Borrow Springer Nature
 The University of North Georgia Press and Affordable Learning Georgia bring you Principles of Financial Accounting. Well-written and straightforward, Principles of Financial Accounting is a needed contribution to open source pedagogy in the business education world. Written in order to directly meet the needs of her students, this textbook developed from Dr.

Christine Jonick's years of teaching and commitment to effective pedagogy. Features: Peer reviewed by academic professionals and tested by students Over 100 charts and graphs Instructional exercises appearing both in-text and for Excel Resources for student professional development
List of the Bills, Reports, Estimates and Accounts and Papers Printed by Order of the House of Commons and of the Papers Presented by Command National Academies Press
 The text and images in this book are in grayscale. A hardback color version is available. Search for ISBN 9781680922929. Principles of Accounting is designed to meet the scope and sequence requirements of a two-semester accounting course that covers the

fundamentals of financial and managerial accounting. This book is specifically designed to appeal to both accounting and non-accounting majors, exposing students to the core concepts of accounting in familiar ways to build a strong foundation that can be applied across business fields. Each chapter opens with a relatable real-life scenario for today's college student. Thoughtfully designed examples are presented throughout each chapter, allowing students to build on emerging accounting knowledge. Concepts are further reinforced through applicable connections to more detailed business processes. Students are immersed in the "why" as well as the "how" aspects of accounting in order to reinforce concepts and promote comprehension over rote memorization.

Audits provide essential accountability and transparency over government programs. Given the current challenges facing governments and their programs, the oversight provided through auditing is more critical than ever. Government auditing provides the objective analysis and information needed to make the decisions necessary to help create a better future. The professional standards presented in this 2018 revision of Government Auditing Standards (known as the Yellow Book) provide a framework for performing high-quality audit work with competence, integrity, objectivity, and independence to provide accountability and to help improve government operations and services. These standards, commonly referred to as generally accepted government auditing standards (GAGAS), provide the foundation for government auditors to lead by example in the areas of independence, transparency, accountability, and quality through the audit process. This revision contains major changes from, and supersedes, the 2011 revision.

Study & Master Accounting was developed with the help of practising teachers, and covers all the requirements of the National Curriculum Statement for accounting.

Sessional Papers of the Dominion of Canada Princeton University Press
MCM conducted a survey in December 2010 to take stock of international experiences with financial stability and the evolving macroprudential policy framework. The survey was designed to seek information in three broad areas: the institutional setup for macroprudential

policy, the analytical approach to systemic risk monitoring, and the macroprudential policy toolkit. The survey was sent to 63 countries and the European Central Bank (ECB), including all countries in the G-20 and those subject to mandatory Financial Sector Assessment Programs (FSAPs). The target list is designed to cover a broad range of jurisdictions in all regions, but more weight is given to economies that are systemically important (see Annex for details). The response rate is 80 percent. This note provides a summary of the survey's main findings.

This proceedings book gathers selected papers that were submitted to the 2020 International Conference on Comprehensible Science (ICCS 2020) that aims to make available the discussion and the publication of papers on all aspects of single and multi-disciplinary research on Conference topics. ICCS 2020 held on October 30–31, 2020. An important characteristic feature of Conference is the short publication time and world-wide distribution. Written by respected researchers, the book covers a range of innovative topics related to: Big Data & Data Mining; Business, Finance & Accounting & Statistics; COVID-19 Impact; Educational Technologies; Innovative Applied Sciences; Innovative Economics; Management Technologies & Systems; Media Technologies; Physical & Material Sciences; Medicine, Public Health & Rehabilitation. This book is useful for private and professional non-commercial research and classroom use (e.g. sharing the contribution by mail or in hard copy form with research colleagues for their professional non-commercial research and classroom use); for use in presentations or handouts for any level students, researchers, etc.; for the further development of authors' scientific career (e.g. by citing and attaching contributions to job or grant application).

Industrial Arts Index Edward Elgar Publishing

In this lively history of consumer debt in America, economic historian Louis Hyman demonstrates that today's problems are not as new as we think. Borrow examines how the rise of consumer borrowing—virtually unknown before the twentieth century—has altered our culture and economy. Starting in the years before the Great Depression, increased access to

money raised living standards but also introduced unforeseen risks. As lending grew more and more profitable, it displaced funds available for business borrowing, setting our economy on an unsustainable course. Told through the vivid stories of individuals and institutions affected by these changes, Borrow charts the collision of commerce and culture in twentieth-century America, giving an historical perspective on what is new—and what is not—in today's economic turmoil. The GHG Protocol Corporate Accounting and Reporting Standard helps companies and other organizations to identify, calculate, and report GHG emissions. It is designed to set the standard for accurate, complete, consistent, relevant and transparent accounting and reporting of GHG emissions.

