Premanand Gajvee tells the story of a little-known sect of brahmans known as kirwants whose religious duty is to perform the last rites at cremations. Marginalized by the entire community in general, and the brahmans in particular, kirwants are treated like polluting outcasts. Based on personal experience that occurred as recently as the 1980s, this play, which deals savagely with a subject carefully kept under wraps, is a severe indictment of an inhuman social system. Kirwant created a sensation in Marathi theatre scene when it was first

produced. One of the greatest actors of our theatre, Sreeram Lagoo, taking up the cudgels for a relatively unknown playwright, offered to perform the lead role of the kirwant Siddheshwarshastri. The text is supplemented with a preface by the playwright and a director's note by Shreeram Lagoo. Award-winning playwright, Premanand Gajvee is one of the younger playwrights writing in Marathi today. Several of his plays have been included as texts in undergraduate and postgraduate literature courses in various universities of Maharashtra. M. D. Hatkanangalekar, who has translated and introduced this play, is a leading literary critic and translator, who has taught English at Willingdon College, Sangli.

In *Stillness and Speed*, one of football's most enigmatic stars finally opens up about his life and career, revealing the things that motivate and inspire him. Viewed by many as one of the most influential figures in Premier League history, and scorer of the goal that Arsenal fans voted the best in the club's history, Dennis Bergkamp is a true giant of the game. As a youngster, Bergkamp learned from the Dutch master Johan Cruyff. By the time the pupil was ready to graduate from Ajax and move abroad, he was ready to spread the word, but in Italy he found few willing listeners. It was only when he moved to Arsenal and linked up with Arsene Wenger that he met someone else who shared his vision for football's possibilities. Bergkamp became central to everything the club

did: now he had become the teacher, their creative genius, and the one who inspired some of the wayward old guard to new heights, helping them to seven major trophies. Few footballers' books make you think anew, but in *Stillness and Speed* Bergkamp presents a new vision for the game and how it might be played. He was a player like no other; his story is told like no other. It is a book that will inspire football fans everywhere, whatever their allegiance.

Beloved President John F. Kennedy had a son with Marilyn Monroe before he was forced to marry Jacqueline Bouvier in order to win the presidency. Pushed to keep his identity a secret as an adolescent, their son, Jack, tries to learn as much as he can from his father

without letting on who his parents are to the public. After two tragic deaths, Jack must switch gears from being safe, learning politics and meeting celebrities to mere survival in a world that does not know he exists and some of the few who do, do not want to see him thrive. This groundbreaking autobiography follows the life of Jack Kennedy, Jr., a child with his father's intelligence and his mother's charm. Uncovering what life was like in the 1950s and '60s, it will change the way you see these famous American Icons.

acclaimed "In the Bedroom" and Joyce Carol Oates "We Were the Mulvaney's," Renate Dorrestein's new novel explores the undercurrents of married life and the world of today's teenagers. Perfect was the word both for Phinus and Franka Vermeers' marriage and their teenage son, Jem, but in the wake of his senseless murder, grief drives a wedge between them. Determined to resurrect the joy they once knew, the couple embarks on a weekend in the country to mend their fraying relationship. Their marital troubles, however, run deeper than they realize. Suspenseful, tragic, and strangely touching, "Without Mercy" portrays the preciousness of everyday happiness.

1995 Het onverslaanbare Ajax van Louis

van Gaal Wat had Ajax in de Champions League te zoeken in het seizoen 1994/1995? Slechts één speler had al ervaring met het kampioenenbal: Frank Rijkaard. Het elftal bestond voornamelijk uit een stel jonge honden, nog onwetend van hun kwaliteiten en grenzen. Louis van Gaal zag zijn beoogde spits Ronaldo naar PSV vertrekken. 'Maar wij hebben Patrick Kluivert,' blufte de Ajaxtrainer. En daarmee begon een seizoen waarin Ajax heel Europa zou verrassen. Het is inmiddels twintig jaar geleden dat Ajax de Champions League won. Journalist Mike van Damme sprak uitgebreid met trainer Louis van Gaal, aanvoerder Danny Blind, ontdekking Patrick Kluivert, spelmaker Jari Litmanen en vele anderen. Het leverde een indrukwekkend verhaal op over het

succes van 1995. Mike van Damme (1981) is werkzaam als (eind)redacteur bij Ajax Life, de krant van de Supportersvereniging Ajax. Hij schreef eerder ook voor onder andere Het Parool en Elf Voetbal. In 2008 schreef Van Damme het boek Amsterdam Admirals, de opkomst en ondergang van professioneel American football in Nederland.

 Launching Operation Last Chance in 2002, Efraim Zuroff spearheaded a vast public campaign to locate and bring to justice the worst suspected Nazi criminals before ill health or death spare them from potential punishment. Zuroff's project yielded the names of over 520 previously unknown suspects in 24 different countries, which has led to many convictions. Combining the thrill of a detective story with the inherent poignancy of the history of World War II and its aftermath, Operation Last Chance delivers the important and moving story of one man's heroic efforts to honor the victims of the Holocaust.

One of the most well-known of all network optimization problems is the shortest path problem, where a shortest connection between two locations in a road network is to be found. This problem is the basis of route planners in vehicles and on the Internet. Networks are very common structures; they consist primarily of a finite number of locations (points, nodes), together with a number of links (edges, arcs, connections) between the locations. Very often a certain number is attached to the links, expressing the distance or the cost between the end points of that connection. Networks occur in an extremely wide range of applications, among them are: road networks; cable

networks; human relations networks; project scheduling networks; production networks; distribution networks; neural networks; networks of atoms in molecules. In all these cases there are “objects” and “relations” between the objects. A network optimization problem is actually nothing else than the problem of finding a subset of the objects and the relations, such that a certain optimization objective is satisfied.
