### **CIMA F2 Advanced Financial Reporting** CIMA Publishing

This new, third edition of Jack Phillips's classic Handbook of Training Evaluation and Measurement Methods shows the reader not only how to design, implement, and assess the effectiveness of HRD programs, but how to ultimately measure their return on investment (ROI). Each chapter has been revised and updated to include additional

research, expanded coverage, and new examples of Dr. Phillips's case studies. Seven entirely new chapters have also been added, focusing largely on ROI. Advanced Management Accounting Emerald Group Publishing  
Features articles on a variety of topics in management accounting that are relevant to researchers in both practice and academe. This work is suitable for management accounting scholars. *Advance Management Accounting* Prentice Hall  
In the classroom, ABC looks like a great way to manage a company's resources.

But many executives who have tried to implement ABC on a large scale in their organizations have found the approach limiting and frustrating. Why? The employee surveys that companies used to estimate resources required for business activities proved too time-consuming, expensive, and irritating to employees. This book shows you how to implement time-driven activity-based costing (TDABC), an easier and more powerful way to implement ABC. You can now estimate directly the resource demands imposed by each business transaction, product, or customer. The payoff? You spend less time and money obtaining and maintaining TDABC data—and more time addressing problems that TDABC reveals, such as inefficient processes, unprofitable

products and customers, and excess capacity. The authors also show how to use TDABC to link strategic planning to operational budgeting, to enhance the due diligence process for mergers and acquisitions, and to support continuous improvement activities such as lean management and benchmarking. In presenting their model, the authors define the two questions required to build TDABC: 1) How much does it cost per time unit to supply resource capacity for each business process? 2) How much resource capacity (time) is required to perform work for a company's many transactions, products, and customers? The book demonstrates how to develop simple, valid answers to these two questions. Kaplan and Anderson illustrate the TDABC approach with a

wealth of case studies, in diverse settings, based on actual implementations.

*Management Accounting and Control Systems* Pearson Education India

Offers a unique, multifaceted approach to the study and practice of management accounting.

**P2 ADVANCED MANAGEMENT ACCOUNTING - STUDY TEXTMOBI.**

Greenwood Publishing Group

Management accounting and control deals with administrative devices which organizations use to control their managers and employees. Management accounting systems are a very important part used to motivate, monitor, measure, and sanction, the actions of managers and employees in organizations.

Management Accounting and Control

Systems 2nd Edition is about the design and working of management accounting and control from an organizational and sociological perspective. It focuses on how control systems are used to influence, motivate, and control what people do in organizations. The second edition of the book takes into account the need for a general update of the content and a change in the structure of the original text, and some of the comments received by the external reviewers

**P2 ADVANCED MANAGEMENT ACCOUNTING - STUDY TEXT**

Macmillan International Higher Education Suitable for upper level advanced management or cost accounting courses at the undergraduate or MBA/graduate level, this book provides treatment of

innovative management accounting issues used by major companies throughout the world. It takes a systematic management-oriented approach to management topics. Each chapter is accompanied by cases.

*Time-Driven Activity-Based Costing*  
Routledge

This innovative new textbook firmly roots management accounting in management, placing the emphasis on the management accountant as a key member of the management team and the strategic business decision making process. Unique case studies and examples of worldwide practices illustrate how concepts and techniques are applied in real-world business situations. It explores how management accounting techniques are adapted and

modified to support specific industries from energy to media sectors and covers topical issues such as: Environmental accounting Environmental auditing and ISO14001/EMAS The balanced scorecard Kaizen costing Target costing Social responsibility Features Integrates the most up-to-date and relevant research with a broad approach to management accounting. Presents compelling examples of 'real' organisations, exploring the interactions of management accounting in practice. Extends knowledge of management accounting concepts and techniques to how they can be used for strategic decision making and management control. Uses Excel to develop and apply solutions methods. Examines how management accounting techniques are

adapted and modified to support specific industries from energy to media sectors. Covers topical issues such as activity-based budgeting, the balanced scorecard, target costing, capacity planning, quality management, Six Sigma and performance measurement. Fully compliant with developments within the professional bodies such as CIMA and ACCA. Offers end-of chapter exercises to extend your critical thinking and applications of key concepts. Provides short case studies, so you can practise manipulating and analysing data. This is the ideal textbook for students studying management accounting at advanced undergraduate and postgraduate level.

**Strategic Cost Management** Harvard Business Review Press

Volume one of the Handbooks of Management Accounting Research sets the context for both Handbooks, with three chapters outlining the historical development of management accounting as a discipline and as a practice in three broad geographic settings. The bulk of the first volume then draws together a series of contributions that analyse the scholarly literature in terms of distinct intellectual and theoretical social science perspectives. The volume includes a chapter which looks at work informed by psychology as a base discipline. The volume also includes a set of chapters that seek to evaluate and explain issues of research method for the different approaches to research found within management accounting. Special pricing available if purchased as a set with

Volume 2. Documents the scholarly management accounting literature Publishing both in print, and online through Science Direct International in scope  
Harvard Business Press  
Providing valuable insight into the latest practice and design philosophies, this collection of readings and cases analyzes the defects that exist with traditional cost management systems, and shows how to design systems that will benefit a wide range of organizations. Opens with a thorough introduction to cost systems - with discussions on their use, product and process costing, operational control, financial reporting, and strategic relevance - and explores target costing, and ABC and product design and

development. Considers the foundations of activity-based costing, including its necessity for companies, cost hierarchy, and activity attributes, and dedicates entire sections to the use of cost systems for managing customer and supplier relationships, and for designing and developing new products. Second Edition features include many new cases and a critical study of service industry and activity-based budgeting. For management consultants, CFO's, and controllers.

*ADVANCED PERFORMANCE MANAGEMENT (APM) - POCKET NOTES*

BPP Learning Media

Just-in-time manufacturing and distribution processes, computer-aided design, and flexible manufacturing systems are now commonplace in the

modern workplace, but antiquated accounting systems are unable to monitor accurately their operations, making them a liability to today's managers. In twelve essays, leading academics describe how companies are using operation and accounting measures to win the battle for manufacturing excellence. Issues discussed include measuring organizational improvement, facilitating organizational learning, motivating product design improvements, and evaluating production planning.

CIMA P2 Advanced Management Accounting BPP Learning Media

This revised edition of **ADVANCED MANAGEMENT ACCOUNTING** provides a comprehensive and updated coverage of important topics, current trends, latest

ideas and researches in management accounting. Expanding on its theoretical base, the book provides practical exposition to help students strengthen conceptual understanding and develop problem-solving skills to succeed in the classroom and beyond. Pedagogically enriched with new features and an impressive layout, this new edition is an essential text for students of M.Com, MBA, CA, ICWA, CS, CFA and other professional courses

Division

In this book, Shank and Govindarajan demonstrate how strategic cost management - an analytical framework which relates meaningful accounting information to a firm's business strategy - is changing accounting practices in leading companies. Using case studies, including Ciba-Geigy, Ford, Motorola and Texas Instruments, they show how the tools of strategic cost management - value chain analysis, strategic positioning analysis and cost driver analysis - provide a sustainable competitive advantage over companies whose cost systems are in disarray.
