Cliffs AP Chemistry, 4th Edition Macmillan

The aim of this book is to introduce the use of green solvents throughout chemistry and to provide a comprehensive reference for solvents currently applicable in green chemistry. The first section covers solvents in chemical perspective, and the second section is a guide to green solvents. Overall, this volume defines characteristics of green solvents and their current usage, and explores their importance ecologically and economically. It includes a full range of commercial, industrial, and academic

green solvents, and discusses solvents in specific commercial and non-commercial practices. *Green Solvents for Chemistry* differs from other works on solvents in that only solvents for green chemistry are included along with their chemical properties and toxicological issues.

The book itself contains chapter-length subject reviews on every subject tested on the AP Chemistry exam, as well as both sample multiple-choice and free-response questions at each chapter's end. Two full-length practice tests with detailed answer explanations are included in the book.
