Darvas System for Over the Counter Profits John Wiley & Sons

Explains the workings of the New York Stock Exchange and describes a system for making money through investment in stocks

Trend Following McGraw Hill Professional
Nicolas Darvas, author of the phenomenal best-seller, *How I Made \$2,000,000 In The Stock Market*, has devised a breakthrough system for charting the stock market. Called the DAR-CARD, it is easy to use and has the all-important ingredient that existing systems lack: DAR-CARD needs no interpretation. The philosopher's stone of the stock market, DAR-CARD converts data into profits. It eliminates confusing fluctuations and indicates the trend and the buy and sell points—the factors that matter if you want to make money. DAR-CARD is a compact, visual representation of Nicolas Darvas's system; a simple device to be carried in the pocket, to be checked against each day's closing prices. No bigger than a postcard, DAR-CARD contains its own built-in instructions and all the information necessary to make a

decision on whether to buy, sell or hold. In addition to providing this unique tool for dealing with the stock market, Darvas offers straightforward advice on: when to buy; what shall I watch for; five ways to create favorable odds; how to detect a must sale; how long to hold a stock; pitfalls of switching; what to look for before taking action.

Hungarian by birth, Nicolas Darvas trained as an economist at the University of Budapest. Reluctant to remain in Hungary until either the Nazis or the Soviets took over, he fled at the age of 23 with a forged exit visa and fifty pounds sterling to stave off hunger in Istanbul, Turkey. During his off hours as a dancer, he read some 200 books on the market and the great speculators, spending as much as eight hours a day studying. Darvas invested his money into a couple of stocks that had been hitting their 52-week high. He was utterly surprised that the stocks continued to rise and subsequently sold them to make a large profit. His main source of stock selection was *Barron's Magazine*. At the age of 39, after accumulating his

fortune, Darvas documented his techniques in the book, *How I Made 2,000,000 in the Stock Market*. The book describes his unique "Box System", which he used to buy and sell stocks. Darvas' book remains a classic stock market text to this day.

A step-by-step system for mastering trading psychology. Think about your most costly and recurring trading mistakes. Chances are that they're related to common errors, such as chasing price, cutting winners short, forcing mediocre trades, and overtrading. You've likely tried to fix these errors by improving your technical skills, and yet they persist. That's because the real source of these mistakes is not technical—they actually stem from greed, fear, anger, or problems with confidence and discipline. If you are like most traders, you probably overlook or misunderstand mental and emotional obstacles. Or worse, you might think you know how to manage them, but you don't, and end up losing control at the worst possible time. You're leaving too much

money on the table, which will either prevent you from being profitable or realizing your potential. While many trading psychology books offer sound advice, they don't show you how to do the necessary work. That's why you haven't solved the problems hurting your performance. With straight talk and practical solutions, Jared Tendler brings a new voice to trading psychology. In *The Mental Game of Trading*, he busts myths about emotions, greed, and discipline, and shows you how to look past the obvious to identify the real reasons you're struggling. This book is different from anything else on the market. You'll get a step-by-step system for discovering the cause of your problems and eliminating them once and for all. And through real stories of traders from around the world who have successfully used Tendler's system, you'll learn how to tackle your problems, improve your day-to-day performance, and increase your profits. Whether you're an independent or institutional trader, and regardless of whether you trade equities, forex, or cryptocurrencies, you can use this system to improve your decision-making and execution. Finally, you have a

way to reach your potential as a trader. Now's the time to make it happen.

Jim Paul's meteoric rise took him from a small town in Northern Kentucky to governor of the Chicago Mercantile Exchange, yet he lost it all--his fortune, his reputation, and his job--in one fatal attack of excessive economic hubris. In this honest, frank analysis, Paul and Brendan Moynihan revisit the events that led to Paul's disastrous decision and examine the psychological factors behind bad financial practices in several economic sectors. This book--winner of a 2014 Axiom Business Book award gold medal--begins with the unbroken string of successes that helped Paul achieve a jet-setting lifestyle and land a key spot with the Chicago Mercantile Exchange. It then describes the circumstances leading up to Paul's \$1.6 million loss and the essential lessons he learned from it--primarily that, although there are as many ways to make money in the markets as there are people

participating in them, all losses come from the same few sources. Investors lose money in the markets either because of errors in their analysis or because of psychological barriers preventing the application of analysis. While all analytical methods have some validity and make allowances for instances in which they do not work, psychological factors can keep an investor in a losing position, causing him to abandon one method for another in order to rationalize the decisions already made. Paul and Moynihan's cautionary tale includes strategies for avoiding loss tied to a simple framework for understanding, accepting, and dodging the dangers of investing, trading, and speculating.

How I Made 2,00,000 In The Stock Market
Nicholas Darvas, author of How I Made

2,000,000 in the Stock Market, concluded that Wall Street was nothing more than a huge gambling casino. It bristled with dealers, croupiers and touts--and he explained all of this in a later highly successful book, *Wall Street: The Other Las Vegas. How I Made 2,000,000 in the Stock Market* is an extraordinary book. It tells one of the most unusual success stories in the history of the stock market. Darvas was not a stock market professional trading on inside information. He was one half of the highest paid dance team in show business. Ye he was able to make himself a millionaire several times over by his unique investment approach. Unlike other so--called systems, it worked regardless of whether the market rose or fell. When news of Darvas' fantastic profits and methods leaked out, he was featured in *Time Magazine*. He then was persuaded to write a book which became an instant hit, selling nearly 200,00 copies in eight weeks. Many of the companies talked about in this book no longer exist. Many of the stocks are no longer traded. Nevertheless, the basic principles are as sound as ever.

Livermore started trading in securities when he was fourteen years old. He made his first thousand when a mere boy. He has practiced every device known to the active speculator, studied every speculative theory, and dealt in about every active security listed on the New York Stock Exchange. He has piled up gigantic fortunes from his commitments, lost them, digested, started all over again—and piled up new fortunes. He has changed his market position in the twinkling of an eye—sold out thousands of shares of long stock, and gone short of thousands of shares more on a decision which required reading only the one word, “but,” in a lengthy ticker statement. If his later experiences were not enough to catch the public fancy, Livermore would have won it by his greatest feat of all: beating the bucket shops. Beating the cheaters, in fact, was Livermore’s pet plan after things had gone against him and he was forced to start anew on a small-lot basis.

Do you ever think the stories you hear about great trading, and the gains produced, sound like luck? Do you ever wonder if there is a real method and philosophy behind the success stories? The concepts condensed into Trend Commandments were gleaned from Michael Covel's 15 years of pulling back the curtain on great trend following traders. It is a one of a kind money making experience that forever lays to rest the notion that successful trading is akin to winning the lottery. Winning has a formula, as does losing. Michael Covel nails both head on. Getting rich is a fight; make no mistake about it, but at least now with Trend Commandments you have a primer that allows you to crack the code of the winners.
