A gripping, twisty thriller from Freida McFadden, the Sunday Times bestselling author of *The Housemaid* and *The Coworker!* The guiltiest people aren't always the ones behind bars... As a new nurse practitioner at a maximum-security prison, Brooke Sullivan is taught three crucial rules: Treat all prisoners with respect. Never reveal any personal information. Never EVER become too friendly with the inmates. But nobody knows that Brooke has already broken the rules. Nobody knows about her intimate connection to Shane Nelson, one of the penitentiary's most notorious and dangerous inmates. They certainly don't know that Shane was Brooke's high school sweetheart--the star quarterback, the golden boy who's serving a life sentence for a series of grisly murders. Or that Brooke's testimony was what put him there. But Shane knows. He knows

more than anyone. And he will never forget. *The Inmate* is a propulsive, mind-bending thriller about how we define guilt--and who has to pay for it, from Sunday Times bestselling author Freida McFadden.

The SAGE Encyclopedia of Criminal Psychology will be a modern, interdisciplinary resource aimed at students and professionals interested in the intersection of psychology (e.g., social, forensic, clinical), criminal justice, sociology, and criminology. The interdisciplinary study of human behavior in legal contexts includes numerous topics on criminal behavior, criminal justice policies and legal process, crime detection and prevention, eyewitness identification, prison life, offender assessment and rehabilitation, risk assessment and management, offender mental health, community reintegration, and juvenile offending. The study of these topics has been increasing continually since the late 1800s, with people trained in many legal professions such as policing, social work, law, academia, mental health,

and corrections. This will be a comprehensive work that will provide the most current empirical information on those topics of greatest concern to students who desire to work in these fields. This encyclopedia is a unique reference work that looks at criminal behavior primarily through a scientific lens. With over 500 entries the book brings together top empirically driven researchers and clinicians across multiple fields—psychology, criminology, social work, and sociology—to explore the field.

Prison

The last place Christopher Jacobs, aka X, thought he'd find himself was behind bars. Ten years later, the boy he used to be is gone. In his place is the shell of a man with murder under his belt. Any emotion he once had was left under the gavel when he was given life in prison. That is until the new nurse in the infirmary joins the block. Putting your hands on a prison employee will get you the hole, but some things are worth their punishment, and something tells him Lyla will be worth more than he bargained for. Lyla Evans isn't sure

about her new job at a maximum security prison, but showing uncertainty and weakness isn't an option. Taking care of murders and rapist isn't ideal, but survival is key. She's warned ahead of time about a prisoner named X, but when she's attacked, it's the dangerous X that saves her. Fraternizing with the prisoners is forbidden, but sometimes the most forbidden things are the sweetest. ****WARNING**** This book is NOT for the faint of heart. Prison Time, the sequel to Hard Time, is the story of Shaun Attwood's journey through the Arizona Department of Corrections and his deportation to England. Sentenced to nine years

in Arizona's state prison for distributing Ecstasy, 'English Shaun' Attwood finds himself living among gang members, sexual predators and drug-crazed psychopaths. After being attacked by a 20-stone California biker in for stabbing a girlfriend, Shaun writes about the prisoners who befriend, protect and inspire him. They include T-Bone, a massive African American ex-Marine who risks his life saving vulnerable inmates from rape, and Two Tonys, an old-school Mafia murderer who left the corpses of his rivals from Tucson to Alaska. They teach Shaun how to turn incarceration to his advantage, and to learn from his mistakes. Resigned to living alongside violent, mentally-ill, and drug-addicted inmates, Shaun immerses himself in psychology and philosophy to try to make sense of his past behaviour, and begins applying what he learns as he adapts to prison life. Encouraged by Two Tonys to explore fiction as well, Shaun reads over a thousand books which, with support from brilliant psychotherapist Dr. O, speed along his personal development. As his ability to deflect daily

threats improves, Shaun begins to look forward to his release with optimism and a new love waiting for him. Yet the words of Aristotle from one of Shaun's books will prove prophetic: 'We cannot learn without pain'.

A stunning account of life behind bars at the federal penitentiary in

Leavenworth, Kansas, where the nation's hardest criminals do hard time. "A page-turner, as compelling and evocative as the finest novel. The best book on prison I've ever read."—Jonathan

Kellerman The most dreaded facility in the prison system because of its fierce population, Leavenworth is governed by ruthless clans competing for dominance.

