Challenging the Status Quo: Diversity, Democracy, and Equality in the 21st Century BRILL

Offers advice on how to lead an organization into change, including establishing a sense of urgency, developing a vision and strategy, and generating short-term wins.

Reimagining the Landscape of Innovation John Wiley & Sons

Status Quo were one of the most successful, influential and innovative bands of the 1970s. During the first half of the decade, they wrote, recorded and performed a stream of inventive and highly complex rock compositions, developed 12 bar forms and techniques in new and fascinating ways, and affected important musical and cultural trends. But, despite global success on stage and in the charts, they were maligned by the UK music press, who often referred to them as lamebrained

three-chord wonders, and shunned by the superstar Disk Jockeys of the era, who refused to promote their music. As a result, Status Quo remain one of the most misunderstood and underrated bands in the history of popular music. Cope redresses that misconception through a detailed study of the band's music and live performances, related musical and cultural subtopics and interviews with key band members. The band is reinstated as a serious, artistic and creative phenomenon of the 1970s scene and shown to be vital contributors to the evolution of rock.

We are in the midst of what may well be the most confusing, turbulent period in the history of modern medicine. This book seeks to cut through the fog and confusion that enshrouds the health care industry to provide clarity on where the industry stands today and where it is headed. The book defines the major challenges in health care through the journey of Northwell Health, one of the largest provider organizations in the country. The central issues in what is nearly one-fifth of the United States economy are played out daily within this not-for-profit organization. Northwell is New York state's largest workers, and \$11 billion in annual revenue. The book candidly portrays key leaders within Northwell on the most vexing challenges

in health care: How to provide primary and specialty care spending; how to create and sustain an internal system of continuous learning to enable employees at all levels to stay current in an industry that is changing at warp speed; how to provide emergency services in a world where natural disasters and acts of terrorism are inevitable; how to identify new revenue streams to offset reductions from Medicare and Medicaid; and how to push outside the walls of hospitals and clinics to improve the overall health of individuals and communities by working on determinants of health beyond the typical medical practice. The book exists at the intersection of medicine, business, social and public policy. Harvard's Michael Porter has written widely on health care arguing that it is time "for a fundamentally new strategy," but what, exactly? Where is the industry headed? What do the changes and the turbulence mean for patients, doctors, nurses? This book is the product of a learning journey both humbling and rewarding. Over time, lessons learned, improvements made, innovations conceived, have advanced Northwell Health in ways that, some years ago, might not have seemed possible. Northwell has become a national leader not because it is perfect, but because it remains steadfast in its journey to remain humble enough to know that whatever success may be achieved, the journey is about continuous learning and improvement. The goal of the book is to provide a deeper, clearer understanding of what is happening in health care and why; to help illuminate a pathway forward for patients and caregivers most of all, but also for policy-makers and the employers and others who pay for care. the Benefits Game to Help Their Clients and Boost Their Bottom Line IAP

This book provides an insightful and critical assessment of the state of Canadian water governance and policy. It adopts a multidisciplinary variety of perspectives and considers local, basin, provincial and national scales. Canada's leading authorities from the social sciences, life and natural sciences address pressing water issues in a non-technical language, making them accessible to a wide audience. Even though Canada is seen as a water-rich country, with 7% of the world's reliable flow of freshwater and many of the world's largest rivers, the country nevertheless faces a number of significant water-related challenges, stemming in part from supply-demand imbalances but also a range of water quality issues. Against the backdrop of a water policy landscape that has changed significantly in recent years, this book therefore seeks to examine water-related issues that are not only important for the future of Canadian water management but also provide insights into transboundary management, non-market valuation of water, decentralized governance methods, the growing importance of the role of First Nations peoples, and other topics in water management that are vital to many jurisdictions globally. The book also presents forward-looking approaches such as resilience theory and geomatics to shed light on emerging water issues. Researchers, students and those directly involved in the management of Canadian waters will find this book a valuable source of insight. In addition, this book will appeal to policy analysts, people concerned about Canadian water resources specifically as well as global water

issues.

