Work. Family. Church.
Exercise. Sleep. The list of
demands on our time
seems to be never
ending. It can leave you

feeling a little guilty--like
you should always be
doing one more thing.
Rather than sharing
better time-management
tips to squeeze more
hours out of the day, Kelly
Kapic takes a different
approach in *You're Only
Human*. He offers a better
way to make peace with
the fact that God didn't
create us to do it all.
Kapic explores the

theology behind seeing
our human limitations as
a gift rather than a
deficiency. He lays out a
path to holistic living with
healthy self-
understanding, life-giving
relationships, and
meaningful contributions
to the world. He frees us
from confusing our
limitations with sin and
instead invites us to rest
in the joy and relief of

knowing that God can use our limitations to foster freedom, joy, growth, and community. Readers will emerge better equipped to cultivate a life that fosters gratitude, rest, and faithful service to God.

The Humanity of

Muhammad Brazos Press

What makes an American Catholic of Irish and Italian descent one of the leading global voices in admiration of Prophet Muhammad? In this overview of Muhammad's life and legacy, prominent scholar Craig Considine

provides a sociological analysis of Muhammad's teachings and example. Considine shows how the Prophet embraced religious pluralism, envisioned a civic nation, stood for anti-racism, advocated for seeking knowledge, initiated women's rights, and followed the Golden Rule. Considine sheds light on the side of Prophet Muhammad that is often forgotten in mainstream depictions and media narratives. The Humanity of Muhammad is Considine's contribution

to the growing body of literature on one of history's most important human beings.

The incredible technical achievements of recent history may make us feel little less than gods," but

we also find much that cuts us down. When we face our own limits and failures, upon what or whom can we rely? The biblical "answer" to questions about the ultimate nature and meaning of human life begins with the experience of Semitic slaves led out of Egyptian slavery beautifully recounted in Deuteronomy 26:5-11. The New Testament presents Jesus as the culmination of God's Old Testament promise. Christian faith has a

particular Vision of the world and of humanity founded upon the relationship between God and creation. Its key elements are found in the inviolable dignity of every person, the essential centrality of community, and the significance of human action. These are the main themes of a Christian anthropology developed in this book. *Creation and Humanity* Baker Books
What do Christians believe about human sexuality? In *Mere Sexuality*, author and

pastor Todd Wilson presents the historic Christian consensus about human sexuality, the Great Tradition of the church for centuries as taught in each of its major expressions - Orthodox, Catholic, and Protestant. Wilson highlights the stunning shift of opinion on issues of sexuality in the evangelical church and why this break with the historic church is problematic for the future of Christianity. Along the way he provides ordinary believers with an introduction to the historic

Christian vision of sexuality, yet does so in conversation with some of the twenty-first century's leading challenges to this vision. In a culture that is deeply confused about human sexuality, Wilson believes it is time for evangelicals to retrieve the historic Christian tradition and biblical teaching on the question of sexuality. *Mere Sexuality* seeks to guide readers back to the beauty and coherence of this vision of sexuality in the face of an aggressive and all-consuming pagan

and secular worldview. *Jesus, Humanity and the Trinity* CUA Press Revelations of Humanity brings together essays into the history and actuality of how our searches for God and for our own humanity are interwoven. They argue that the revelation of God is possible only when accompanied by a revelation of what it means to be a human being. Revelation implies that the truth is not fully evident in either case. This quest is aided in many of the essays by a

recollection of the thought of Thomas Aquinas. As opposed to simple memory, recollection implies that memory has been lost or become clouded, here by the misrepresentation of Thomas' view of humanity's relation to God as harmonistic, at best semi-Pelagian, often even naturalistic. This difficult recovery is made possible by historical research that alone can escape the easy systematic alienation that supporters and critics of Thomas have often

brought to their interpretation of his works. Thomas's sense of a real but finite capacity of human beings for God, his grace and revelation, anticipates in more ways than is commonly known much of contemporary suspicion about human capacities, but in ways that are open to God. That programmatic insight into the historical Thomas, keenly aware of human entanglements, limits and hopes, offers on many contemporary issues a ressourcement of systematic thought.

Revelations of Humanity revolves around three clusters of issues. The first asks about the reality and limits of the human capacity for truth: in metaphysical, moral and political matters and in relation to the disputed issues of analogous reason and faith. The second cluster is structured around the four involvements that the Second Vatican Council identified as the human face of genuine Christian existence: participation in the legitimate joys, hopes, sorrows and fears of the

contemporary world. These are refracted in the broken light of the human proprium of risibility, the abiding uncertainty addressed by hope, the disputed question of a suffering God and the recollection of Christ's anxiety in the face of death. The final cluster brings together anthropological dimensions of current ecumenical and interreligious disputes: the need to complement affirmation with admonition in ecumenical conversation, exemplified

by the ambivalence towards sacrifice in a genuinely Catholic theology and the need to avoid the excesses of univocity, equivocity or an all too facile analogy in the determination of interreligious relationalities.