Among the "star" players in these pages: Carl Cletus Bowles, the sexual predator with a talent for murder; Dallas Scott, a gang member who has spent almost thirty of his forty-two years behind bars; indomitable Warden Robert Matthews, who put his shoulder against his prison's grim reality; Thomas Silverstein, a sociopath confined in "no human contact" status since 1983; "tough cop" guard Eddie Geouge, the

only officer in the penitentiary with the authority to sentence an inmate to “the Hole”; and William Post, a bank robber with a criminal record going back to when he was eight years old—and known as the “Catman” for his devoted care of the cats who live inside the prison walls. Pete Earley, celebrated reporter and author of *Family of Spies*, all but lived for nearly two years inside the primordial world of Leavenworth, where he conducted hundreds of interviews. Out of this unique, extraordinary access comes the riveting story of what life is actually like in the oldest maximum-security prison in the country. Praise for *The Hot House* “Reporting at its very finest.”—Los Angeles Times “The book is a large act of courage, its subject an important one, and . . . Earley does it justice.”—The Washington Post Book World “[A] riveting, fiercely unsentimental book . . . To [Earley’s] credit, he does not romanticize the keepers or the criminals. His cool and concise prose style serves him well. . . . This is a gutsy book.”—Chicago Tribune “Harrowing . . . an

exceptional work of journalism.”—Detroit Free Press “If you’re going to read any book about prison, *The Hot House* is the one. . . . It is the most realistic, unbuffed account of prison anywhere in print.”—Kansas City Star “A superb piece of reporting.”—Tom Clancy *A Grip of Time* American Psychiatric Pub A new and updated version of this best-selling resource! As a leader in teaching, training, and transforming boys in Detroit, Jason Wilson shares his own story of discovering what it means to "be a man" in this life-changing memoir. His grandfather's lynching

in the deep South, the murders of his two older brothers, and his verbally harsh and absent father all worked together to form Jason Wilson's childhood. But it was his decision to acknowledge his emotions and yield to God's call on his life that made Wilson the man and leader he is today. As the founder of one of the country's most esteemed youth organizations, Wilson has decades of experience in strengthening the physical, mental, and emotional spirit of boys and men. In *Cry Like a Man*, Wilson explains the dangers men face in our culture's definition of "masculinity" and gives readers hope that healing is possible. As Wilson writes, "My passion is to help boys and men find strength to become courageously transparent about their own brokenness as I shed light on the symptoms and causes of childhood trauma and 'father wounds.' I long to see men free themselves from emotional incarceration—to see their minds renewed, souls weaned, and relationships restored."

Crazy Thomas & Mercer
When the tough-on-crime politics of the 1980s

overcrowded state prisons, private companies saw potential profit in building and operating correctional facilities. Today more than a hundred thousand of the 1.5 million incarcerated Americans are held in private prisons in twenty-nine states and federal corrections. Private prisons are criticized for making money off mass incarceration—to the tune of \$5 billion in annual revenue. Based on Lauren-Brooke Eisen's work as a prosecutor, journalist, and attorney at policy think tanks, *Inside Private Prisons* blends investigative reportage and quantitative and historical research to analyze privatized corrections in America. From divestment campaigns to boardrooms to private immigration-detention centers across the Southwest, Eisen examines private prisons through the eyes of inmates, their families, correctional staff, policymakers, activists, Immigration and Customs Enforcement employees, undocumented immigrants, and the executives of America's largest private prison corporations. Private prisons have become

ground zero in the anti-mass-incarceration movement. Universities have divested from these companies, political candidates hesitate to accept their campaign donations, and the Department of Justice tried to phase out its contracts with them. On the other side, impoverished rural towns often try to lure the for-profit prison industry to build facilities and create new jobs. Neither an endorsement or a demonization, *Inside Private Prisons* details the complicated and perverse incentives rooted in the industry, from mandatory bed occupancy to vested interests in mass incarceration. If private prisons are here to stay, how can we fix them? This book is a blueprint for policymakers to reform practices and for concerned citizens to understand our changing carceral landscape.

Correctional psychology is an area of specialization that has recently enjoyed explosive growth along with the burgeoning United States prison population and the renewed interest in providing correctional

rehabilitation programs that reduce inmate recidivism. This completely revised and updated second edition continues to provide an overview of empirical findings and practices in the field. The text focuses specifically on the psychologist's role within a correctional setting and clarifies the differences in working with inmates and correctional staff from populations more commonly encountered. *The Good Samaritan* Orbit
This is a fully-revised and updated version of the top academic work in forensic psychology. Focussed mainly on the practical aspects of forensics, this volume provides all readers need to know to be effective practioners. Detailed sections cover both civil and criminal forensic practice; forensic report writing; treating mental illness in the incarcerated; andethical issues. Contributors are the best-known and most respected practitioners in the field from the US and Canada. All chapters are completely revised from the previous edition, including 6 which have new authors. Forensic psychology is one of the fastest-growing specialties in the field. Its practitioners are able to

avoid managed care and structured settings, and they often focus on assessment, rather than long-term treatment of clients. With the growing public interest in all things forensic, most graduate programs in psychology have added at least one course in forensic psychology over the past few years; and more established professionals are entering the field every day.

