SHEPPARD KRUEGER

Ballantine Books
It's the night of the Yellow Puff-Ball Mushroom Cloud and a mysterious yellow fog is making its way across America, sowing chaos in its path. Mt. Fuji has erupted. The Euphrates has run dry. The White House is under attack by giant bears, the President is missing, and the Vice President has turned into a Bichon Frisé. It's Apocalypse Time, my friends. Soon the Beast will rise. And six unlikely women will make the perilous journey to the Pit of Nethalem, where they will stop the Beast from fulfilling his evil purpose, or die trying. The Book of Dog is a satire of startling originality: a tale of politics, religion, demon possession, motherhood, love, betrayal, and easygoing bestiality. A ridiculously plausible story set in a near-future America, it wryly explores

how even the most insignificant and powerless of people, when working together, can change the world for the better.

*NEW KNOWLEDGE OF
DOG BEHAVIOR* Dogwise
Publishing

When a race of elegant, superintelligent dogs arrives in twenty-first-century New York, they become instant celebrities, but, unable to adjust to the modern world and confronted with an incurable disease, they construct a fantastic castle and barricade themselves inside.

The First Domestication
Elsevier

Heartwarming and profound, this account of one writer's relationship with his beloved German Shepherd is "one of the bonafide dog-lit classics" (New Yorker) The distinguished British man of letters J. R. Ackerley hardly thought of himself as a dog lover when, well into middle age, he came into possession of a German Shepherd. To his surprise, she turned out to be the love of his life, the "ideal friend" he had been searching for in vain for

years. My Dog Tulip is a bittersweet retrospective account of their sixteen-year companionship, as well as a profound and subtle meditation on the strangeness that lies at the heart of all relationships. In vivid and sometimes startling detail, Ackerley tells of Tulip's often erratic behavior and very canine tastes, and of his own fumbling but determined efforts to ensure for her an existence of perfect happiness. My Dog Tulip was adapted for the screen as a major animated feature film with a cast that includes the voices of Christopher Plummer, Lynn Redgrave, and Isabella Rossellini. Heralded as "a stroke of genius" by New York Magazine and "the love story of the year" by Vanity Fair, it is a masterpiece of animal literature that is sure to touch the hearts of anyone who has found companionship with their own four-legged friend. Dominance in Dogs Dogwise Publishing
As an unabashed dog lover, Alexandra Horowitz is naturally curious about

what her dog thinks and what she knows. As a cognitive scientist she is intent on understanding the minds of animals who cannot say what they know or feel. This is a fresh look at the world of dogs -- from the dog's point of view. The book introduces the reader to the science of the dog -- their perceptual and cognitive Abilities -- and uses that introduction to draw a picture of what it might be like to be a dog. It answers questions no other dog book can -- such as: What is a dog's sense of time? Does she miss me? Want friends? Know when she's been bad? Horowitz's journey, and the insights she uncovered from studying her own dog, Pumpnickel, allowed her to understand her dog better, and appreciate her more through that understanding. The reader will be able to do the same with their own dog. This is not another dog training book. Instead, Inside of a Dog will allow dog owners to look at their pets' behaviour in a different, and revealing light, enabling them to understand their dogs and enjoy their relationship even more.

Fishing Dogs

HarperCollins

A poignant and beautiful debut novel explores a man's quest to unravel the mystery of his wife's death with the help of the only witness -- their Rhodesian ridgeback, Lorelei.

The Social Dog Houghton Mifflin Harcourt

In this classic work of developmental psychology, renowned psychiatrist and the coauthor of the #1 New York Times bestseller *What Happened to You?* reveals how trauma affects children—and outlines the path to recovery "Fascinating and upbeat...Dr. Perry is both a world-class creative scientist and a compassionate therapist."—Mary Pipher, PhD, author of *Reviving Ophelia* How does trauma affect a child's mind—and how can that mind recover? Child psychiatrist Dr. Bruce D. Perry has helped children faced with unimaginable horror: genocide survivors, murder witnesses, kidnapped teenagers, and victims of family violence. In the classic *The Boy Who Was Raised as a Dog*, Dr. Perry tells their stories of trauma and transformation and shares their lessons of courage, humanity, and hope.

Deftly combining unforgettable case histories with his own compassionate, insightful strategies for rehabilitation, Perry explains what happens to children's brains when they are exposed to extreme stress—and reveals the unexpected measures that can be taken to ease such pain and help them grow into healthy adults. Only when we understand the science of the mind and the power of love and nurturing can we hope to heal the spirit of even the most wounded child.

