Cycloastragenol & Astragaloside - Telomerase Activation ... Author of The Telomerase Revolution and working to bring telomerase therapy to human trials, Michael Fossel, M.D., Ph.D. (born 1950, Greenwich, Connecticut) was a professor of clinical medicine at Michigan State University for almost 30 years and still teaches a course on the Biology of Aging as a university professor. Michael Fossel on Aging and the Telomerase Revolution With every shortening of the telomeres, the cell's ability to repair its molecules decreases. It ages. Human aging is the result of the aging of the body's trillions of cells. But some of our cells don't age. Sex cells and stem cells can reproduce indefinitely, without aging, because they create telomerase.
