Chapter 8 Covalent Bonding AnswerThe hybrid orbitals can be defined as the combination of standard atomic orbitals resulting in the formation of new atomic orbitals. ⇒ Check: Fajan's Rule and its Postulates During hybridization, the hybrid orbitals possess different geometry of orbital arrangement and energies than the standard atomic orbitals.Hybridization - sp, sp², sp³, sp³d, sp³d² Hybridized ...Acids and bases have been known for a long

time. When Robert Boyle characterized them in 1680, he noted that acids dissolve many substances, change the color of certain natural dyes (for example, they change litmus from blue to red), and lose these characteristic properties after coming into contact with alkalis (bases). In the eighteenth century, it was recognized that acids have a sour taste ...

The hybrid orbitals can be defined as the combination of standard atomic orbitals resulting in the formation of new atomic orbitals. ⇒ Check: Fajan's Rule and its Postulates During hybridization, the hybrid orbitals possess different geometry of orbital arrangement and energies than the

standard atomic orbitals.