Western societies today are coming unmoored in the face of an earth-shaking ethical and cultural paradigm shift. At its core is the question of what it means to be human and how we are

meant to live. The old answers are no longer accepted; a dizzying array of options are offered in their stead. Underpinning this smorgasbord of lifestyles is a thicket of unquestioned assumptions, such as the separation of gender from biological sex, which not so long ago would have been universally rejected as radical notions. In the spring of 2019, a group of Orthodox Christian scholars drawn from a wide variety of academic disciplines met together to offer responses to the

moral crisis our generation faces, elaborating upon its various forms and facilitating a fuller understanding of some of its theological and philosophical foundations. In doing so they offer support to all those who question the claims that are so forcefully insisted upon today &- a clarity that will aid them in standing up and resisting trends that have already shown to be the cause of great suffering and unhappiness. Among the contributors to this

volume are NY Times bestselling author Rod Dreher, Frederica Matthewes-Green, Dr David Bradshaw, Fr Chad Hatfield, and Fr Peter Heers. Collectively, these scholars remind us that it is only through our participation in the life of Christ, God who became man, that we can find the healing of our humanity through the restoration in us of His image, in which we were formed at the beginning of time.

Academic Freedom comes with it a level of responsibility; it places a reasonable obligation on the individual. Freedom ought to make the individual humble enough to know and accept his/her place in the order of things. It helps one to appreciate one's humanity and also to recognize one's capabilities and limitations. Freedom is a gift from God with which the individual ought to enter into a relationship with the Creator; it should not be a reason to

abandon the Creator. I am convinced that the proper use of freedom will surely make the world a better place and bring glory to God who is the source and summit of our freedom and ultimately of our existence. I do not pretend to have the answers to the many questions that I have already raised neither do I lay any claim to having the intention to exhaust all the questions that could be posed in relation to the issue of freedom. I am simply setting out on a journey of exploration of

freedom and I am hoping that by the end of the journey I would have been able to arrive at some point of clarity to myself and hopefully others who would read this work as to what constitutes true freedom and in whom this true freedom could be found. I will sure be operating from my Christian background and hope that at the end I would have been able to prove like St. John Paul II once said: "Freedom consists not in doing what we like, but in having the right to do what is right

"I pray . . . that all of them
may be one, Father, just
as you are in me and I am
in you. . . . May they be
brought to complete unity
to let the world know that
you sent me." --Jesus
Christ What if? What if

believers of multiple
ethnicities manifested the
diversity in unity for which
Jesus prayed? What if
largely separate,
homogeneous
congregations--which
account for nearly 92.5
percent of all churches in
the United States--
increasingly became
connected, multiethnic
congregations? What if, at
eleven o'clock on Sunday
mornings--or whenever
believers gather to
worship--local
congregations were
comprised of believing
whites, African Americans,

Koreans, Hispanics,
Romanians, Native
Americans, as well as the
diverse mosaic of other
ethnicities represented in
our increasingly
multicultural society?
Would this not say
something about the
supernatural character of
the gospel of
reconciliation we
proclaim? Jesus believed it
would. That is why after
praying for such diversity
in unity among his
followers, Jesus Christ--the
Man for all nations--
extended his arms and
laid down his life to make

it happen. This book, *God's New Humanity*, examines the biblical-theological vision and motivation for living in response to Jesus' prayer. *Health Progress* Liturgical Press
Based on the 1995 Henson Lectures, delivered in the University of Oxford, this study takes as its theme the Christian future, and the development of a theology of generosity in response to the challenges likely to face Christian faith in the twenty-first century. In

particular, Professor Newlands wishes to explore the suggestion that Christ represents the ultimate generosity of God for humankind. This leads him to concentrate on the contribution made by Christian doctrine to public issues, and especially the relationship between Christology and human rights. The author is centrally concerned that faith should remain in the public square, and that the circle of faith should always be outward facing. The result is a liberal, pluralistic

theology, which regards the generous love of God, in incarnation and reconciliation, as a powerful stimulus to imaginative Christian thought and action. In its robust portrayal of what Christianity ought properly to look like, this book--which emerges from the pen of the leading Scottish liberal theologian of his generation--will be sure to stimulate and engage a wide variety of readers. *Reconciling All Things*