Soul Dog Dogs

A pioneering canine behaviorist draws on cutting-edge research to show that a single, simple trait—the capacity to love—is what makes dogs such perfect companions for humans, and explains how we can better reciprocate their affection. "Lively and fascinating . . . The reader comes away cheered, better informed, and with a new and deeper appreciation for our amazing canine companions and their enormous capacity for love." —Cat Warren, New York Times best-selling author of *What the Dog Knows* Does your dog love you? Every dog lover knows the feeling. The

nuzzle of a dog's nose, the warmth of them lying at our feet, even their whining when they want to get up on the bed. It really seems like our dogs love us, too. But for years, scientists have resisted that conclusion, warning against anthropomorphizing our pets. Enter Clive Wynne, a pioneering canine behaviorist whose research is helping to usher in a new era: one in which love, not intelligence or submissiveness, is at the heart of the human-canine relationship. Drawing on cutting-edge studies from his lab and others around the world, Wynne shows that affection is the very essence of dogs, from their faces and tails to their brains, hormones, even DNA. This scientific revolution is revealing more about dogs' unique origins, behavior, needs, and hidden depths than we ever imagined possible. A humane, illuminating book, *Dog Is Love* is essential reading for anyone who has ever loved a dog—and experienced the wonder of being loved back. *Remember Me?* Basic Books
 “Change loves me, defines and stalks me like

a laser-guided smart bomb. It comes at me in all forms, suddenly and with enormous impact, from making shifts in work to having and raising a kid to buying a cabin on a distant mountaintop. Sometimes, change comes on four legs.” In his popular and widely praised *Running to the Mountain*, Jon Katz wrote of the strength and support he found in the massive forms of his two yellow Labrador retrievers, Julius and Stanley. When the Labs were six and seven, a breeder who'd read his book contacted Katz to say she had a dog that was meant for him—a two-year-old border collie named Devon, well bred but high-strung and homeless. Katz already had a full canine complement, but instinct overruled reason, and soon thereafter he brought Devon home. *A Dog Year: Twelve Months, Four Dogs, and Me* is the story of how Devon and Jon—and Julius and Stanley—came to terms with each other. It shows how a man discovered a lot about himself through one dog (and then another) whose temperament seemed as different from his own as day is from night. It is a

story of trust and understanding, of life and death, of continuity and change. It is by turns insightful, hilarious, and deeply moving. **BONUS:** This edition contains an excerpt from Jon Katz's *Going Home*. **The Book of Dog** Simon and Schuster
 This is the first book to collate and synthesize the recent burgeoning primary research literature on dog behaviour, evolution, and cognition. The author presents a new ecological approach to the understanding of dog behaviour, demonstrating how dogs can be the subject of rigorous and productive scientific study without the need to confine them to a laboratory environment. This second, fully updated edition of *Dog Behaviour, Evolution and Cognition* starts with an overview of the conceptual and methodological issues associated with the study of the dog, followed by a brief description of their role in human society. An evolutionary perspective is then introduced with a summary of current research into the process of domestication. The central part of the book is devoted to issues relating to the cognitive aspects of

behaviour which have received particular attention in recent years from both psychologists and ethologists. The book's final chapters introduce the reader to many novel approaches to dog behaviour, set in the context of behavioural development and genetics. This second edition recognises and discusses the fact that dogs are increasingly being used as model organisms for studying aspects of human biology, such as genetic diseases and ageing. Specific attention is also given in this edition to attachment behaviour which emerges between humans and dogs, the importance of inter-specific communication in the success of dogs in human communities and the broad aspects of social cognition and how this may contribute to human-dog cooperation. Directions for future research are highlighted throughout the text which also incorporates links to human and primate research by drawing on homologies and analogies in both evolution and behaviour. The book will therefore be of relevance and use to anyone with an interest in behavioural ecology including

graduate students of animal behaviour and cognition, as well as a more general audience of dog enthusiasts, biologists, psychologists, veterinarians, and sociologists.

A Dog Year Simon and Schuster

Dogs Simon and Schuster

The Intelligence of Dogs Simon and Schuster

The perfect gift for dog lovers and readers of

Inside of a Dog by Alexandra Horowitz—this New York Times bestseller offers mesmerizing insights into the thoughts and lives of our smartest and most beloved pets.

Does your dog feel guilt? Is she pretending she can't hear you? Does she want affection—or just your sandwich? In their New York Times

bestselling book *The Genius of Dogs*, husband and wife team Brian Hare and Vanessa Woods lay out landmark discoveries from the Duke Canine Cognition Center and other research facilities around the world to reveal how your dog thinks and how we humans can have even deeper relationships with our best four-legged friends. Breakthroughs in cognitive science have proven dogs have a kind of genius for getting along with people that is unique

in the animal kingdom. This dog genius revolution is transforming how we live and work with dogs of all breeds, and what it means for you in your daily life with your canine friend.

