the Bible is a 155-page
paperback which
answers 100 intriguing
questions about
astronomy and
science. Written by

Grace College professor Dr. Don B. DeYoung, it is subtitled Questions and Answers. The questions range across subjects such as the earth and the moon, the solar system, the stars, galaxies and the universe, and general science. Published by BMH Books, Winona Lake, Ind., the book includes a new, helpful series of seasonal star charts for the Northern Hemisphere, along with a general and a scripture index. DeYoung, who has taught at Grace College since 1972, is known internationally for his work in creation science. He is president of the Creation Research Society and is the author of 17 books, including Pioneer Explorers of Intelligent

Design, also published by BMH books. He and his wife, Sally, are members of the Winona Lake (Ind.) Grace Brethren church. Astronomy and the Bible's question-and-answer format makes it a practical tool for the classroom and home school. About the book, Christian Retailing magazine commented, "How refreshing and rare to find an astronomy book where God's Word, not scientific theory, finds pre-eminence." Bibliotheca Sacra described the book as "Truly a veritable goldmine of easy-to-understand information about astronomy and earth history." Astronomy and the Bible Questions and Answers Astronomy and the Bible Questions and Answers

In May 2014, Pope Francis revealed that, if Martians wanted to be baptized, he would welcome aliens to the Church. Vatican astronomer Guy Consolmagno and science historian Father Paul Mueller agree! Would You Baptize an Extraterrestrial? sheds provocative light on some of the strange places where religion and science meet. So, could you really baptize an extraterrestrial? And exactly how do you reconcile the scientific version of The Big Bang with the Genesis account of creation? Is there really life after death, and will the universe eventually die? What then? Does the Vatican know something regular people don't about an

imminent end of the world? Why isn't Pluto a planet, and what did the Vatican have to do with that decision? Was the Star of Bethlehem just a pious religious story or an actual description of astronomical events? What really happened with the Church and Galileo? These questions and more will be explored in a book that will certainly shock and delight readers who love science and spirituality alike.

What the Bible Reveals About Astronomy
Image Books

The latest edition of this handbook provides answers to questions on astronomy and the universe and contains the answers to ten new questions. DeYoung explains how astronomy tells much

about God's vast creation and His daily care for us.

Then God created the Solar System

Read Books Ltd
Intended as a companion book to *The Created Cosmos: What the Bible Reveals About Astronomy*, the new book, *The Expanse of Heaven: Where Creation and Astronomy Intersect*, is a comprehensive treatment of astronomy, interpreted within the biblical model of creation. It begins with a chapter on ancient cosmologies, and concludes with a chapter on modern cosmology. In between are chapters on the appearance of astronomical bodies in the sky, discussions of the moon, the earth and other planets in

the solar system, the sun, the stars, our Milky Way Galaxy and other galaxies.

Evolutionary theories are described and critiqued, while creationary theories are explained. Evidence for design and recent origin is presented. This unique book is intended for general reading by lay audiences, but it can be adapted as a textbook on astronomy. You will learn how unique the earth is in the universe. You will see incredible design in the moon, the sun, and other astronomical bodies. You will better understand the role of evolutionary and creationary theories in astronomy today.

The Created Cosmos
Heart of Wisdom
Publishing Inc

A practical answer guide to humankind's age-old questions on planets, our universe and everything beyond and between.

Written by an L. A. County homicide detective and former atheist, *Cold-Case Christianity* examines the claims of the New Testament using the skills and strategies of a hard-to-convince criminal investigator. *Christianity* could be defined as a “cold case”: it makes a claim about an event from the distant past for which there is little forensic evidence. In *Cold-Case Christianity*, J. Warner Wallace uses his nationally recognized skills as a homicide detective to look at the evidence

and eyewitnesses behind Christian beliefs. Including gripping stories from his career and the visual techniques he developed in the courtroom, Wallace uses illustration to examine the powerful evidence that validates the claims of *Christianity*. A unique apologetic that speaks to readers’ intense interest in detective stories, *Cold-Case Christianity* inspires readers to have confidence in Christ as it prepares them to articulate the case for *Christianity*.

