The Cambridge Companion to Christian Doctrine Baker Academic

This new edition of Systematic Theology by Wayne Grudem is one of the most important resources for helping you understand Scripture and grow as a Christian. The most widely used resource of the last 25 years in its area, Systematic Theology has been thoroughly revised and expanded for the first time while retaining the features that have made it the standard in its field: clear explanations, an emphasis on each doctrine's scriptural basis, and practical applications to daily life. With nearly 250 pages of new content and revisions, this new edition now includes the following distinctive features: Updated analysis of recent controversies within evangelical theology, including the eternal relationship between the Father and the Son in the Trinity, the role of women in the church, miraculous gifts of the Holy Spirit, and contemporary worship music. New discussion and critiques of recent theological controversies situated outside of traditional evangelical theology, such as open theism, the "new perspective on Paul," Molinism (or "middle knowledge"), "Free Grace" theology, and the preterist view of Christ's second coming. Completely revised chapter on the clarity of Scripture. Completely revised chapter on creation and evolution, including a longer critique of theistic evolution and an extensive discussion on the age of the earth. New discussion of how biblical inerrancy applies to some specific "problem verses" in the Gospels. Additional material explaining evangelical Protestant differences with Roman Catholicism, Protestant liberalism, and Mormonism. Completely updated bibliographies. All Scripture quotations updated from RSV to ESV. Updated section on contemporary worship music. Numerous other updates and corrections. Part of the brilliance of Systematic Theology has been its simplicity and ease of use. Each chapter follows the same structure: discussion of the doctrine being considered, an explanation of that doctrine's biblical support and possible objections, followed by personal application and key terms to know for personal growth. Chapters also include a Scripture memory passage, references to other literature on the topic, and suggested hymns and worship songs. If you think theology is hard to understand or boring, then this new edition of Systematic Theology will change your mind.

The advent of the modern, historical, and critical methods of reading Scripture is one of the most significant events in the last five hundred years of Christian history and theology. New questions arose in the course of that history that led to new, sometimes troubling answers. New ways of considering Scripture were articulated. The crisis in which academic Christian theology has found itself for approximately two hundred years is directly related to the emergence of new ways of studying--and criticizing--the Bible. The Challenge of History traces the trajectory of these developments, presenting key readings from over thirty-five theologians--from Erasmus to Pannenberg--whose writings relate to the birth of modern historical and critical exegesis and, more broadly, to the emergence, among theologians and biblical scholars, of a certain historical consciousness that characterizes vast segments of modernity. How did the historical and critical methods arise? How did they impact the study of Scripture? What are their implications for Christian theology? Scripture is read--and needs to be read--differently in a parish, in a monastery, and in an academic setting. But the various ways of approaching Scripture should not be cordoned off from one another. This volume is an ideal textbook for in-depth study of one of the most important topics in modern theology.

New Dictionary of Theology Walter de Gruyter GmbH & Co KG

This book identifies the distinguishing features of fundamental theology, as distinct from philosophical theology, natural theology, apologetics, and other similar disciplines. Addressing the potential for confusion about basic Christian claims and beliefs, Gerald O'Collins sets out to relaunch fundamental theology as a discipline by presenting a coherent vision of basic theological questions

and positions that lay the ground for work in specific areas of systematic theology. Rethinking Fundamental Theology examines central theological questions: about God, human experience and, specifically, religious experience; the divine revelation coming through the history of Israel and through the life, death and resurrection of Jesus; human faith that responds to revelation; the nature of tradition that transmits the record and reality of revelation; the structure of biblical inspiration and truth, as well as basic issues concerned with the formation of the canon; the founding of the Church with some leadership structures; the relationship between Christ's revelation and the faith of those who follow other religions. O'Collins concludes with some reflections on theological method. Written with the scholarship and accessibility for which O'Collins is known and valued, this book will relaunch fundamental theology as a distinct and necessary discipline in faculties and departments of theology and religious studies around the world.

