This volume examines the effects of Donald Trump's presidency on journalistic practices, rhetoric, and discourses. Rooted in critical theory and cultural studies, it asks what life may be like without Trump, not only for journalism but also for American society more broadly. The book places perspectives and tensions around the Trump presidency in one spot, focusing on the underlying ideological forces in tensions around media trust, Trumpism, and the role of journalism in it all. It explores how journalists dealt with racist rhetoric from the White House, relationships between the Office of the President and social media companies, citizens, and journalists themselves, while questioning whether journalism has learned the right lessons for the future. More importantly, chapters on liberal media "bias," the First 100 Days of the Biden Presidency, gender, and race, and how journalists should adopt measures to "reduce harm" hint as to where politics and journalism may go next. Reshaping the scholarly and public discourse about where we are headed in terms of the presidency and publics, social media, and journalism, this book will be an important resource for scholars and graduate students of journalism, media studies, communication studies, political science, race and ethnic studies and sociology.

Hardly a day passes without journalists, policymakers, academics, or scientists calling attention to the worldwide scale of the environmental crisis confronting humankind. While climate change has generated the greatest alarm in recent years, other global problems-desertification, toxic pollution, species extinctions, drought, and deforestation, to name just a few-loom close behind. The scope of the most pressing environmental problems far exceeds the capacity of individual nation-states, much less smaller political entities. To compound these problems, economic globalization, the growth of non-governmental activist groups, and the accelerating flow of information have fundamentally transformed the geopolitical landscape. Despite the new urgency of these challenges, however, they are not without historical precedent. As this book shows, nation-states have long sought agreements to manage migratory wildlife, just as they have negotiated conventions governing the exploitation of rivers and other bodies of water. Similarly, nation-states have long attempted to control resources beyond their borders, to impose their standards of proper environmental exploitation on others, and to draw on expertise developed elsewhere to cope with environmental problems at home. This collection examines this little-understood history, providing case studies and context to inform ongoing debates.

In 1983, anthropologist Richard Pace began his fieldwork in the Amazonian community of Gurupá one year after the first few television sets arrived. On a nightly basis, as the community's electricity was turned on, he observed crowds of people lining up outside open windows or doors of the few homes possessing TV sets, intent on catching a glimpse of this fascinating novelty. Stoic, mute, and completely absorbed, they stood for hours contemplating every message and image presented. So begins the cultural turning point that is the basis of Amazon Town TV, a

rich analysis of Gurupá in the decades during and following the spread of television. Pace worked with sociologist Brian Hinote to explore the sociocultural implications of television's introduction in this community long isolated by geographic and communication barriers. They explore how viewers change their daily routines to watch the medium; how viewers accept, miss, ignore, negotiate, and resist media messages; and how television's influence works within the local cultural context to modify social identities, consumption patterns, and worldviews.

The E-Myth Manager HarperBusiness

More than ten years after his first bestselling book, *The E-Myth*, changed the lives of hundreds of thousands of small business owners, Michael Gerber—entrepreneur, author, and speaker

extraordinaire—res the next salvo in his highly successful E-Myth Revolution. Drawing on lessons learned from working with more than 15,000 small, medium-sized, and very large organisations, Gerber has discovered the truth behind why management doesn't work and what to do about it. Unearthing the arbitrary origins of commonly held doctrines such as the omniscience of leader (Emperor) and the most widely embraced myth of all—the E-Myth Manager offers a fresh, provocative alternative to management as we know it. It explores why every manager must take charge of his own life, reconcile his own personal vision with that of the organisation, and develop an entrepreneurial mind-set to achieve true success.
