The Complete Guide to Building Your Own Home and Saving Thousands on Your New House

No Starch Press

Building Your Own Home A Step-by-Step Guide "This is an impressive undertaking. I've seen plenty of books about home construction techniques but this is the first one I've seen that packages construction information with the whole process of acquiring the property." --P. Gilbert Mercurio, Executive Vice President Westchester County Board of Realtors "Written by an expert in both design and construction, the book is highly readable and addresses each aspect of the home building process in terms of cost-effectiveness, quality and aesthetics." --Michel Sargious, PhD, P.Eng. Professor Department of Civil Engineering The University of Calgary Now Building Your Own Home puts complicated material into terms anyone can easily understand. From managing the construction process like a pro to mastering every legal and financial detail, you get step-by-step instruction to guide you through the entire construction process. It explains with 132 clarifying photographs and illustrations how each part of the house is built. You'll learn how to: * find a good lot and select an appropriate design * apply for a building permit, secure the best financing terms as well as the best insurance coverage * handpick top-notch independent contractors--and successfully manage their work * control every stage of construction, from door knobs to deck installation to the plumbing and electrical work Easy-to-read and filled with practical information, Building Your Own Home contains everything you need to build a customized house of your dreams.

The DIY Guide to Wearing Your Pride Cool Springs Press

Build a Shelter Your Way! gives readers the confidence to create using the makerspace tools of inspiration, imagination, collaboration, and problem-solving. Using these tools, readers take on fun challenges that help dream up their own weatherproof survival structure. Colorful images and engaging sidebars, along with guiding prompts and advice, will help today's makers gain the skills to solve tomorrow's real-world problems. Aligned to Common Core Standards and correlated to state standards. Super Sandcastle is an imprint of Abdo Publishing, a division of ABDO.

Design Mom Penguin

Start doing your own household repairs and simple renovations without the expense of calling in a professional. Full of expert advice, this practical beginner's handbook features easy instructions for all the home DIY basics, from painting and wallpapering to simple plumbing, changing a lock, using power tools, fixing a squeaky board and much more.

The Bust DIY Guide to Life Creative Publishing International

Advice for military couples "As soon as I arrived in Afghanistan, I began reading The 5 Love Languages®. I had never read anything so simple yet so profound." — Anonymous soldier If you are in a military relationship, you know the strain of long deployments, lonely nights, and difficult transitions. For extraordinary challenges like these, couples need specific advice. In this updated edition of The 5 Love Languages®: Military Edition, relationship expert Dr. Gary Chapman teams up with Jocelyn Green, a former military wife, to speak directly to military couples. They share the simple secret to loving each other best, including advice for how to: Build intimacy over long distances Reintegrate after deployment Unlearn harsh military-style communication Rebuild and maintain emotional love Help your spouse heal from trauma and more With more than 20 million copies sold, The 5 Love Languages® has been strengthening millions of relationships for over 30 years. This military edition will inspire and equip you to build lasting love in your relationship, starting today. Includes stories from every branch of service, tips for expressing love when apart, and an updated FAQs section.

Building Your Custom Home For Dummies No Starch Press

Josh Volk, author of the best-selling Compact Farms, offers small-scale farmers an in-depth guide to building customized equipment that will save time and money and introduce much-needed efficiencies to their operations. Volk begins with the basics, such as setting up a workshop and understanding design principles, mechanical principles, and materials properties, then presents plans for making 15 tools suited to small-farm tasks and processes. Each project includes an explanation of the tool's purpose and use, as well as the time commitment, skill level, and equipment required to build it. Projects range from the super-simple (requiring a half-day to build) to the more complex, and include how-to photographs and illustrations with variations for customizing the finished implement. Along with instructions for building items such as simple seedling benches, a mini barrel washer, a DIY germination chamber, and a rolling pack table, Volk addresses systems design for farm efficiency, including how to design an effective drip irrigation system and how to set up spreadsheets for collecting important planning, planting, and market data. This publication conforms to the EPUB Accessibility specification at WCAG 2.0 Level AA.

