Resumen del editor. "Published annually, this two-volume set provides a comprehensive overview of the most essential parts of VAT Directives in Europe. Volume 1 offers a systematic survey of the implications of the legal principles on indirect tax matters and of the VAT rules of the European Union in force, and a discussion of the case law of the Court of Justice of the European Union in indirect tax matters, particularly in VAT. Volume 2 provides an (unofficial) integrated text of Directive 77/388/EEC of 17 May 1977 (the Sixth Directive as amended by subsequent directives, treaties of accession and regulations), as applicable until 1 January 2007. The articles of Council Regulation (EC) No. 1777/2005 of 17 October 2005, laying down implementing measures, are indicated under the articles of the Sixth Directive to which they relate. The latest directive integrated into the text is Directive 2006/98/EC of 20 December 2006. This integrated text is unofficial in nature, since headings and footnotes have been added and, where relevant, the text of other directives inserted. On 28 November 2006, Directive 2006/112/EC on the common system of value added tax (the Recast of the First and Sixth VAT Directives) was adopted, entering into force on 1 January 2007. In order to improve the drafting quality, the text of the Sixth Directive has undergone numerous changes. Although the changes do not affect its substantive content, they do alter the format with the 53 articles of the Sixth Directive divided into 414 new articles, of which article 411 repeals the Sixth Directive as set out in this integrated text "

A Practitioner's Guide to Tax Evidence Springer

Value Added Tax (VAT; also known as Goods and Services Tax, under the acronym GST in a number of OECD countries) has become a major source of revenue for governments around the world. Some 165 countries operated a VAT at the time of the completion of the International VAT/GST Guidelines in 2016, more than twice as many as 25 years before. As VAT continued to spread across the world, international trade in goods and services has also expanded rapidly in an increasingly globalised economy. One consequence of these developments has been the greater interaction between VAT systems, along with growing risks of double taxation and unintended non-taxation in the absence of international VAT co-ordination. The International VAT/GST Guidelines now present a set of internationally agreed standards and recommended approaches to address the issues that arise from the uncoordinated application of national VAT systems in the context of international trade. They focus in particular on trade in services and intangibles, which poses increasingly important challenges for the design and operation of VAT systems worldwide. They notably include the recommended principles and mechanisms to address the challenges for the collection of VAT on cross-border sales of digital products that had been identified in the context of the OECD/G20 Project on Base and Erosion and Profit Shifting (the BEPS Project). These Guidelines were adopted as a Recommendation by the Council of the OECD in September 2016.
