or equivalents shall operate in compliance with established Safety and Environmental Management Systems.

- Policy Clause 3.1 Safety and Environmental Management System

3.1. Safety and Environmental Management System - ASEMS

1. A system is a network of parts, elements, or components that interact with and influence one another.

2. Systems receive and process inputs of energy, matter, or information, and produce outputs of energy, matter, or information.

3. Systems do not have well-defined boundaries, which makes it difficult to decide where one system ends and ...

Lesson 3.2 - Systems

in Environmental Science

environmental systems. The systems approach brings transparency into the interactions of the system's parts.

Simulation tools support numerical insights into the system behavior. The idea of sustainable development is the overall goal in treating the biosphere and its parts, which takes into consideration their high complexity.