Build Your Own Farm Tools Storey Publishing, LLC

Anda mungkin beruntung memiliki pekerjaan atau proyek mendatang dengan visi yang cemerlang. Namun, upaya mewujudkan visi ini sering kali tak mudah. Setiap hari Anda gampang sekali terjebak dalam berbagai hal: surel yang seolah tiada habisnya, tenggat yang molor, rapat-rapat seharian yang menyita waktu, dan proyek jangka panjang yang hanya berdasarkan asumsi. Sudah waktunya Anda mencoba Sprint, sebuah metode untuk memecahkan masalah dan menguji ide-ide baru, menyelesaikan lebih banyak hal dengan efisien. Buku ini ditulis Jake Knapp, mantan Design Partner Google Ventures, untuk menuntun Anda merasakan pengalaman menerapkan metode yang telah mendunia ini. Sprint mewujudkan pengekseskusan ide besar hanya dalam lima hari. Menuntun tim Anda dengan checklist lengkap, mulai dari Senin hingga Jumat. Menjawab segala pertanyaan

penting yang sering kali hanya disimpan di benak mereka yang sedang menguji ide/konsep/produk. Sprint juga membantu Anda lebih menikmati setiap proses. Anda bisa mengamati dan bergabung dengan ratusan dari pelaku Sprint di seluruh dunia melalui tagar #sprintweek di Twitter. Sebuah proyek besar terjadi pada 2009. Seorang insinyur Gmail bernama Peter Balsiger mencetuskan ide mengenai surel yang bisa teratur secara otomatis. Saya sangat tertarik dengan idenya—yang disebut “Kotak Masuk Prioritas”—dan merekrut insinyur lain, Annie Chen, untuk bergabung bersama kami. Annie setuju, tetapi dia hanya punya waktu sebulan untuk mengerjakannya. Kalau kami tidak bisa membuktikan bahwa ide itu bisa diterapkan dalam jangka waktu tersebut, Annie akan beralih ke proyek lainnya. Saya yakin waktunya tidak akan cukup, tetapi Annie adalah insinyur yang luar biasa. Jadi, saya memutuskan untuk menjalaninya saja. Kami membagi waktu sebulan itu ke dalam empat bagian yang masing-masing lamanya seminggu. Setiap pekan, kami menggarap desain baru. Annie dan Peter membuat purwarupa, lalu pada akhir minggu, kami menguji desain ini bersama beberapa ratus orang lainnya. Pada akhir bulan, kami menemukan solusi yang bisa dipahami dan diinginkan orang-orang. Annie tetap menjadi pemimpin untuk tim Kotak Masuk Prioritas. Dan entah bagaimana caranya, kami berhasil menyelesaikan tugas desainnya dalam waktu yang lebih singkat dari biasanya. Beberapa bulan kemudian, saya mengunjungi Serge Lachapelle dan Mikael Drugge, dua orang karyawan Google di Stockholm. Kami bertiga ingin menguji ide perangkat lunak untuk konferensi video yang bisa dijalankan lewat peramban. Karena saya berada di kota tersebut hanya selama beberapa hari, kami bekerja secepat mungkin. Pada penghujung kunjungan saya, kami berhasil menyelesaikan purwarupanya. Kami mengirimkannya ke rekan kerja kami lewat surel dan mulai menggunakannya dalam rapat. Dalam beberapa bulan, seluruh perusahaan sudah bisa menggunakannya. (Selanjutnya, versi yang sudah dipoles dan disempurnakan dari aplikasi berbasis web tersebut dikenal sebagai Google Hangouts.) Dalam kedua kasus tersebut, saya menyadari bahwa saya bekerja jauh lebih efektif ketimbang rutinitas kerja harian saya atau ketika mengikuti lokakarya diskusi sumbang saran. Apa yang membedakannya? Saya menimbang kembali lokakarya tim yang saya gagas sebelumnya. Bagaimana kalau saya memasukkan elemen ajaib lainnya—fokus pada kerja individu, waktu untuk membuat purwarupa, dan tenggat yang tak bisa ditawar? Saya lalu menyebutkan, “sprint” desain. Saya membuat jadwal kasar untuk sprint pertama saya: satu hari untuk berbagi informasi dan mereka ide, diikuti dengan empat hari pembuatan purwarupa. Sekali lagi, tim Google menyambut baik eksperimen ini. Saya memimpin sprint untuk mendesain Chrome, Google Search, Gmail, dan proyek-proyek lainnya. Ini sangat menarik. Sprint ini berhasil. Ide-ide diuji, dibangun, diluncurkan, dan yang terbaik, kebanyakan dari ide-ide ini berhasil diterapkan dalam dunia nyata. Proses sprint menyebar di seisi Google dari satu tim ke tim lain, dari satu kantor ke kantor lain. Seorang desainer dari Google X tertarik dengan metode ini, jadi dia menjalankan sprint untuk sebuah tim di Google Ads. Anggota tim dalam sprint di Ads kemudian menyampaikannya kepada kolega mereka, dan begitu seterusnya. Dalam waktu singkat saya mendengar penerapan sprint dari orang-orang yang tidak saya kenal. Dalam perjalanannya, saya membuat beberapa kesalahan. Sprint pertama saya melibatkan empat puluh orang—jumlah yang sangat besar dan justru hampir menghambat sprint tersebut, bahkan sebelum dimulai. Saya menyesuaikan waktu yang diperlukan untuk mengembangkan ide dan pembuatan purwarupa. Saya jadi memahami mana yang terlalu cepat, terlalu lambat, hingga akhirnya menemukan yang waktu paling sesuai. Beberapa