 A collection of papers delivered at a course designed to give
 librarians and other information professionals an insight into the
 standards which exist, the bodies which make and promote them
 and the technology which exploits them. The contributors
 consider the major international bodies concerned with standards,
 the problems associated with special forms and different scripts
 and the creation of bibliographic records, including the role of
 national bibliographic agencies, standards for subject access and
 the importance of automation.

 The 19th Century produced some of the most popular coinage in
 world monetary history, as evidenced by the number of high-
 profile auctions worldwide bringing record prices and further
 driving demand for these classic coins. The Standard Catalog of
 World Coins, 1801-1900, is designed to meet the needs of
 researchers, collectors, auctioneers and dealers of this vast range
 of coins produced during the critically important time. With a
 more than 40 year tradition of excellence in the hobby, the
 Standard Catalog of World Coins gathers and vets data from more
 than 140 worldwide experts to produce the most respected and
 referenced resource on the subject. Featuring 27,500 actual-size
 images, the volume covers all mint-issue coins of the world, as
 well as tokens, patterns, sets and more. Arranged alphabetically
 by country, each coin listing provides: • Current values listed by
 date, variety and grade • Universal KM reference number •
 Detailed descriptions of obverse and reverse designs • Clear
 images to aid in identification What's more, coins struck in gold,
 platinum and silver are detailed with: • Total coin weight •
