When the hall clock reads twenty minutes past four, the attic clock reads twenty-three minutes past four, the kitchen clock reads twenty-five minutes past four, and the bedroom clock reads twenty-six minutes past four, what should Mr. Higgins do? He can't tell which of his clocks tells the right time. He is in for a real surprise when the Clockmaker shows him that they are all correct!

### Pop's Bridge SCHOLASTIC

Promotes beginning multiplication skills by introducing specific concepts gradually to enable complete mastery and the memorization of multiplication basics, sharing an abundance of practice pages for extra reinforcement. Original.

The Golden Gate Bridge. The impossible bridge, some call it. They say it can't be built. But Robert's father is building it. He's a skywalker--a brave, high-climbing ironworker. Robert is convinced his pop has the most important job on the crew .

. . until a frightening event makes him see that it takes an entire team to accomplish the impossible. When it was completed in 1937, San Francisco's Golden Gate Bridge was hailed as an international marvel. Eve Bunting's riveting story salutes the ingenuity and courage of every person who helped raise this majestic American icon.

Includes an author's note about the construction of the Golden Gate Bridge. Summer Bridge Activities® Carson-Dellosa Publishing

This bold and colorful counting book shows young readers that math and addition can be fun and easy (when you use dominos). Black and white dominos make up each number on various bold backgrounds and each page gives the various properties of numbers zero to twelve. With a simple but imaginative approach, Lynette Long, has created a perfect classroom resource that teaches kids how to add up each dot on an individual domino as well as how to spot different number combinations. This bright and fun-filled introduction to basic addition will appeal to both eager and reluctant math students.

*Kumon, Multiplication* Carson-Dellosa Publishing

In a book far ahead of its time, *All Kinds of Families* celebrated the broad diversity of American families when it was first published in 1976. Now Norma Simon and Sarah S. Brannen have updated this classic for the modern age. Multicultural and multigenerational people demonstrate what being in a family means and how all families offer each other support and love.

Daily Math Practice Grade 2 SCHOLASTIC "A 22-volume, highly illustrated, A-Z general encyclopedia for all ages, featuring sections on how to use World Book, other research aids, pronunciation key, a student guide to better writing, speaking, and research skills, and comprehensive index"--

This tale of ants parading toward a picnic is "one of those rare gems capable of entertaining while it instructs" (Middlesex News). One hundred hungry ants march off single file to sample a picnic, but when the going gets too slow, they divide into two rows of fifty, then four rows of twenty-five . . . until they take so long that the picnic is gone! "The unexpected pairing of sophisticated art and light-hearted text lends this book particular distinction." —Publishers Weekly "The illustrations . . . use a pleasing palette and energetic lines to depict ants with highly individual characters." —Horn Book
