From 1957 onwards, the "Pugwash Conferences" brought together elite scientists from across ideological and political divides to work towards disarmament. Through a series of national case studies - Austria, China, Czechoslovakia, East and West Germany, the US and USSR - this volume offers a critical reassessment of the development and work of "Pugwash" nationally, internationally, and as a transnational forum for Track II diplomacy. This major new collection reveals the difficulties that Pugwash scientists encountered as they sought to reach across the blocs, create a channel for East-West dialogue and realize the project's founding aim of influencing state actors. Uniquely, the book affords a sense of the contingent and contested process by which the network-like organization took shape around the conferences. Contributors are Gordon Barrett, Matthew Evangelista, Silke Fengler, Alison Kraft, Fabian Lüscher, Doubravka Olšáková, Geoffrey Roberts, Paul Rubinson, and Carola Sachse.

At the end of the twentieth century, many believed the story of European political development had come to an end. Modern democracy began in Europe, but for hundreds of years it competed

with various forms of dictatorship. Now, though, the entire continent was in the democratic camp for the first time in history. But within a decade, this story had already begun to unravel. Some of the continent's newer democracies slid back towards dictatorship, while citizens in many of its older democracies began questioning democracy's functioning and even its legitimacy. And of course it is not merely in Europe where democracy is under siege. Across the globe the immense optimism accompanying the post-Cold War democratic wave has been replaced by pessimism. Many new democracies in Latin America, Africa, and Asia began "backsliding," while the Arab Spring quickly turned into the Arab winter. The victory of Donald Trump led many to wonder if it represented a threat to the future of liberal democracy in the United States. Indeed, it is increasingly common today for leaders, intellectuals, commentators and others to claim that rather than democracy, some form of dictatorship or illiberal democracy is the wave of the future. In Democracy and Dictatorship in Europe, Sheri Berman traces the long history of democracy in its cradle, Europe. She explains that in fact, just about every democratic wave in Europe initially failed, either collapsing in upon itself or succumbing to the forces of reaction. Yet even when democratic waves failed, there were always some achievements that lasted. Even the most virulently reactionary regimes could not suppress every element of democratic progress.

Panoramic in scope, Berman takes readers through two centuries of turmoil: revolution, fascism, civil war, and - finally -- the emergence of liberal democratic Europe in the postwar era. A magisterial retelling of modern European political history, Democracy and Dictatorship in Europe not only explains how democracy actually develops, but how we should interpret the current wave of illiberalism sweeping Europe and the rest of the world.

While America is focused on religious militancy and terrorism in the Middle East, democracy has been under siege from religious extremism in another critical part of the world. As Nussbaum reveals in this penetrating look at India today, the forces of the Hindu right pose a disturbing threat to its democratic traditions and secular state. Nussbaum's long-standing professional relationship with India makes her an excellent guide to its recent history.

[40 Years of Democracy in Botswana, 1965-2005](#) Springer

Shortly after the hostilities of the Iraq War were declared to have come to an end, the renowned philosopher Jurgen Habermas, with the endorsement of Jacques Derrida, published a manifesto invoking the notion of a "core Europe," distinct from both the British and the "new" European

candidates for EU membership, and defined above all by its secular, Enlightenment and social-democratic traditions. A key component of the manifesto was its insistence on the need for a counterweight to the perceived influence of the US, a theme that also resonates in recent discussions about the establishment of a European military force outside the command structures of NATO. On the same weekend in May 2003, a number of other leading intellectuals, among them Umberto Eco, Gianni Vattimo and Richard Rorty, published essays addressing these themes in major European newspapers, and almost immediately responses to these essays began to appear. The writings sparked a lively debate about the nature of "Europe" and transatlantic relations that reverberates through contemporary discussion. This volume provides readers in the Anglophone world the opportunity to gain access to the debate. As the fallout from the Iraq war continues to rumble and EU expansion continues apace, this is compelling reading for anyone interested in the future of Europe and the transatlantic alliance.