The Curious Incident of the Dog in the Night-Time

Howell Book House

A riveting look at how dog and humans became best friends, and the first history of dog

domestication to include insights from indigenous peoples In this fascinating book, Raymond Pierotti and Brandy Fogg change the narrative about how wolves became dogs and in turn, humanity's best friend. Rather than describe how people mastered and tamed an aggressive, dangerous species, the authors describe coevolution and mutualism. Wolves, particularly ones shunned by their packs, most likely initiated the relationship with Paleolithic humans, forming bonds built on mutually recognized skills and emotional capacity. This interdisciplinary study draws on sources from evolutionary biology as well as tribal and indigenous histories to produce an intelligent, insightful, and often unexpected story of cooperative hunting,

wolves protecting camps, and wolf-human companionship. This fascinating assessment is a must-read for anyone interested in human evolution, ecology, animal behavior, anthropology, and the history of canine domestication.

Designer Dogs: An Exposé
Villard

Stephen Budiansky holds that virtually everything previously written about dogs is either wrong or misguided. Instead he maintains that to understand the true nature of dogs we need to stop interpreting their behaviour in the human terms of loyalty and betrayal. The truth is far more complex and surprising. The Dog Genome Project is currently laying the groundwork for identifying the genetic basis of why our dogs behave in the way they do. Other research investigates canine intelligence, and some remarkable experiments reveal what dogs can and cannot see. Budiansky brings together the disciplines of behavioural science, genetics, neuroscience and archaeology to show us how wrong we have been about man's best friend.

Dogs Basic Books

Two canine ethnologists probe the nature versus nurture debate in the social order of dogs, tracing the origins of canine intelligence.

How Dogs Work Simon and Schuster

NEW YORK TIMES

BESTSELLER They met

over their dogs. Gail Caldwell and Caroline Knapp (author of *Drinking: A Love Story*) became best friends, talking about everything from their love of books and their shared history of a struggle with alcohol to their relationships with men.

Walking the woods of New England and rowing on the Charles River, these two private, self-reliant women created an attachment more profound than either of them could ever have foreseen. Then, several years into this remarkable connection, Knapp was diagnosed with cancer.

With her signature exquisite prose, Caldwell mines the deepest levels of devotion, and courage in this gorgeous memoir about treasuring a best friend, and coming of age in midlife. Let's Take the Long Way Home is a celebration of the profound transformations that come from intimate connection—and it affirms, once again, why

Gail Caldwell is

recognized as one of our bravest and most honest literary voices.

The Secret History of

Kindness: Learning from

How Dogs Learn Penguin

Combining heroic stories of dogs with the latest scientific and psychological information, this book has provoked controversy with its lists that rank more than 100 breeds and its exciting new insights into the thoughts, emotions, and inner lives of dogs.

The 100 Silliest Things

People Say about Dogs

Dogwise Publishing

The most thought provoking book ever written on dog behavior and training Generations of dogs have been labeled training-lemons for requiring actual motivation when all along they were perfectly normal. Numerous other completely and utterly normal dogs have been branded as canine misfits simply because they grew up to act like dogs.

Barking, chewing, sniffing, licking, jumping up and occasionally, (just like people), having

arguments, is as normal and natural for dogs as wagging tails and burying bones. However, all dogs need to be taught how to modify their normal and natural behaviors to adjust to human culture. Sadly, all too often, when the dog's way of life conflicts with human rules and standards, many dogs are discarded and summarily put to death. That's quite the Culture Clash. Simply, the best dog book I have ever read! The Culture Clash is utterly unique, fascinating to the extreme and literally overflowing with oodles of useful, how-to information. Jean Donaldson's refreshing new perspective on the relationship between people and dogs had redefined the state of the art of dog-friendly dog training. Dr. Ian Dunbar, Founder of the Association of Pet Dog Trainers

What Is a Dog? Farrar, Straus & Giroux
An intimate, surprising look at man's best friend and what the leading philosophies of dog training teach us about ourselves. Years back, Melissa Holbrook Pierson brought home a border collie named Mercy, without a clue of how to get her to behave. Stunned after hiring a trainer whose immediate rapport with Mercy seemed magical, Pierson began delving into the techniques of positive reinforcement. She made her way to B. F. Skinner, the behavioral psychologist who started it all, the man who could train a pigeon to dance in minutes and whose research on how behavior is acquired has ramifications for military dolphin trainers, athletes, dancers, and, as he originally conceived, society at large. To learn

more, Pierson met with a host of fascinating animal behaviorists, going behind the scenes to witness the relationships between trainers and animals at the National Zoo in Washington, DC, and to the in-depth seminars at a Clicker Expo where all the dogs but hers seemed to be learning new tricks. The often startling story of what became of a pathbreaking scientist's work is interwoven with a more personal tale of how to understand the foreign species with whom we are privileged to live. Pierson draws surprising connections in her exploration of how kindness works to motivate all animals, including the human one. [A Three Dog Life](#) Lulu.com
Author Abigail Thomas shares the story of how she started a new life after an accident left her husband brain damaged and institutionalized.
