The modern microprocessor based electronic equipment most vulnerable to Intentional Destructive Electromagnetic Interferences (IDEI) includes High-Altitude Electromagnetic Pulse (HEMP) in all substation equipment. However, power equipment and especially transformers are also subject to the influence of HEMP. The book discusses problems and solutions for both kinds of substation equipment. Separated into eight chapters, the book covers: Technological progress and its consequences; Intentional Destructive Electromagnetic Interferences (IDEI); Methods and means of Digital Protective Relay (DPR) protection from electromagnetic pulse; Passive methods and means of DPR protection from electromagnetic pulse; Active methods and means of DPR protection from electromagnetic pulse; Tests of DPR resistance to IDEI impacts; Organizational and technical measures to protect DPR from HEMP; and Protection of power equipment and transformers from HEMP. Key features: Practical approach focusing on technical solutions for difficult problems. Full data on electromagnetic threats and methods of their prevention are concentrated. Addresses a gap in knowledge in the power system industry. This book emphasizes practical recommendations on protection of power substations' electric equipment from IDEI that intended for not only staff operating electric equipment, but also for manufacturers of this equipment, specialists of designing companies, managers of electric energy industry as well as for teachers and postgraduate students.

Lily has grown up believing she accidentally killed her mother when she was four. She not only has her own memory of holding the gun, but her father's account of the event. Now fourteen, she yearns for her mother, and for forgiveness. Living on a peach farm in South Carolina with her father, she has only one friend: Rosaleen, a black servant whose sharp exterior hides a tender heart. South Carolina in the sixties is a place where segregation is still considered a cause worth fighting for. When racial tension explodes one summer afternoon, and Rosaleen is arrested and beaten, Lily is compelled to act. Fugitives from justice and from

Lily's harsh and unyielding father, they follow a trail left by the woman who died ten years before. Finding sanctuary in the home of three beekeeping sisters, Lily starts a journey as much about her understanding of the world, as about the mystery surrounding her mother.

This collection of essays explores cultural narratives of care in the contexts of ageing and illness. It includes both text-based and practice-based contributions by leading and emerging scholars in humanistic studies of ageing. They consider care not only in film (feature and documentary) and literature (novel, short story, children's picturebook) but also in the fields of theatre performance, photography and music. The collection has a broad geographical scope with case studies and primary texts from Europe and North America but also from Hong Kong, Japan, Australia, Argentina and Mexico. The volume asks what care, autonomy and dependence may mean and how these may be inflected by social and cultural specificities. Ultimately, it invites us to reflect on our relations to others as we face the global and local challenges of both the pandemic and ageing societies.

The Shakespeare Multiverse: Fandom as Literary Praxis argues that fandom offers new models for a twenty-first century reading practice that embraces affective pleasure and subjective self-positioning as a means of understanding a text. Part critical study, part source book, The Shakespeare Multiverse suggests that fanfiction contributions to the ongoing expansion of the object that we call Shakespeare is best imagined as a multiverse, encompassing different worlds that consolidate the various perspectives that different fans bring to Shakespeare. Our concept of the multiverse redefines 'Shakespeare' not as a singular body of work, but as space where a process of inquiry and cultural memory - memories in the making, and those already made - is influenced and shaped by the technologies available to the reader. Characteristic of fandom is an intertextual reading strategy that we term cyborg reading, an approach that accommodates the varied elements of identity, politics, culture, sexuality, and race that shape the ways that Shakespeare is explored and appropriated throughout fanfiction reading communities. The Shakespeare Multiverse intersects literary theory, fan studies, and popular culture as it traverses Shakespeare fandom from the 1623 Folio to the age of the Internet, exploring the different textures of fan affect, from those who firmly uphold fidelity to the text to those who sit on the very edge of the fandom, threatening to cross over into Shakespearean anti-fandom. By recognizing the literary value of fandom, The Shakespeare Multiverse offers a new approach to literary criticism that challenges the limits of hegemonic authority

and recognizes the value of a joyfully speculative critical praxis. *Catalog of Copyright Entries. Third Series* John Wiley & Sons Includes Part 1, Number 1: Books and Pamphlets, Including Serials and Contributions to Periodicals (January - June)

Connecting Past, Present and Future Literacies Design, Modeling and Evaluation of Protective Relays for Power Systems This book counters the dominant English-only approach found in writing and composition classrooms by identifying practices and pedagogies that support multilingual students. The specific examples in this book, drawn from high school and college writing contexts, demonstrate the value of embracing linguistic diversity in writing programs.

This book brings together recent research on interpersonal relationships in education from a variety of perspectives including research from Europe, North America and Australia. The work clearly demonstrates that positive teacher-student relationships can contribute to student learning in classrooms of various types. Productive learning environments are characterized by supportive and warm interactions throughout the class: teacher-student and student-student. Similarly, at the school level, teacher learning thrives when there are positive and mentoring interrelationships among professional colleagues. Work on this book began with a series of formative presentations at the second International Conference on Interpersonal Relationships in Education (ICIRE 2012) held in Vancouver, Canada, an event that included among others, keynote addresses by David Berliner, Andrew Martin and Mieke Brekelmans. Further collaboration and peer review by the editorial team resulted in the collection of original research that this book comprises. The volume (while eclectic) demonstrates how constructive learning environment relationships can be developed and sustained in a variety of settings. Chapter contributions come from a range of fields including educational and social psychology, teacher and school effectiveness research, communication and language studies, and a variety of related fields. Together, they cover the important influence of the relationships of teachers with individual students, relationships among peers, and the relationships between teachers and their professional colleagues.
