This book introduces community college faculty and faculty developers to the use of faculty learning communities (FLCs) as a means for faculty themselves to investigate and surmount student learning problems they encounter in their classrooms, and as an effective and low-cost strategy for faculty developers working with few resources to stimulate innovative teaching that leads to student persistence and improved learning outcomes. Two-year college instructors face the unique challenge of teaching a mix of learners, from the developmental to high-achievers, that requires using a variety of instructional strategies and techniques. Even the most experienced teachers can find this diversity demanding. Faculty developers at many two-year colleges still rely solely on the one-day workshop model that, while useful, rarely results in sustained student-centered changes in pedagogy or the curriculum, and may not be practicable for the growing cohort of part-time faculty members. By linking work in the classroom with scholarship and reflection, FLCs provide participants with a sense of renewed engagement and stimulate collegial exploration of ways to achieve educational excellence. FLCs are usually faculty-instigated and cross-disciplinary, and comprise groups of six to fifteen faculty that work collaboratively through regular meetings over an extended period of time to promote research and an exchange of experiences, foster community, and

develop the scholarship of teaching. FLCs alleviate burnout and isolation, promote the development, testing, and peer review of new classroom strategies or technologies, and lead to the reenergizing and professionalization of teachers. This book introduces the reader to FLCs and to the Scholarship of Teaching and Learning, offering examples of application in two-year colleges. Individual chapters describe, among others, an FLC set up to support course redesign; an "Adjunct Connectivity FLC" to integrate part-time faculty within a department and collaborate on the curriculum; a cross-disciplinary FLC to promote student self-regulated learning, and improve academic performance and persistence; a critical thinking FLC that sought to define critical thinking in separate disciplines, examine interdisciplinary cross-over of critical thinking, and measure critical thinking more accurately; an FLC that researched the transfer of learning and developed strategies to promote students' application of their learning across courses and beyond the classroom. Each chapter describes the formation of its FLC, the processes it engaged in, what worked and did not, and the outcomes achieved. Just as when college faculty fail to remain current in their fields, the failure to engage in continuing development of teaching skills, will equally lead teaching and learning to suffer. When two-year college administrators restrain scholarship and reflection as inappropriate for the real work of the institution they are in fact hindering the professionalization of their teaching force that is essential to institutional mission and student

success. When FLCs are supported by leaders and administrators, and faculty learn that collaboration and peer review are valued and even expected as part of being a teaching professional, they become intrinsically motivated and committed to collaboratively solving problems, setting the institution on a path to becoming a learning organization that is proactive and adept at navigating change.

The award-winning account of how America's educational system fails its students and what can be done about it Remedial, illiterate, intellectually deficient—these are the stigmas that define America's educationally underprepared. Having grown up poor and been labeled this way, nationally acclaimed educator and author Mike Rose takes us into classrooms and communities to reveal what really lies behind the labels and test scores. With rich detail, Rose demonstrates innovative methods to initiate "problem" students into the world of language, literature, and written expression. This book challenges educators, policymakers, and parents to re-examine their assumptions about the capacities of a wide range of students. Already a classic, *Lives on the Boundary* offers a truly democratic vision, one that should be heeded by anyone concerned with America's future. "A mirror to the many lacking perfect grammar and spelling who may see their dreams translated into reality after all." -Los Angeles Times Book Review "Vividly written . . . tears apart all of society's prejudices about the academic abilities of the

Research on stress and coping phenomena has been among the most widely studied topics in social and

behavioral sciences during the past several decades. Notwithstanding, the authors in this book have expanded the base of stress and coping research by providing a valuable reference source that includes guidelines and frameworks as well as empirical findings related to the application of mixed methods approaches to the study of stress and coping. This book is intended not only for stress and coping researchers, but also for social and behavioral science researchers at various levels—from students, instructors, and advisors to applied researchers, research methodologists, and theorists. The 15 chapters are divided into three distinct sections. The five chapters in Section I focus mainly on topics pertaining to the conceptual and theoretical aspects of mixed methods research in the study of stress and coping. The five chapters in Section II address the major methodological issues of mixed methods research. Section III presents five empirical studies of mixed methods research as applied to the field of stress and coping. This book illustrates the perspectives of innovative interconnections in the application of mixed methods research to the study of stress and coping. It also provides readers with new ways of designing and evaluating strategies and programs that aim to reduce stress and improve coping mechanisms.

Thankfully, Green does—and in this incredibly helpful book, she tackles the tough discussions you may need to have during your career. You’ll learn what to say when • coworkers push their work on you—then take credit for it • you accidentally trash-talk someone in an email then hit “reply all” • you’re being micromanaged—or not being managed at all • you catch a colleague in a lie • your boss seems unhappy with your work • your cubemate’s loud speakerphone is making you homicidal • you got drunk at the holiday party

Praise for *Ask a Manager* “A must-read for anyone who works . . .
