Electronically Controlled Air Suspension. Global market leading solution in air suspension control. Customer Benefits: Eases daily routines such as passenger entry and exit, trailer coupling, or unloading Supports quicker and simplified loading and unloading Truck Technology | Suspension Control Solutions | OptiRide ... With ECAS, you can adjust frame height, to adjust,

for example, the loading height to ramps, or when coupling or uncoupling semi-trailers or swap bodies. ECAS : Electronically Controlled Air Suspension. It ensures the utmost driver comfort and constant chassis geometry regardless of speed, load and road type. Frame and suspension - Iveco ECAS - Electronically Controlled Air Suspension (Electronically controlled air suspension system) ECAS is an electronically controlled air suspension system for vehicles with a large number of functions. It has been used on motor vehicle since about the early 80s. In the mechanically controlled air suspension systems ECAS for Trailers - WABCO The ECAS system will either regulate the residual pressure to remain on the set value or freeze the status of the ECAS system. ECAS freeze can also function separately from the residual pressure value. There will be no height, pressure or lift axle control as long as ECAS freeze is active. Electronically Controlled Air Suspension Electronically Controlled Air Suspension - Centrako ELECTRONICALLY CONTROLLED AIR SUSPENSION VALUE TO CUSTOMERS ... • World-market leading solution with over 3.5 million OptiRide ECAS systems sold globally • Winner of "HDT Top 20 Products of 2013" as well as "TWNA Technical Achievement Award 2012" ELECTRONICALLY CONTROLLED AIR SUSPENSION Electronically Controlled WABCO Air Suspension (ECAS) WABCO air suspension control components and systems are applicable to a wide range of partial and full air suspended passenger service vehicles. The direct impact on vehicle efficiency and driver effectiveness is proving invaluable to vehicle operators. WABCO Parts | WABCO Air Suspension | WABCO catalogue | WABCO Air suspension is used in place of conventional steel springs in heavy

vehicle applications such as buses and trucks, and in some passenger cars. It is widely used on semi trailers and trains (primarily passenger trains).. The purpose of air suspension is to provide a smooth, constant ride quality, but in some cases is used for sports suspension. Modern electronically controlled systems in ... Air suspension - Wikipedia Air springs Quality air suspension products from Dunlop. At Dunlop Systems and Components, we supply a wide range of premium-quality air suspension products, equipment and accessories to clients across the commercial and automotive market. Air Suspension | Coventry | Dunlop Systems and Components WABCO—a supplier of braking, stability-control, suspension, and transmission automation for commercial vehicles—reports that major Chinese manufacturers continue to increase the adoption of its OptiRide electronically controlled air suspension (ECAS) system in series production of heavy-duty trucks and buses. WABCO is the only supplier of ECAS for truck and bus manufacturers in China ... Electronics Control Truck Air Suspensions | Hydraulics ... When a leading truck manufacturer asked Continental to develop an electronically controlled air suspension (ECAS) for its next generation of heavy-duty trucks, it presented the Continental engineers with a set of 1360 stringent system requirements. In addition, the ECAS had to ensure the safety and comfort of drivers operating 40-ton vehicles. Continental Develops Electronically Controlled Air ...