Goodbye, Status Quo Springer Nature
One chance encounter. Two opposites. And a connection that could change everything. Heath Palmer—presumed CEO and heir to a billion-dollar business—might have shoulders broad enough to bear the responsibility of keeping his family out of the press, but that doesn't mean he can't dream of a night off. After a potential PR disaster forces him to attend his family's New Year's Eve masquerade gala, he decides to don the disguise of a valet, leading to a chance meeting at midnight with a woman he could never forget. Maia Weaver has worked the Palmer gala as a server since she was old enough to carry a silver platter, but this New Year's Eve is different. This year, she's going to find a story worth writing. Something to kick-start her career as a journalist. When she figures out the masked valet with the soulful, dark eyes is actually Heath Palmer, she gets the opportunity she was looking for—even if she would trade it all for a New Year's kiss. When the moment is interrupted, Heath fears he's lost the feisty beauty who made him feel alive, but he knows he can't afford another distraction. Not when the stakes for taking control of the company are this high. So when Maia turns up as a stewardess on his family's yacht, he has two choices: admit to wearing a disguise to his own family's party or lie and pretend they've never met. Maia's keeping secrets too, and when Heath surprises her by asking for her help as a translator on a trip across Europe, she accepts—but with an agenda of her own. As the secrets between them continue to mount, can these two opposites really expect to work together as a team? Especially when the secret they're both keeping is the one that could ruin

everything—that this just might be love. *Status Quo* is the first book in a series of stand-alone contemporary romances. If you like glittery locales and destinations, grumpy billionaires afraid to admit their feelings, and plenty of slow-burn sexual tension and banter, then you'll love this first installment in Nina Hatch's new travel-themed series. Pre-order *Status Quo* to sail away with this opposites attract romance soon!

This volume surveys the new global landscape for democratic civic education. Rooted in qualitative research, the contributors explore the many ways that notions of democracy and citizenship have been implemented in recent education policy, curriculum, and classroom practice around the world. From Indonesia to the Spokane Reservation and El Salvador to Estonia, these chapters reveal a striking diversity of approaches to political socialization in varying cultural and institutional contexts. By bringing to bear the methodological, conceptual and theoretical perspectives of qualitative research, this book adds important new voices to one of education's most critical debates: how to form democratic citizens in a changing world.

Just like master scientists use principles of physics to transform energy into extraordinary displays of power, alchemical leaders use metaphysical

principles to transform resources into results that exceed norms and expectations. Grounded squarely in data, and anchored deeply in universal wisdom, *The Alchemy of Power* reveals: what power is what it means to have it how to develop and manage it how to navigate the global call for leaders to use their power to create a better world by developing better workplaces. *The Alchemy of Power* is rich with information and inspiration that connects studies on leadership, with emergent global trends, and with ageless metaphysical teachings—and ties it all to what’s on leaders’ minds and desktops right now. Written by a seasoned leadership and cultural consultant who has trekked the globe exploring world philosophies and spiritual practices, *The Alchemy of Power* is about increasing your capacity for causing results that amount to much more than the sum of parts—leadership alchemy.

Evolution is killing innovation! “Just trust your gut” is great advice when your instincts tell you to run from a lion in the jungle. But when it comes to thinking innovatively about your business, those same instincts can be your own worst enemy. Cognitive biases—the instinctual mental shortcuts we all have in our brains that shape how we see and respond to the world around us—can also be the archnemeses of innovation/innovative thinking. New ideas appear too risky. Data gets discounted if it doesn’t match the hypothesis of the researcher. And even like-minded innovation enthusiasts can find that enacting disruptive change is tough when they all see things the same way. It’s time to let go and learn a new way to think. Created by innovation

experts, *Outsmart Your Instincts* cleverly merges behavioral science with business savvy. Using the trademarked Behavioral Innovation™ model, the authors provide an in-depth examination of eight unique biases (Negativity, Confirmation, and Conformity among them) that get in the way of creativity/creative thinking—and show us how we can overcome these barriers and break from the status quo. With clever, thought-provoking activities, accessible writing, and easy-to-follow advice, *Outsmart Your Instincts* shows us how and why we react to new ideas the way we do, and then—helps us rethink what-we-think. Once we learn to outsmart our own instincts, we can take on challenges as true innovators who rely on all of our brains’ powers—not just our guts—and be equipped to outsmart the competition.