tahun kemudian, saya bertemu Bill Maris untuk membicarakan sprint. Bill adalah CEO Google Ventures, perusahaan modal ventura yang didirikan Google untuk berinvestasi pada startup-startup potensial. Dia adalah salah satu orang berpengaruh di Silicon Valley. Namun, Anda tidak akan menyangkanya dari pembawaannya yang santai. Pada sore itu, dia mengenakan pakaian khasnya, yaitu topi bisbol dan kaus dengan tulisan tentang Vermont. Bill tertarik untuk menjalankan sprint dengan startup dalam portofolio GV. Startup biasanya hanya memiliki satu kesempatan emas untuk mendesain sebuah produk yang sukses, sebelum akhirnya kehabisan dana. Sprint bisa membantu mencari tahu apakah startup-startup ini berada di jalur yang tepat sebelum akhirnya mereka bisa berkecimpung dalam tahapan yang lebih berisiko untuk membangun dan meluncurkan produk mereka. Dengan menjalankan sprint, mereka bisa mendapatkan sekaligus menghemat uang. Namun agar berhasil, saya harus menyesuaikan proses sprint ini. Saya sudah berpikir mengenai produktivitas individu dan tim selama beberapa tahun. Namun, saya hampir tidak tahu apa-apa mengenai startup dan kebutuhan bisnis mereka. Tetap saja, antusiasme Bill meyakinkan saya bahwa Google Ventures adalah tempat yang tepat untuk menerapkan sprint—sekaligus tempat yang tepat bagi saya. “Ini misi kita,” ujarnya, “untuk bisa menemukan entrepreneur terbaik di muka bumi dan membantu mereka membuat dunia ini menjadi tempat yang lebih baik.” Saya tentu tak bisa menolaknya. Di GV, saya bergabung dengan tiga rekan lain: Braden Kowitz, John Zeratsky, dan Michael Margolis. Bersama, kami mulai menjalankan sprint dengan startup-startup, bereksperimen dengan prosesnya, dan menguji hasilnya agar bisa menemukan cara untuk memperbaikinya. Ide-ide dalam buku ini lahir dari semua anggota tim kami. Braden Kowitz memasukkan desain berbasis cerita dalam proses sprint, sebuah pendekatan tak biasa yang berfokus pada pengalaman konsumen alih-alih komponen individu atau teknologi. John Zeratsky membantu kami memulai dari akhir sehingga tiap sprint bisa membantu menjawab berbagai pertanyaan bisnis paling penting. Braden dan John memiliki pengalaman dalam bisnis dan startup, hal yang tidak saya miliki, dan mereka menyesuaikan prosesnya untuk menciptakan fokus yang lebih baik dan keputusan yang lebih cerdas di tiap sprint. Michael Margolis mendorong kami untuk mengakhiri tiap sprint dengan pengujian di dunia nyata. Dia menjalankan riset konsumen, yang perencanaan dan pelaksanaannya bisa menghabiskan waktu berminggu-minggu, dan menemukan cara untuk mendapatkan hasil yang jelas hanya dalam sehari. Ini benar-benar sebuah keajaiban. Kami tidak perlu lagi menebak-nebak apakah solusi kami bagus atau tidak karena di akhir tiap sprint, kami mendapatkan jawabannya. Kemudian ada Daniel Burka, seorang entrepreneur yang mendirikan dua startup sebelum menjual salah satunya ke Google dan bergabung dengan GV. Saat kali pertama menjelaskan proses sprint kepadanya, dia skeptis. Baginya, sprint terdengar seperti serangkaian proses manajemen yang rumit. Namun, dia sepakat untuk mencoba salah satunya. “Dalam sprint pertama itu, kami memangkas prosesnya dan menciptakan sesuatu yang ambisius hanya dalam sepekan. Saya benar-benar jatuh hati.” Setelah kami berhasil meyakinkannya, pengalaman langsung Daniel sebagai seorang pendiri startup dan sikapnya yang tidak menoleransi omong kosong membantu kami menyempurnakan prosesnya. Sejak sprint pertama di GV pada 2012, kami telah beradaptasi dan bereksperimen. Mulanya kami mengira pembuatan purwarupa dan riset yang cepat hanya akan berhasil untuk produk berskala besar. Mampukah kami bergerak sama cepatnya jika konsumen kami adalah para ahli di berbagai bidang seperti kesehatan dan keuangan? Tanpa disangka, proses lima hari ini bisa bertahan. Proses ini sesuai untuk semua jenis konsumen, mulai dari investor sampai petani, dari onkolog sampai pemilik bisnis skala kecil. Juga bagi situs web, aplikasi iPhone, laporan medis, hingga perangkat keras berteknologi tinggi. Tidak hanya untuk mengembangkan produk, kami juga menggunakan sprint untuk menentukan prioritas, strategi pemasaran, bahkan menamai perusahaan. Proses ini berulang-ulangmenyatukan tim dan menjadikan ide-ide menjadi nyata. Selama beberapa tahun belakangan, tim kami mendapatkan beragam kesempatan untuk bereksperimen dan memvalidasi ide kami mengenai proses kerja. Kami menjalankan lebih dari seratus sprint bersama dengan startup-startup dalam portofolio GV. Kami bekerja bersama, sekaligus belajar dari para entrepreneur brilian seperti Anne Wojcicki (pendiri 23andMe), Ev Williams (pendiri Twitter, Blogger, dan Medium), serta Chad Hurley dan Steve Chen (pendiri YouTube). Pada