An Academic Excursion
ISD LLC

The Bible is certainly the most mysterious book ever created. The Scriptures are filled with hundreds of curious passages that have puzzled both Jews

and Christians for thousands of years. In this powerful, faith-building book, respected author Grant R. Jeffrey takes the reader on a journey of mystery while uncovering deep truths found in the word of God. "It is the glory of God to conceal a thing: But the honour of Kings is to search out a matter." Proverbs 25:2

Key Topics Include:

- The Mystery of "3 Days and 3 Nights" and Christ's Resurrection
- The Mystery of the Virgin Birth and the Star of Bethlehem
- The Fall of the Walls of Jericho
- Ancient Egyptian manuscript confirms the 10 plagues of Exodus
- Joshua's Long Day
- Jonah and the Great Fish
- The Mystery of the Lost Treasures of the Temple
- Why

Christians Worship on Sunday

The Copernican Question New Leaf Publishing Group

Unfortunately, modern evolutionary thinking in astronomy has caused many people to disconnect from the Bible's view of history, as they are taught that the universe is millions or even billions of years old. This book shows that the billions of evolutionary years taught in public schools are unnecessary and that one need only to look to the Creator of the Bible to explain the origin of the stars and the universe. Dr. Jason Lisle discusses and debunks popular evolutionary concepts such as the big bang and answers biblical questions like how the speed of light affects

the Bible's account of history.

What Is the Biblical Perspective? New Leaf Publishing Group
Arguably the oldest book in the Bible, the book of Job has a surprising amount to say about some of the newest scientific discoveries and controversies. Far from a book that is just about suffering, Job is filled with rich insight into both ancient and modern questions about the formation of the world the difference between animals and humans cosmology dinosaurs and the fossil record how to care for creation and more With careful consideration and exegesis, internationally known astrophysicist and Christian apologist Hugh Ross adds yet

another compelling argument to the case for the veracity of the biblical commentary on the history of the universe, Earth, life, and humanity. Hidden Treasures in the Book of Job shows that the Bible is an accurate predictor of scientific discoveries and a trustworthy source of scientific information, and that both the book of Scripture and the book of nature are consistent both internally and externally.

The Created Cosmos
New Leaf Publishing Group

"The Astronomy of the Bible" is a 1907 treatise by E. Walter Maunder that explores the various astronomical references in the Bible. This volume will appeal to those with an

interest in ancient astrology, and it is not to be missed by collectors of vintage literature of this ilk. Contents: "The Hebrew and Astronomy", "The Creation", "The Deep", "The Firmament", "The Ordinances of the Heavens", "The Sun", "The Hebrew and Astronomy", "The Creation", "The Deep", "The Firmament", "The Ordinances of the Heavens", "The Sun", etc. Edward Walter Maunder (1851 - 1928) was a British astronomer most famous for his work on sunspots and the solar magnetic cycle. His studies lead to the identification of the "Maunder Minimum", a period of time that spanned from 1645 to 1715. Other notable works by this author : "The Royal

Observatory" (1900), "Astronomy without a Telescope" (1904), "A. and E" (1910). Many vintage books such as this are becoming increasingly scarce and expensive. We are republishing this volume now in an affordable, modern, high-quality edition complete with the original text and artwork.

The Astronomy of the Bible University of California Press

Written in the genre of Henry David Thoreau's travel-thinking essays, *Jesus, History, and Mount Darwin: An Academic Excursion* is the story of a three-day climb into the Evolution Range of the High Sierra Mountains of California. Mount Darwin stands among other near-14,000-foot high

mountains that are named after promoters of religious versions of evolutionary thinking. Rick Kennedy, a history professor from a small college, uses the climb as an opportunity to think about general education and how both the natural history of evolution and the ancient history of Jesus can find a home in the Aristotelian diversity of university methods. Kennedy offers the academic foundations for the credibility and reliability of accounts of Jesus in the New Testament, while pointing out that these foundations have the same weaknesses and strengths that ancient history has in general. Natural history, Kennedy points out, has a different set of strengths and weaknesses from

ancient history. Overall, the book reminds students and professors of the wisdom in being humble.