In her first book, *From Status Quo to Creativity*, Ijeoma Nwankwo encourages her readers to push past complacency and strive for something greater. “The goal here,” she writes, “is to be bold while staying aware of the importance of creativity, which can advance you as an individual and add greater value to the overall work you take part in.” Through a straightforward, step-by-step process, readers explore the keys to creativity, learn how to conquer everyday obstacles, and embrace innovation. With in-depth explanations on ROI, customer—unsung hero, automation, problem solving and SMART goals, *From Status Quo to Creativity* guides the reader through exercises designed to help everyone from beginners to experts dig deeper and reach higher. For those looking to push ahead in the business world and break through the barriers of the mundane, Nwankwo has a powerful

message: "You can do it!"

Breaking Through Your Own Glass Ceiling offers simple, proven prosperity practices to address power dynamics faced by BIPOC (Black, Indigenous, and People of Color) and other underrepresented communities. You can begin today to identify and uproot unhealthy patterns and replace them with consistent thoughts and behaviors to embrace a full-hearted life—even in environments that do not support your well-being. Many people attempt to navigate glass ceilings by reading self-help and motivational books that send the message that vision boards, meditation apps, and affirmations will compensate for exclusionary policies and laws. This book rejects the "one size

fits all" approach to career development and self-care that leads people to internalize their own glass ceiling. If you are ready to have a full-hearted breakthrough, this book can be your daily guide and inspiration.

The Fourth Dimension The Next Level of Personal and Organizational Achievement As the latest wave of corporate downsizing, streamlining, and reengineering initiatives continues to mount in intensity, the traditional employer-employee relationship is experiencing a massive shakeup, and a new work paradigm is struggling to be

born. At the same time that employers are finding that they can no longer offer the traditional carrots of job security and lavish compensation packages, they are coming to recognize the need to forge closer partnerships with their employees-partnerships defined by shared risks, responsibilities, and rewards. But a paradigm shift of this magnitude cannot occur without considerable effort on the parts of both employers and employees. Such a successful fusion of personal and organizational visions requires a radical change in attitudes, expectations, and work patterns, and those who are quickest to make those changes are sure to be the big winners in the years ahead. The Fourth Dimension provides a comprehensive program for managers challenged to do more with less and individuals seeking to improve the quality of their worklives. It offers proven techniques to help you excel in the three primary work dimensions outlined in the authors' acclaimed MetaWork System(TM): * PowerWork(TM): efficiency, effectiveness, and the achievement of the right results * NetWork(TM): sharing competence and knowledge with others and developing more dynamic working relationships * ValueWork(TM): achieving more frequent breakthroughs in performance and value added based on individual and group ideas You'll learn how to integrate these three primary dimensions into an incredibly potent Fourth Dimension, a newly defined workspace within which individuals, teams, and entire companies continually exceed their best hopes and expectations. Throughout The Fourth Dimension, the authors provide vivid real-life illustrations of the astonishing results that have been achieved with the techniques they describe. Personal

profiles of leaders such as Rebecca Matthias of Mothers Work and Steve Wiggins of Oxford Health Plans, as well as case studies of top companies, including Hewlett-Packard, Compaq, and Microsoft, lead you to a fuller understanding of the revolutionary changes now reshaping the work world and how many of today's business leaders have learned to use fourth dimensional thinking to gain the competitive edge. Offering a complete program for achieving higher levels of performance by combining personal and organizational vision, The Fourth Dimension is must reading for executives, managers, team leaders, entrepreneurs, and virtually anyone interested in achieving a more fulfilling and meaningful destiny in the postindustrial work world.

