Prime Time - 6TH GRADE MATH This is a game for two players. The first player chooses a positive even number that is less than 50, and crosses it out on the grid. The second player chooses a number to cross out. The number must be a factor or multiple of the first number. Players continue to take it in turns to cross out numbers, at each stage choosing a number that is a factor or multiple of the number just crossed out by the other player. Factors and Multiples Game - NRICH To sum up, we can say that factors are the numbers that can be multiplied to get another number. On the other hand, multiples are the product, that one can get by multiplying a number with another. When a number possesses only two factors, i.e. 1 and itself, then that number will be known as a prime number. Difference Between Factors and Multiples (with Example and ...
