculturalism and terror and Raimond Gaita on 'the war on terror'.

Australia is on the brink of momentous change, but only if its citizens and politicians can come to new terms with the past. In this inspiring essay, Mark McKenna considers the role of history in making and unmaking the nation. From Captain Cook to the frontier wars, from Australia Day to the Uluru Statement, we are seeing fresh debates and recognitions. McKenna argues that it is time to move beyond the history wars, and that truth-telling about the past will be liberating and healing. This is an urgent essay about a nation's moment of truth. 'The time for pitting white against black, shame against pride, and one people's history against another's, has had its day. After nearly fifty years of deeply divisive debates over the

country's foundation and its legacy for Indigenous Australians, Australia stands at a crossroads – we either make the commonwealth stronger and more complete through an honest reckoning with the past, or we unmake the nation by clinging to triumphant narratives in which the violence inherent in the nation's foundation is trivialised.' —Mark McKenna, *Moment of Truth*

*Charity and Poverty in Advanced Welfare States* Routledge

In this impressive volume a combination of theorists - linguists, historians and lawyers - address the subject of citizenship testing for language proficiency and 'cultural' knowledge. Discussing themes of identity and cultural belonging, they draw out the implications for Australia and the wider international community.

Millions of students seek short- and long-term study abroad options every year, and this trend is a key illustration of the internationalization of higher education. Because a global perspective has become mandatory in the largely globalized workforce, many institutions look to study abroad programs to prepare their students. This outbound mobility has the potential to contribute to greater understanding between cultures, countries, and individuals. The *Handbook of Research on Study Abroad Programs and Outbound Mobility* offers a comprehensive look into motivations for and opportunities through all forms of outbound mobility programs. By providing empirically-based research, this publication establishes the benefits, difficulties, and rewards of building a framework to support international students and programs. It is an invaluable resource for academics,

students, policy makers, course developers, counselors, and cross-cultural student advisors.

While some e-government projects fail to deliver the expected benefits due to numerous technical, organizational, institutional, and contextual factors, information technology continues to be utilized by international governments to achieve countless benefits. *E-Government Success around the World: Cases, Empirical Studies, and Practical Recommendations* presents the latest findings in the area of e-government success. Written for academics and professionals, this book aims to improve the understanding of e-government success factors and cultural contexts in the field of governmental information technologies in various disciplines such as political science, public administration, information and communication sciences, and sociology.

The eight chapters in this book explore more than 150 years of the development of several modern sports – baseball, basketball, cricket, football, handball, ice hockey and lacrosse – across the two Americas, Asia, Australia and Europe, some analysing a century of events since the mid-nineteenth century and some only a few years in the very present. Drawing on the methods of history, international relations, political science, and sociology, the contributing authors examine various theories of sporting globalization. The chapters take a balanced look at the concepts of the nation state and the connected world, which are the substantive core around which modern human society is ordered. They construct stories of entanglements and convergences, from within and

without the nation state, in which the national and the non-national are not mutually exclusive. The key features of this collection are how cultural elements are introduced to sport, how changes are perceived, how sporting practices and institutions can be defined at geopolitical and other levels, how we might conceptualize the perimeter of judging the national-transnational or the local-translocal paradigms, and how we could complicate the understanding of sport/knowledge transfer by ascribing different degrees of importance to origin, process, purpose, outcome, personnel and network. This book is a multidisciplinary exploration into the development of modern sporting culture from global and transnational history perspectives. The chapters originally published as a special issue in *Sport in Society*.

The notion of citizenship is now being taken up internationally as a way to rethink questions of social cohesion and social justice. In Europe the concept of national identity is under close scrutiny, while the pressures of globalizing markets and the power of transnational corporations everywhere raise questions about the true place and meaning of citizenship in civil society. In Australia, a traditional view of citizens belonging to a single nation made up of one people, with a special relationship to one land, has been thrown open to challenge by a range of differing perspectives. *Rethinking Australian Citizenship* considers the major debates. Some chapters look at contemporary theoretical debates, while others 'reinvent' Australian citizenship from a particular perspective on civil life. The result is a rich and coherent volume that

shows the diverse ways in which Australian citizenship can be rethought. [Mediated Football](#) Federation Press

*Understanding Curriculum* is a critical introduction to contemporary curriculum theory and practice. Substantially revised, the second edition includes more detailed consideration of the ideological underpinnings of curriculum development, features new chapters on assessment and reporting, and updated vignettes and extracts. These features, combined with all the elements of the

previous edition, encourages readers to reflect on how curriculum theory can inform and enhance classroom practice. Blackshield and Williams Australian Constitutional Law and Theory Springer Identity is one of the most theorised and contested of all sociological concepts and sport is fertile ground for an examination of its complexities. This book offers a wide-ranging and up-to-date exploration of the sport-identity nexus, drawing examples from a variety of sporting contexts and geographical locations, and incorporating a diversity of perspectives including players, spectators, officials, the media and policy-makers. Covering key themes in the social scientific study of sport such as gender, ethnicity and national identity, it considers the impact of social, cultural and technological change on the formation of sporting identities. Including original real-life case studies, each chapter makes a unique contribution to our understanding of the complex relationship between sport and identity. As this relationship is embedded within the broader structures of power that frame social inequality, this book also poses important questions about the role of sport-related initiatives in our society today, as well as in years to come. *Sport and Contested Identities: Contemporary Issues and Debates* is fascinating reading for all students and scholars of the sociology of sport.