The definitive history of the infamous 1971 Attica Prison uprising, the state's violent response, and the victim's decades-long quest for justice. •

Thompson served as the Historical Consultant on

the Academy Award-nominated documentary feature ATTICA "Gripping ... deals with racial conflict, mass incarceration, police brutality and dissembling politicians ... Makes us understand why this one group of prisoners [rebelled], and how many others shared the cost." —The New York Times On September 9, 1971, nearly 1,300 prisoners took over the Attica Correctional Facility in upstate New York to protest years of mistreatment. Holding guards and civilian employees hostage, the prisoners negotiated with officials for improved conditions during the four long days and nights that followed. On September 13, the state abruptly sent hundreds of heavily armed troopers and correction officers to retake the prison by force. Their gunfire killed thirty-nine men—hostages as well as prisoners—and severely wounded more than one hundred others. In the ensuing hours, weeks, and months, troopers and officers brutally retaliated against the prisoners. And, ultimately, New York State authorities prosecuted only the prisoners, never once bringing charges

against the officials involved in the retaking and its aftermath and neglecting to provide support to the survivors and the families of the men who had been killed. Drawing from more than a decade of extensive research, historian Heather Ann Thompson sheds new light on every aspect of the uprising and its legacy, giving voice to all those who took part in this forty-five-year fight for justice: prisoners, former hostages, families of the victims, lawyers and judges, and state officials and members of law enforcement. Blood in the Water is the searing and indelible account of one of the most important civil rights stories of the last century. (With black-and-white photos throughout)

Geropsychiatric and Mental Health Nursing

Clinicians who work on the frontlines of correctional mental health know that the challenges are only increasing. Not only is the proportion of inmates with mental disorders growing at a rate that exceeds that of the correctional population as a whole, but this group is expanding at both ends of the aging continuum, so that

increasing numbers of both geriatric and juvenile offenders require assessment and treatment. Changing patient demographics and evolving treatment modalities make it essential that psychiatrists, psychologists, social workers, nurses, and other professionals who serve the prison population have access to the most practical, up-to-date, and comprehensive resource. Handbook of Correctional Mental Health, now in an expanded, second edition, is that resource. This book addresses key concepts to ensure that the reader meets the current standard of care for inmates through all phases of the criminal justice system. In 20 state-of-the-art chapters, nationally recognized providers and correctional mental health experts address the most pressing issues facing clinicians. Unique to this edition, the Handbook: Summarizes the literature regarding unique populations observed in a correctional environment, thereby assisting the provider in tailoring treatment to various target populations. Provides a clear overview of both

malpractice law and the concept of "deliberate indifference" that aids the reader in understanding the legal requirements for providing care and minimizing risks of lawsuits. Educates clinicians on how to differentiate feigned versus legitimate mental health symptoms, and how to understand and interpret inmate motivations for psychiatric malingering. Discusses important administrative aspects regarding documentation issues, quality assurance, and practicing under a consent decree. Provides useful tables throughout the text with key summary points emphasized. Includes five new, clinically focused chapters on the assessment and treatment of inmates with substance use disorders, geriatric offenders, juvenile offenders, inmates with self-injurious behaviors, offenders who have experienced various traumas during their lives, and inmates housed on maximum security units and death row. Other titles in the field are either out-of-date or limited in scope. By contrast, this new edition of Handbook of Correctional Mental Health includes

everything mental health professionals need to provide the highest standard of care to this growing -- and complex -- patient population. Prisoners' Self-Help Litigation Manual Bantam

This book distils thirty

years of research on the impacts of jail and prison environments. The research program began with evaluations of new jails that were created by the US Bureau of Prisons, which had a novel design intended to provide a non-traditional and safe environment for pre-trial inmates and documented the stunning success of these jails in reducing tension and violence. This book uses assessments of this new model as a basis for considering the nature of environment and behavior in correctional settings and more broadly in all human settings. It provides a critical review of research on jail

environments and of specific issues critical to the way they are experienced and places them in historical and theoretical context. It presents a contextual model for the way environment influences the chance of violence.