Intends to bring together the biblical, historical, and theological elements of an integrated Christian vision of the world, in light of our contemporary understandings of nature and the evolving universe. Sun of Righteousness, Arise! Wm. B. Eerdmans Publishing
Modern developments in both science and history challenge us to a far

greater degree of empiricism than has been traditionally considered necessary in the study of theology. Any attempt to move in this direction can be significantly helped by Bernard Lonergan's breakthrough discovery of the notion of functional specialties in 1965. The strategy of this book is to make use of this discovery and provide a theological reflection on mission appropriate to the present age. The author begins with an insight available from biblical research but absent from

current theologies of mission. This is the general recognition that the texts concerning a universal mission are in fact an instance of retrojection. Building on this through an interpretation of Lonergan's functional specialties of interpretation and history, he unfolds the startling implications for grasping the central creative significance of the 'word of God'. As the argument transfers from one specialty to the next, it moves towards ever-

richer empiricism, culminating in the specialty of communications. Here the creativity which will be needed to address faithfully the message of Jesus to our contemporary world in all its complexity becomes apparent. [The Christian Case for Virtue Ethics](#) Peter Lang Despite the growing interest among philosophers and theologians in virtue ethics, its proponents have done little to suggest why Christians in particular find virtue

ethics attractive. Joseph J. Kotva, Jr., addresses this question in [The Christian Case for Virtue Ethics](#), showing that virtue theory offers an ethical framework that is highly compatible with Christian morality. Kotva defines virtue ethics and demonstrates its ability to voice Christian convictions about how to live the moral life. He evaluates virtue theory in light of systematic theology and Scripture, arguing that Christian ethics could be profitably linked with neo-

Aristotelian virtue ethics. Ecumenical in tone, this book provides a thorough but accessible introduction to recent philosophical accounts of virtue and offers an original, explicitly Christian adaptation of these ideas. It will be of value to students and scholars of philosophy, theology, and religion, as well as to those interested in the debates surrounding virtue ethics. *From Nature to Creation (The Church and Postmodern Culture)* Georgetown University

How does Christianity change the way we view the natural world? In this addition to a critically acclaimed series, renowned theologian Norman Wirzba engages philosophers, environmentalists, and cultural critics to show how the modern concept of nature has been deeply problematic. He explains that understanding the world as creation rather than as nature or the environment makes possible an imagination shaped by practices of

responsibility and gratitude, which can help bring healing to our lands and communities. By learning to give thanks for creation as God's gift of life, Christians bear witness to the divine love that is reconciling all things to God. Interrupting Capitalism Rowman & Littlefield

In this provocative follow-up to his enormously influential 'A Rabbi Talks with Jesus', Jacob Neusner challenges the apostle Paul to debate the true meaning and significance of Judaism. Drawing new boundaries for Jewish-Christian dialogue, Neusner contends that Paul's misinterpretation of Judaism - a misinterpretation perpetuated today by many Christians and Jews - has resulted in the widespread perception of Judaism as ethnic and particular, and

Christianity as universal. Yet as Neusner clearly demonstrates, just as Christianity presents an option to all of God's faithful, so too does Judaism's mediation of the voice of God at Sinai echo across the entire world. *The Death of Humanity* HarperCollins Publishers Embracing the viewpoints of Catholic, Protestant, or Orthodox thinkers, of conservatives, liberals, radicals, and agnostics, Christianity today is anything but monolithic or univocal. In *The Oxford Companion to Christian*

Thought, general editor Adrian Hastings has tried to capture a sense of the great diversity of opinion that swirls about under the heading of Christian thought. Indeed, the 260 contributors, who hail from twenty countries, represent as wide a range of perspectives as possible. Here is a comprehensive and authoritative (though not dogmatic) overview of the full spectrum of Christian thinking. Within its 600 alphabetically arranged entries, readers will find lengthy survey articles on

the history of Christian thought, on national and regional traditions, and on various denominations, from Anglican to Unitarian. There is ample coverage of Eastern thought as well, examining the Christian tradition in China, Japan, India, and Africa. The contributors examine major theological topics such as resurrection, the Eucharist, and grace as

well as controversial issues such as homosexuality and abortion. In addition, short entries illuminate symbols such as water and wine, and there are many profiles of leading theologians, of non-Christians who have deeply influenced Christian thinking, including Aristotle and Plato, and of literary figures such as Dante,

Milton, and Tolstoy. Most articles end with a list of suggested readings and the book features a large number of cross-references. The Oxford Companion to Christian Thought is an indispensable guide to one of the central strands of Western culture. An essential volume for all Christians, it is a thoughtful gift for the holidays.