awalnya, saya hanya ingin membuat hari-hari kerja saya efisien dan berkualitas. Saya ingin berfokus pada apa yang benar-benar penting dan menjadikan waktu saya berharga—bagi saya, tim, dan konsumen kami. Kini, lebih dari satu dekade kemudian, proses sprint secara konsisten telah membantu saya meraih mimpi tersebut. Dan saya sangat senang berbagi mengenai hal tersebut dengan Anda dalam buku ini. Dengan keberuntungan, Anda bisa memilih pekerjaan Anda karena visi yang tajam. Anda ingin berbagi visi tersebut kepada dunia, baik yang berupa pesan, layanan, maupun pengalaman, dengan perangkat lunak maupun keras, atau bahkan—sebagaimana dicontohkan dalam buku ini—sebuah cerita atau ide. Namun, mewujudkan visi ini tak mudah. Gampang sekali terjebak dalam berbagai hal: surel yang seolah tiada habisnya, tenggat yang molor, rapat-rapat sehari yang menyita waktu Anda, dan proyek jangka panjang yang hanya berdasarkan asumsi. Prosesnya tidak harus selalu seperti ini. Sprint menawarkan jalur untuk memecahkan masalah-masalah besar, menguji ide-ide baru, menyelesaikan lebih banyak hal, dan melakukan semuanya dengan lebih cepat. Sprint juga membantu Anda lebih menikmati prosesnya. Dengan kata lain, Anda benar-benar harus mencobanya sendiri. Ayo kita mulai. —Jake Knapp San Francisco, Februari 2016 [Mizan, Bentang Pustaka, Manajemen, Ide, Kreatif, Inovasi, Motivasi, Dewasa, Indonesia] spesial seri bentang bisnis & startup

