Onlay preparations - SlideShare For the Preparation of Esthetic Inlay/Onlay Restorations The Esthetic Inlay/Onlay kit according to Dr. Ron Jackson is designed for optimal preparation and final adjustment of resin or ceramic esthetic inlay/onlay restorations.

The kit is very simple to use, and when the suggested sequence is followed, leads to a very accurate preparation design in an efficient manner. The kit For Preparations of Esthetic Inlay/Onlay Restorations An onlay or inlay preparation would preserve the buccal tissue. Figure 12.4 Onlays cemented to both premolars restoring teeth which were extensively destroyed by caries. By using an onlay rather than a crown the buccal tooth tissue is preserved, avoiding the need for a full coverage restoration.¹² Inlays, onlays and veneers | Pocket Dentistry An impression of preparation for restoration with a DO gold inlay on tooth #5. The "DO" designation indicates that the gold serves as a restoration for the distal and occlusal surfaces of the tooth. This tooth was prepared and the inlay will be fabricated according to the R.V.