Superfund Reauthorization and Reform Legislation

Praise for Cost of Capital, Fourth Edition

"This book is the most incisive and exhaustive treatment of this critical subject to date." —From the Foreword by Stephen P. Lamb, Esq., Partner, Paul, Weiss, Rifkind, Wharton & Garrison LLP, and former vice chancellor, Delaware Court of Chancery "Cost of Capital, Fourth Edition treats both the theory and the practical applications from the view of corporate management and investors. It contains in-depth guidance to assist corporate executives and their staffs in estimating cost of capital like no other book does. This book will serve corporate practitioners as a comprehensive reference book on this challenging topic in these most challenging economic times."

—Robert L. Parkinson Jr., Chairman and Chief Executive Office, Baxter International Inc., and former dean, School of Business Administration and Graduate School of Business, Loyola University of Chicago "Shannon Pratt and Roger Grabowski have consolidated information on both the theoretical framework and the practical applications needed by corporate executives and their staffs in estimating cost of capital in these ever-changing economic times. It provides guidance to assist corporate practitioners from the corporate management point of view. For example, the discussions on measuring debt capacity is especially timely in this changing credit market environment. The book serves corporate practitioners as a solid reference." —Franco Baseotto, Executive Vice President, Chief Financial Officer, and Treasurer, Foster Wheeler AG "When computing the cost of capital for a

firm, it can be fairly said that for every rule, there are a hundred exceptions. Shannon Pratt and Roger Grabowski should be credited with not only defining the basic rules that govern the computation of the cost of capital, but also a road map to navigate through the hundreds of exceptions. This belongs in every practitioner's collection of must-have valuation books." —Aswath Damodaran, Professor, Stern School of Business, New York University "Pratt and Grabowski have done it again. Just when you thought they couldn't possibly do a better job, they did. Cost of Capital, Fourth Edition is a terrific resource. It is without a doubt the most comprehensive book on this subject today. What really distinguishes this book from other such texts is the fact that it is easy to read—no small feat given the exhaustive and detailed research and complicated subject matter. This book makes you think hard about all the alternative views out there and helps move the valuation profession forward." —James R. Hitchner, CPA/ABV/CFF, ASA, Managing Director, Financial Valuation Advisors; CEO, Valuation Products and Services; Editor in Chief, Financial Valuation and Litigation Expert; and President, Financial Consulting Group "The Fourth Edition of Cost of Capital continues to be a 'one-stop shop' for background and current thinking on the development and uses of rates of return on capital. While it will have an appeal for a wide variety of constituents, it should serve as required reading and as a reference volume for students of finance and practitioners of business valuation. Readers will continue to find the volume to be a solid foundation for continued debate and research on the topic for many years to come." —Anthony V. Aaron, Americas Leader, Quality and Risk Management, Ernst & Young Transaction Advisory Services

Handbook of Behavioural Economics and Smart Decision-Making

Features debates selected from political and academic journals such as the Nation, Commentary, and the American prospect, the readings supply important factual context for each debate and represent the best argument from each position.

Scores of talented and dedicated people

serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

Before the twentieth century, personal debt resided on the fringes of the American economy, the province of small-time criminals and struggling merchants. By the end of the century, however, the most profitable corporations and banks in the country lent money to millions of American debtors. How did this happen? The first book to follow the history of personal debt in modern America, Debtor Nation traces the evolution of debt over the course of the twentieth century, following its transformation from fringe to mainstream--thanks to federal policy, financial innovation, and retail competition. How did banks begin making personal loans to consumers during the Great Depression? Why did the government invent mortgage-backed securities? Why was all consumer credit, not just mortgages, tax deductible until

1986? Who invented the credit card? Examining the intersection of government and business in everyday life, Louis Hyman takes the reader behind the scenes of the institutions that made modern lending possible: the halls of Congress, the boardrooms of multinationals, and the back rooms of loan sharks. America's newfound indebtedness resulted not from a culture in decline, but from changes in the larger structure of American capitalism that were created, in part, by the choices of the powerful--choices that made lending money to facilitate consumption more profitable than lending to invest in expanded production. From the origins of car financing to the creation of subprime lending, Debtor Nation presents a nuanced history of consumer credit practices in the United States and shows how little loans became big business.

The Greenhouse Gas Protocol

Among the issues discussed are the problems of the current system; proposals for the reform; and the impact of reform on the poor, women, and minorities.

Report of the Postmaster General ...

This Handbook is a unique and original contribution of over thirty chapters on behavioural economics, examining and addressing an important stream of research where the starting assumption is that decision-makers are for the most part relatively smart or rational. This particular approach is in contrast to a theme running through much contemporary work where individuals' behaviour is deemed irrational, biased, and error-prone, often due to how people are hardwired. In the smart people approach, where errors or biases occur and when social dilemmas arise, more often than not, improving the decision-making environment can repair these problems without hijacking or manipulating the preferences of decision-makers. This book covers a wide-range of themes from micro to macro, including various sub-disciplines within economics such as economic psychology, heuristics, fast and slow-thinking, neuroeconomics, experiments, the capabilities approach, institutional economics, methodology, nudging, ethics, and public policy.
