Section 5 1 Weathering Soil And Mass Movement Answer Eventually, you will entirely discover an additional experience and expertise by spending more cash. yet when? do you tolerate that you require to get those all needs once having significantly cash? Why don't you try to acquire something basic in the beginning? Section 5 1 Weathering Soil And Mass Movement Answer Chapter 5 Weathering, Soil, and Mass Movements Summary 5.1 Weathering Mechanical weathering occurs when physical forces break rock into smaller and smaller pieces without changing the rock's mineral composition. In nature, three physical processes are especially important causes of mechanical weathering: frost wedging, unloading, and biological activity. Chapter 5 Weathering, Soil, and Mass Movements Section 5.1 Weathering. Weathering - the breaking down of rock at or near the Earth's surface. It is a basic part of the rock cycle usually involved in making sedimentary rock. Mechanical Weathering - occurs when physical forces break rock into smaller pieces without changing the rock's mineral composition. Frost wedging Chapter 5 Weathering, Soil, and

Mass Movements

- zones of soil that have similar composition, texture, structure, and color
- flows that move quickly
- a type of weathering in which physical forces break rock into smaller pieces without changing its composition
- soil that forms in hot, wet tropical areas
- flows that move relatively slowly
- soil that usually forms in temperate areas

Chapter 5 Weathering, Soil, and Mass Movements Section 5.3 ...Soil forms through accumulation and decay of organic matter and through the mechanical and chemical weathering processes described above. The factors that affect the nature of soil and the rate of its formation include climate (especially average temperature and precipitation amounts, and the consequent types of vegetation), the type of parent material, the slope of the surface, and the amount of time available.
