Ericksonian Approaches - Second Edition Balboa Press

The most comprehensive NLP Practitioner course manual ever written. A fully revised and updated edition, it contains the very latest in Neuro-Linguistic Programming, particularly with regard to the Meta-states model and the Meta-model of language. For all those embarking on Practitioner training or wishing to study at home, this book is your essential companion. Written and designed by two of the most important theorists in NLP today. *Fai ciò che ti dico* The Deep Trance Training Manual: Hypnotic skills

Training Trances is about how to therapeutically communicate with the unconscious mind. The authors present their own unique integration of Ericksonian techniques, traditional models of hypnotherapy, and recent research in related areas. Numerous new patterns modeled from the work of Milton H. Erickson, M.D. are clearly explained and demonstrated. The use of trance in training design, to unconsciously install the skills being taught to the participants, is also covered. The book developed from transcripts of a four day workshop, and the design of the book parallels the design chosen for the training itself. Individual exercises or those done in groups of two or three are offered so that the reader may practice the techniques and learn the skills. There are numerous "live" demonstrations, inductions, and double inductions which create for the reader a real "feel" of how hypnosis is done and which are also a rich source for linguistic analysis for the advanced reader. Written with insight and humor, this book's most unique twist is its use of multi-level communication and hypnotic language to create a "training trance" for the readers as they journey through the text. Some hypnotic references are obvious and explicit -- those which are not obvious will create enjoyable "ah-ha!" experiences for the reader as they are discovered.

The Holistic Guide to Hypnotherapy Penguin

This book is a metaphysical visionary mystery fantasy novel, a psychological thriller set in a World of secret societies and hidden agenda's. This is a tale of mind reading, covert influencing and murder. The story explores the power of the mind and the power to influence others using hypnotic techniques. The hypnotic assassin is a master of his own mind, he uses hypnosis on himself to alter his perceptions of time and reality and to enhance what he is capable of physically and mentally. He uses hypnotic techniques to read the minds of others and to plant thoughts and ideas in people's minds and to make people willingly do things he wants them to do. This is the first story in the 'Followers of the Light' series. All hypnosis in this novel is possible, and the final

chapter explains some of the techniques used by the 'assassin' in the novel. For thousands of years Hypnotic Assassins have existed to help free the people. 4500 years ago they were known as 'Assassins of the Light', 2000 years ago this changed to 'Followers of the Light'. They have always stood for freedom & peace. In 1938 they were almost all wiped out when an assassin became hungry for power & domination. Since then few Hypnotic Assassins remain. Sam Carter is one such assassin. Sam lives a quiet life in a small boxy flat, being a Hypnotic Assassin this is all he needs. Every day when Sam isn't on a mission he sits at the same seat in the Marlborough Cafe for 90 minutes, reading minds and drinking tea. One day he picks up a mission to assassinate Michael Rawlins, Ceo of SiLo, a Nuclear Fusion research company who is planning on selling a nuclear weapon and advanced nuclear technology to someone in Europe. This starts out to be a straight forward and simple mission. But Sam's life end's up on the line, with Sam needing to use all his hypnotic skills just to survive."

"I enthusiastically endorse Patrick Marsolek's Self-hypnosis Manual. This is more than a 'how-to' manual. After an orientation to hypnosis, trance, the subconscious, and other relevant subjects, Patrick guides his readers in finding self-hypnosis techniques that work for them. Instead of simply teaching a number of self-hypnosis techniques (like most self-hypnosis manuals), it empowers the learner with an understanding of the induction process and the creation of individualized protocols. Furthermore, the Manual guides the reader through creating specific auto-suggestions to maximize therapeutic results. The Manual also is exceptional in the way that it addresses fears and other hindrances to trance (e.g., beliefs and expectations), stresses the normalness and benefits of self-induced trance, provides helpful application techniques (e.g., dealing with pain), discusses each induction technique, and promotes personal confidence in the process. In sum, Patrick gives the requisite understanding and tools to be one's own best self-hypnosis guide." - Whitney Hibbard Ph.d., Author of "Forensic Hypnosis"
