best prices. Fast and free shipping free returns cash on delivery available on eligible purchase. Law and the Semantic Web: Legal Ontologies, Methodologies ... One thing that I think lawyers haven't yet grasped is that the "semantic web" does NOT refer to the World Wide Web, but to ANY network. It could be something as simple as the files on your local computers.

Hook the computers together and you have a "network." Hook many computers together and you have a "web." Law and the Semantic Web - Slaw The Semantic Web is an extension of the World Wide Web through standards set by the World Wide Web Consortium. The goal of the Semantic Web is to make Internet data machine-readable. To enable the encoding of semantics

with the data, technologies such as Resource Description Framework (RDF) and Web Ontology Language (OWL) are used. These technologies are used to formally represent metadata. For example, ontology can describe concepts, relationships between entities, and categories of things.
