fellowship examination in otolaryngology. The authors of this volume tried not to confine their presentations to pathology in Northern Europe given differences in the presentation of pathology in developed and the developing countries and the popularity of this book in Middle East, the Indian Subcontinent, and South East Asia. This book is organized into four main sections. The first three

sections cover the anatomy, physiology, and diseases of the nose, head and neck, and the ear. The final section deals with pediatric otolaryngology. Several changes were made in this tenth volume. These include the presentation of otology, audiology, and otoneurology as an integrated whole; the rewriting of the section of rhinology; addition of a section on pediatric otolaryngology; and

modification and expansion of the section on head and neck surgery. This book will be of interest to senior students, general practitioners, and trainees in otolaryngology. Clinical Handbook of Ear, Nose and Throat Disorders Elsevier Health Sciences The syllabus for the FRCS (ORL-HNS) is vast, and a sound preparation for the exams has traditionally

involved assimilating knowledge from a wide range of sources. This book provides a focussed guide for exam candidates. More than a question and answer book, this book is a coaching manual. Each section features a combination of model answers, pearls of wisdom, checklists and pointers for further reading. Detailed advice is provided for both Part 1

and Part 2 of the examination. Viva topics that have featured in the exam in recent years have been included. and have then been supplemented by invaluable editorial contributions from leaders in each of the subspecialties. Trainees frequently comment that exam preparation is an enlightening process and the knowledge gained would have served them well during their

time as an ENT registrar or Otorhinolaryngology resident. This book will also serve as a valuable learning tool for trainees as early as ST3 and facilitate their development of effective and safe clinical practice.