*National Identity and Social Cohesion in a Time of Geopolitical and Economic Tension: Australia - European Union - Slovenia* Routledge

*Early Childhood in Postcolonial Australia* is a critical narration of how Australian children use cultural markers such as, skin color, diet and religious practices to build their identity categories of "self" and "other."

Structural needs for immigrant labour in health care, restaurant, tourism, agricultural and other economic sectors, together with harsher economic circumstances in most sending countries, almost certainly ensure the continuation of large-scale immigration to the US and Australia. But in harder times, especially in the US, sustaining this immigration while managing immigrants' economic and social integration are daunting tasks. This illuminating book analyses how well, and in what ways, the US and Australia will meet these challenges. This companion volume to *Nations of Immigrants* examines immigration to the US and Australia during the difficult economic times following the paralysis of financial firms and markets in New York and London during autumn 2008, quickly affecting Australia and most other OECD countries. The contributors prominent American and Australian immigration specialists discuss how the financial crisis has altered the nexus of domestic labour markets and immigration, how public fears spurred by harder times are affecting border protection and support for immigration, whether serious abrasions between foreign- and native-born populations are being kindled, and the extent to which the politics of immigration are being transformed. *Immigration and the Financial Crisis* will prove a thought provoking read for academics and students with an interest in immigration, and American and Australian policy arenas. The book will also prove an invaluable reference tool for public servants engaged in administering US and Australian immigration policies.

Community Language Interpreting provides translation resource materials for teachers and students. Additionally, for those who plan to work as professional interpreters in Australia, it provides guidelines and intensive practice for interpreting in community settings. The introduction gives an overview of interpreting and outlines how to use the book. Lee and Buzo discuss the different modes of interpreting, note-taking techniques and professional ethics. The ten chapters each deal with a discrete area of community interpreting. Beginning with an introduction, the authors then establish the social and governmental context to the area in question. This is followed by preparation tasks and useful website links which encourage readers to do more research on the topic to broaden their background knowledge, general knowledge and knowledge of terminology relevant to the field in question. Tasks include questions on the ethical aspects of professional practice. Dialogue interpreting scripts and sight translation texts are provided, followed by consecutive interpreting passages. National Authority for Accreditation of Translators and Interpreters (NAATI) test specifications are followed and all dialogue interpreting scripts are original. As well, website links are included for source and full text access to other scripts of interest. Community Language Interpreting also features two units on interpreting in business settings and for visiting delegations. This is because these topics, while not strictly community interpreting topics, are practical and routinely included in accreditation tests.

This volume makes a distinctive and innovative contribution to the globalisation of higher education literature by highlighting the myriad benefits of academic migration. Sixteen academic migrants across the Asia-Pacific region reflect on their experiences and wisdom gained across geographical, cultural and disciplinary domains. Each one provides an authentic account of ways in which their experiences and insights have benefited their host institutions and enhanced their pedagogical practice. The groundbreaking volume calls for a shift in academic culture – one in which academic migrants are respected for their cultural, social and intellectual resources, their enhanced interpretive ability and their capacity to view the world through multiple lenses. Are these not the characteristics of educators which universities seek in their efforts to internationalise their institutions and develop in their students an understanding of global citizenship? The volume forges new territory in articulating the relationship between academic migrants, conceptual understanding and the construction of knowledge. The following themes are addressed in this book: Migration of Ideas, Conceptual Understanding and Pedagogical Enrichment Indigenous Pedagogies and Bridging Worldviews Changing Academic Identities and Reshaping Pedagogies Teaching Practice and the Academic Diaspora.

This is the first scholarly book to examine the UN Sustainable Development Goals from an indigenous perspective and, specifically, with reference to the right to self-determination. It refers to the UN

Declaration on the Rights of Indigenous Peoples and domestic instruments such as New Zealand's Tiriti o Waitangi to suggest how the goals could be revised to support self-determination as a more far-reaching and ambitious project than the goals imagine in their current form.

The book primarily draws its material from Australia, Canada, and New Zealand to support analysing the goals' policy relevance to wealthy states and the political claims that indigenous peoples make in established liberal democracies.