The Heart of Wisdom Teaching Approach

Cambridge University Press

This text investigates what the Bible has to say about astronomical objects and phenomena. The Bible contains many mentions of astronomical things, beginning with creation and concluding with end-time prophecies. Besides the sun and moon, the Bible names groups of stars, Orion, the Pleiades, and the bears. In addition to what the biblical record shows about astronomical phenomena, many people think that it teaches things that it

actually does not teach. These concepts are examined in depth as well. Unique among books discussing the intersection of biblical text and astronomy because of the range of questions explored and answered definitive work that explores many popular questions and misconceptions about the universe and the Bible Sorts fact from fiction and truth from popular myths as the true purpose of these enigmatic lights in the night sky are revealed *Questinons and Answers* Image Books This text investigates what the Bible has to say about astronomical objects and phenomena. Old-Earth Creationism
on Trial New Leaf

Publishing Group As the modern Church struggles to find a place of relevancy for a new generation that already has massive demands on its time and attention, more and more young people raised in the Church are leaving it - failing to find the answers to their

questions of faith and life, beset with doubts raised by issues that the Church chooses not to address. Opting to skirt the controversy of Genesis as literal history, the biblical authority of the Holy Word is called into question and reduced to a collection of mere stories.

The Expanse of Heaven
Bmh Books

Written in the genre of Henry David Thoreau's travel-thinking essays, *Jesus, History, and Mount Darwin: An Academic Excursion* is the story of a three-day climb into the Evolution Range of the High Sierra mountains of California. Mount Darwin stands among other mountains near fourteen thousand feet high and that are named after promoters of religious versions of

evolutionary thinking. Rick Kennedy, a history professor from Point Loma, uses the climb as an opportunity to think about general education and how both the natural history of evolution and the ancient history of Jesus can find a home in the Aristotelian diversity of university methods.

Kennedy offers the academic foundations for the credibility and reliability of accounts of Jesus in the New Testament, while pointing out that these foundations have the same weaknesses and strengths that ancient history has in general. ditions of things, like the telegraph wires and their conditions.

From 1871 to 1884 the writer was in a great quandary about a name. He had a force, -

-had found a power, -- but had no name for it. What are the sun and moon and planetary force to be called? For a better answer we call it Repulsion, as proposed by Prof. Norton; and now after thirteen years we find this repulsive force to be a good, and perhaps the best name for it. Newton's force is the Centripetal Force. Smith's force is the Centrifugal Force. But let us pass on to notice the positive in Celestial Mechanics. POSITIVE POLAR ECCENTRICITIES. Why does the South Pole drop so low and the North Pole rise so high? This question is one of the philosophical questions of the centuries past, and many presumptions have been proposed. But up to 1871 it stood

in the physical sciences as one of the most profound questions. Why, oh why, these Polar Eccentricities? WE ANSWER. In answer to this absorbing and philosophical question, we would say that it is a Physical Pressure on that part of the earth's surface, and so far south of its Equator that it holds the South Pole as with an iron positive Magnetic Power. That power is the Sun's Power. THE SUN'S POWER. A New Power Discovered in the Sun. In presenting this New Discovery, we are aware that we shall antagonize the accepted theories of preceding teachers, the early conception theories of scientific inquirers, and the published statements in the text books in the

schools. To assail and to attempt to overthrow this triple wall, so to speak, may seem presumptuous; but we feel assured that our New Discovery is more than a theory -- it is to us an established fact. And if we show that it is a fact, then it is more than a Theory. Yes, a Theorem....

North Carolina Schools and Academies, 1790-1840 Springer Science & Business Media

FROM ITS CREATION BY GOD TO ITS PERFECT SIZE, DETAILS ARE REVEALED ABOUT THE MOON'S UNIQUE CONNECTION TO THE SEASON'S TIDES, ANIMAL LIFECYCLES, AND ROLE AS EARTH'S PROTECTIVE SHIELD. WELL-KNOWN AND HIGHLY RESPECTED CREATION SCIENTISTS

DON DEYOUNG AND JOHN WHITCOMB SHARE THEIR KNOWLEDGE IN AN EASY-TO-COMPREHEND FORMAT. NEWLY REVISED AND EXPANDED, THE BOOK IS A DEFINITIVE WORK ON EARTH'S CLOSEST NEIGHBOR AND ITS CONTINUING FASCINATION AMONG

EXPLORERS AND RESEARCHERS. *Astronomy in Connexion with the Bible* New Leaf Publishing Group Details the Bible-based homeschool teaching approach for parents, and discusses Christian education, learning styles, unit studies, bible study, and more.
