This book is a collection of
selected papers presented
at the First Congress on
Intelligent Systems (CIS

2020), held in New Delhi,
India during September 5
- 6, 2020. It includes
novel and innovative work
from experts,
practitioners, scientists
and decision-makers from
academia and industry. It
covers topics such as
Internet of Things,
information security,
embedded systems, real-

time systems, cloud
computing, big data
analysis, quantum
computing, automation
systems, bio-inspired
intelligence, cognitive
systems, cyber physical
systems, data analytics,
data/web mining, data
science, intelligence for
security, intelligent
decision making systems,

intelligent information processing, intelligent transportation, artificial intelligence for machine vision, imaging sensors technology, image segmentation, convolutional neural network, image/video classification, soft computing for machine vision, pattern recognition, human computer interaction, robotic devices and systems, autonomous vehicles, intelligent control systems, human motor control, game playing, evolutionary

algorithms, swarm optimization, neural network, deep learning, supervised learning, unsupervised learning, fuzzy logic, rough sets, computational optimization, and neuro fuzzy systems.

Machine Learning, Image Processing, Network Security and Data Sciences AJAY KUMAR CHOWDHARY

The story begins in the city of Bhubaneswar where Sumit (the main male character) came for his engineering in the reputed college of Bhubaneswar. There he met with the other three guys and they became good friends. Sumit was very much obsessed with

his looks and he had a few fail relationships earlier in his life. He was desperate to come into a relationship and he met Shuili (main female character) on Facebook. They started talking to each other through Facebook and Shuili fall in love with Sumit. Shuili is from Kolkata and she is elder than Sumit. She is a biology teacher who was working in a school. Shuili always dreams about a boy who comes to her and takes her with him to some other world. When she gets to know Sumit,

she believed that Sumit is the guy whom she dreams of every night. But there is a twist in the story, a tale of betrayal, a love story which will insist you to think what will be the scenario IF I DIE TOMORROW. Find out what happened to Sumit's and Shuili's relationship and experience a romantic and emotional at the same time.

Fairy Candles is a semester book comprising

10 books for classes 1 to 5, 2 books per class. The subjects covered are English, Mathematics, Environmental Science (in classes 1 and 2), Science and Social Science (in classes 3- to 5), and General Knowledge. The content is in lucid language for an easy understanding of the learner it adheres to the National Curriculum Framework 2023. The books imbibe the principles of interactive and experiential teaching-learning experience and are focused on reducing

the burden of the students.

This book constitutes the
refereed proceedings of
the Third International
Conference on Machine
Learning, Image
Processing, Network
Security and Data
Sciences, MIND 2021. The
papers are organized
according to the following
topical sections: data
science and big data;
image processing and
computer vision; machine
learning and
computational
intelligence; network and
cybersecurity. This book
aims to develop an

understanding of image processing, networks, and data modeling by using various machine learning algorithms for a wide range of real-world applications. In addition to providing basic principles of data processing, this book teaches standard models and algorithms for data and image analysis. *Xam Success Economics Class - 12 According to NEP 2020* Springer Nature Paper-I Statistics for Economics UNIT - I 1. (Based on 2nd Sep CBSE Sample Paper 2021) SBPD Publications

The purpose of this book, first published in 1982, is to probe the nature of the state in India and the role played by it in the evolution of the social economy, particularly in the growth of industry. In fact, the problematic of the state and its relationship with socio-economic progression or regression is a dialectic process. What this book does is attempt to unravel this dialectic, by following the theory and method of

Maxism.

The State, Industrialization and Class Formations in

India Saraswati House Pvt Ltd

This two-volume book provides an insight into the 10th International Conference on Soft Computing for Problem Solving (SocProS 2020). This international conference is a joint technical collaboration of Soft Computing Research Society and Indian Institute of Technology Indore. The book presents the latest achievements

and innovations in the interdisciplinary areas of soft computing. It brings together the researchers, engineers and practitioners to discuss thought-provoking developments and challenges, in order to select potential future directions. It covers original research papers in the areas including but not limited to algorithms (artificial immune system, artificial neural network, genetic algorithm, genetic programming and particle swarm optimization) and applications (control

systems, data mining and clustering, finance, weather forecasting, game theory, business and forecasting applications). The book will be beneficial for young as well as experienced researchers dealing across complex and intricate real-world problems for which finding a solution by traditional methods is a difficult task. The End of Karma: Hope and Fury Among India's Young Educart A legendary language learning course undoubtedly! Rapidex

English Speaking Course is the only speaking course of its kind whose features can be described in superlative degree only. It has already benefited millions of readers across the country. Experts have unanimously declared it as the best self-study course. Perhaps that is the reason that for over 15 years it has constantly been on the top of the best sellers list in the market. What is the secret of its great popularity? Maybe, a no-nonsense down-to-earth approach

and a very scientific methodology that takes into its account the special requirements of Indian learners. In any case it is not just another crash course that begins with a bang but ends with a whimper. Rather its contents and subject matters have been specially designed to help a common man achieve maximum command on the language in a very short time. The most important part of this self-study course is confidence building measures

because it has been found from the long experience that biggest problem in the path of fluently speaking a foreign language is hesitation, that arises out of lack of confidence. Many people, who have good command over the language and are well aware of its grammar and composition, can't speak the language fluently. Why? The answer is simple. While speaking they try to construct a sentence in their mother language and do the mental translation before uttering a single line. This

creates not only confusion but utter chaos in their mind. As a result they feel great hesitation to speak simple sentences. In some cases, however, the problem is more complex, as they lack the basic knowledge of the English language. Rapidex English Speaking Course takes care of both the cases. So, what are you waiting for? Go ahead and discover the secret of fluency in English speaking. Explore and develop your hidden potential and face the world with a new-found confidence and

smartness. Only the sky should be your limit. No matter which language you know or speak, be it Hindi, Marathi, Gujarati, Tamil, Telegu, Assami, Oriya, Kannad, Punjabi, Bengali, Nepali or Urdu, with the help of this book English will no more be a foreign language for you. A must for every Indian home. #v&spublishers

 Protection for intellectual
 property has never been
 absolute; it has always
 been limited in the public
 interest. The benefits of
 intellectual property
 protection are meant to
 flow to everyone, not just
 a limited population of
 creators and the
 corporations that
 represent them. Given
 this social-utility function,
 intellectual property
 regimes must address
 issues of access,

inclusion, and empowerment for marginalized and excluded groups. This handbook defines an approach to considering social justice in intellectual property law and regulation. Top scholars in the field offer surveys of social justice implementation in patents, copyright, trademarks, trade secrets, rights of publicity, and other major IP areas. Chapters define Intellectual Property Social Justice theory and include recommendations

for reforming aspects of IP law and administration to further social justice by providing better access, more inclusion, and greater empowerment to marginalized groups. *Fairy Candles Class-5 Semester 2 SBPD Publications* A legendary language learning course undoubtedly!
