So far, we've focused on analyzing numerical data. This section focuses on data that's categorical

(e.g., with values like 'red' or 'blue' that don't have any ordering). We'll start with the case where

both the inputs and the outputs are categorical, then discuss categorical inputs with numerical

outputs. Chapter 6 Lecture 6 Categorical Data Analysis Lecture 6 Categorical Data Analysis This

views. Categorical Data Analysis Lecture September 10, 2012 This book offers a relatively self-

contained presentation of the fundamental results in categorical data analysis, which plays a central

role among the statistical techniques applied in the social, political and behavioral sciences, as well

as in marketing and medical and biological research. The methods applied are mainly aimed at

understanding the structure of associations among variables and the effects of other variables on

these interactions. Lectures on Categorical Data Analysis | Tamás Rudas | Springer Categorical Data

Linear Models — Lecture Notes. The goal of this course is to teach methods for the analysis of

discrete response data and to develop a general framework for the analysis of discrete data and

other data types for which the assumptions of the classical linear model (CLM) do not hold. Such a

framework is provided by a class of models known as generalized linear models or GLMs. STAT 8620,

Categorical Data Analysis & Generalized Linear ... The basics of categorical data analysis are covered

in Chapters 1–8. Chapter 2 surveys standard descriptive and inferential methods for contingency

tables, such as odds ratios, tests of independence, and conditional vs marginal

associations. Introduction to Categorical Data Analysis counts are categorical data. A categorical

variable is measured on a scale that is nominal (eg - religion) or ordinal (eg - diagnosis coded as

"benign", "suspicious", or "malignant"). Unit 4 (Categorical Data Analysis) is an introduction to some

basic methods for the analysis of categorical data: (1) association in a 2x2 table; (2) variation of a
