Honda Civic A
The eighth
generation Honda Civic
was introduced in
September 2005, for the
2006 model year. This
generation introduced the
"two-tier" instrument
panel. In many countries
(USA, UK, New Zealand),
all models (including the
base model) come
standard with power

windows, anti-lock brakes
(ABS), and side/curtain
airbags (for a total of six
airbags). Honda Civic
(eighth generation) -
Wikipedia
The 2006-2011
Honda Civic was offered
with three engine choices
throughout its life. Most
gas-powered models used
a 1.8-liter 4-cylinder
powerplant, which was
rated at 140 horsepower.
According to the
Environmental Protection
Agency (EPA), that model
returned 26 miles per
gallon in the city and 34
mpg on the highway with
a standard 5-speed

manual or 25 mpg city/36
mpg hwy with a 5-speed
automatic. 2006-2011
Honda Civic: Everything
You Need to Know ...
The Civic has been a mainstay
— as the arrival of the
eighth generation model
in 2006 clearly illustrates.
There was one body style,
a four-door sedan, but
four versions, including a
hybrid. For this review
we'll leave the latter for a
separate story and look at
the VTi entry model, the
VTi-L up-spec car, and the
Sport. Used Honda Civic