Continuing to Disrupt the Status Quo? Young and New Women Professors of Educational Leadership was conceptualized as a follow-up to Breaking Into the All-Male Club: Female Professors of Educational Administration (Mertz, 2009), a book about and by many women who were the first women faculty admitted into departments of educational administration primarily in the 1970's and 1980's. This book offers narratives of those women new to the field of educational leadership and makes comparisons to those stories shared by the veteran women in the field to highlight both similarities and differences. Continuing to Disrupt the Status Quo? Young and New Women Professors of Educational Leadership is a literary way to preserve and continue the tradition of the sharing/addition of

voices to the field of educational leadership that was begun with *Breaking Into the All-Male Club*. It begs the question, "If the women from *Breaking Into the All-Male Club* are "firsts," "pioneers," and "groundbreakers," then who are we, the young and new women of the field? If the entrance of women into the field of educational leadership was threatening enough for the veteran women (and still is for many of the young and new women), then the addition of age and ethnicity as confounding factors has likely created a cacophony of dissonance forty years later! *Continuing to Disrupt the Status Quo?* represents a decade of stories (2002-2012) from young and new women to the field of educational leadership.

From Status Quo to Creativity Morgan James Publishing

This book is not a critique of digital ethics but rather a hack. It follows the method of hacking by developing an exploit kit on the basis of state-of-the-art social theory, which it uses to breach the insecure legacy system upon which the discourse of digital ethics is running. This legacy system is made up of four interdependent components: the philosophical mythology of humanism, social science critique, media scandalization, and the activities of many civil society organisations lobbying for various forms of regulation. The hack exposes the bugs, the sloppy programming, and the false promises of current digital ethics, and, because it is an ethical hack, redesigns digital ethics so that it can address the problems of the global network society. The main idea of the book is that the social world of meaning is based on information, which, because of its relational nature, must be understood more as a common

good than as private property. A digital ethics that relies upon humanistic individualism cannot address the issues arising from the global network society based upon information. This demands a complete revision of the philosophical foundations of current digital ethics by means of a redesign of ethics as a theory of governance by design.

It's certainly easy to understand why mediocrity seems to be the new norm in our country. After all, take a look around. As you read this we find ourselves burdened with immense national debt, polarized political parties, sky high unemployment, and increasing levels of hunger, homelessness, and hopelessness. All while our discontent with leaders across all segments of society leaves us scratching our heads and searching our hearts to understand, "how did we end up here?" The more important question, of course, is where do we go from here? And, as importantly, what role will you play? This is where I have some good news to offer. *Mediocre Me* reminds us the solution to the current mess we're in is already present—"invisible" in plain sight. It's not found in another government program nor can it be dictated merely by expert opinions. Rather, the answer to our individual and collective challenges is found in the inspiring example of those citizen-leaders in our midst who are hard at work trying to move things solidly forward in their spheres of influence. And, best of all, they are waiting for more of us to join them. Sound frightening? Challenging? Too difficult to pull off, you say? Think again.

Putting Theory Into Action Rowman & Littlefield

Victorian science changed language

from a tool into a natural phenomenon, evolving independently of its speakers. Will Abberley explores how science and fiction interacted in imagining different stories of language evolution. Popular narratives of language progress clashed with others of decay and degeneration. Furthermore, the blurring of language evolution with biological evolution encouraged Victorians to re-imagine language as a mixture of social convention and primordial instinct. Abberley argues that fiction by authors such as Charles Kingsley, Thomas Hardy

and H. G. Wells not only reflected these intellectual currents, but also helped to shape them. Genres from utopia to historical romance supplied narrative models for generating thought experiments in the possible pasts and futures of language. Equally, fiction that explored the instinctive roots of language intervened in debates about language standardisation and scientific objectivity. These textual readings offer new perspectives on twenty-first-century discussions about language evolution and the language of science.