The Unofficial LEGO Builder's Guide, 2nd Edition John Wiley & Sons

Regular cold-water immersion can improve your physical health and emotional well-being. Whether you are an elite athlete, a bio-hacker, a health and fitness enthusiast, or someone who is trying to reboot your immune system, cold water might be the missing piece to enhance your results. However, if you live in a warm climate, what options do you have? Cold showers are a good place to start, but do not provide consistent temperatures year-round, and most people find them to be uncomfortable at best. Buying and hauling ice gets expensive and takes a lot of time. Cryotherapy chambers are inconvenient and expensive. Commercially built cold plunges can cost several thousand - or tens of thousands - of dollars. So, what is a great solution for the average person? Convert a chest freezer into a cold plunge! However, chest freezers are not meant to hold water. Creating a personal cold plunge from a chest freezer is fraught with potential problems and missteps. If you don't set it up correctly, you can damage or break your chest freezer, waste hundreds of dollars and countless hours of time, or worse, injure yourself. After two years of research and modifications and helping more than 1,500 people from 72 countries in a private online group, John Richter has created a guide book that helps you convert a chest freezer into a cold plunge while avoiding costly mistakes and frustration. The Ultimate Chest Freezer Cold Plunge DIY Guide helps you: - Select the best chest freezer - Design options for various budgets - Prevent rust and other damage- Choose equipment for easy use and maintenance- Keep your water clean-with or without chemicals- Be safe- Set the optimal temperature- Create a cold-water practice- Find the best training- Avoid costly mistakes- And much more Each chapter is easy to read and offers step-by-step directions. The book includes a buyer's guide, setup checklist, and a FAQ that answers more than 50 questions. This book is a must-have for professional athletes, students of the Wim Hof Method, followers of Dr. Jack Kruze, and anyone else who wants to take the benefits of cold training to the next level.

Build Your Own PC on a Budget: A DIY Guide for Hobbyists and Gamers Open Road Media

Book Design Made Simple gives DIY authors, small presses, and graphic designers--novices and experts alike--the power to design their own books. It's the first comprehensive book of its kind, explaining every step from installing Adobe(R) InDesign(R) right through to sending the files to press. For those who want to design their own books but have little idea how to proceed, Book Design Made Simple is a semester of book design instruction plus a publishing class rolled into one. Let two experts guide you through the process with easy step-by-step instructions, resulting in a professional-looking top-quality book

A DIY Smart Home Guide: Tools for Automating Your Home Monitoring and Security Using Arduino, ESP8266, and Android Taunton Press

This comprehensive bible of remodeling information and projects focuses on the significant projects that help homeowners add real value to their homes while bettering their lifestyles. Unlike other books, The Complete Photo Guide to Home Improvement isn't diluted with basic home repairs, but gives readers foolproof instructions on more than 200 blockbuster home remodeling projects.

Is it really possible to have the home life you want with the people you love? The most exciting part of any home improvement show is the big reveal—that moment when a drab, run-down house becomes a breathtaking new home. What if you could have that with your home life? That's what the DIY Guide is all about. In it, you'll find practical tools for transforming your home life and dramatically improving your family's culture from Shannon Warden and Dr. Gary Chapman, author of the New York Times #1 Bestseller The 5 Love Languages®. Each chapter teaches you a new home life skill and pairs it with a home improvement metaphor that makes it fun and easy to remember. You can't hire a contractor for this work, but if you're willing to put in the sweat equity (hard work), you'll see results fast. Don't wait any longer. Get started today and give your relational space the renovations it deserves.