Charles Curran in his newest book The Development of Moral Theology: Five Strands, brings a unique historical and critical analysis to the five strands that differentiate Catholic moral theology from other approaches to Christian ethics--sin and the manuals of moral theology, the teaching of Thomas Aquinas and later Thomists, natural law, the role of authoritative church teaching in moral areas, and Vatican II. Significant changes have occurred over the course of these historical developments. In addition, pluralism and diversity exist even today, as illustrated, for example, in the theory of natural law proposed by Cardinal Ratzinger. In light of these realities, Curran proposes his understanding of how the strands should influence moral theology today. A concluding chapter highlights the need for a truly theological approach and calls for a significant change in the way that the papal teaching office functions today and its understanding of natural law. In a work useful to anyone who studies Catholic moral theology, The Development of Moral Theology underscores, in the light of the historical development of these strands, the importance of a truly theological and critical approach to moral theology that has significant ramifications for the life of the Catholic church.

Historical Theology Zondervan Academic

The Fourth Gospel is deeply shaped by its remarkably high Christology. It depicts the earthly Jesus, the incarnate one, as fully divine. This unrelenting Christology has led interpreters, both ancient and modern, to question the historical value of John's Gospel. For many, the Gospel is just theology. It is to the vexed relationship between history and theology that Jörg Frey turns in Theology and History in the Fourth Gospel. John's theological obsession with Christology might suggest that history counts for little in the Gospel. But, as Frey argues, the Gospel's clear and central claim is that John narrates the story of Jesus of Nazareth, his ministry, and his death, as "factual," and that this narrated "history" is foundational for the Christian message. Frey traces the Gospel's use of the available

historical tradition by chiefly drawing from Mark and the Johannine community. Even if the Gospel of John used this received witness in a remarkably free manner, replotting and renarrating traditional episodes and even creatively staging new episodes, Frey contends that the historical life and person of Jesus remain central to John's enterprise. In the end, Frey warns that Johannine interpretation will miss the intention of the Gospel and the interpretive perspective of the evangelist if it remains preoccupied merely with questions of historical accuracy. The interpretive goal is to "let John be John," and, as Frey shows, readers will always yield to the priority of theology over history in the Fourth Gospel. In John's telling of the Christ story, the significance of history lies precisely in its disclosure of theological meaning, just as the significance of the historical Jesus is only understood in the theological language of Christology.

Orthodox Dogmatic Theology A&C Black

This monograph delineates John Henry Newman's 'theology of history', which refers to his theological understanding, or 'view', of history that one finds pervading his work like a rich atmosphere. Newman's view led to his crafting of provisional theories that not only were more historically conscious, but also could support and promote revealed religion and religious epistemology in the present. This project traces these developing theories and the presuppositions on which they rested, as well as distills from them Newman's 'theological imaginary', which can be understood as his 'idea' of the church, an idea which he believed must become manifest in the world. Newman's theology of history is thus inextricably bound up with the realization of Christianity in its authentic ecclesial manifestation. This monograph highlights the import of Newman's theology of history for our own theological 'imaginaries' in the present, post-Vatican II context, ultimately developing an original 'relational-developmental model of doctrine'.

History and Theology in the Gospels B&H Publishing Group

History is one of the most important cultural tools to make sense of one's situation, to establish identity, define otherness, and explain change. This is the first systematic scholarly study that analyses the complex relationship between history and religion, taking into account religious groups both as producers of historical narratives as well as distinct topics of historiography. Coming from different disciplines, the authors of this volume ask under which conditions and with what consequences religions are historicised. How do religious groups employ historical narratives in the construction of their identities? What are the biases and elisions of current analytical and descriptive frames in the History of Religion? The volume aims at initiating a comparative historiography of religion and combines disciplinary competences of Religious Studies and the History of Religion, Confessional Theologies, History, History of Science, and Literary Studies. By applying literary comparison and historical contextualization to those texts that have been used as central documents for histories of individual religions, their historiographic themes, tools and strategies are analysed. The comparative approach addresses circum-Mediterranean and European as well as Asian religious traditions from the first millennium BCE to the present and deals with topics such as the origins of religious historiography, the practices of writing and the transformation of narratives.
