Book about a
blind French
girl and a
German boy
whose paths
collide in

occupied
France as both
try to survive
the
devastation of
World War II.
Marie-Laure
lives with her
father in Paris
near the
Museum of
Natural
History where
he works as
the master of
its thousands
of locks. When
she is six,
Marie-Laure
goes blind and
her father

builds a perfect miniature of their neighborhood so she can memorize it by touch and navigate her way home. When she is twelve, the Nazis occupy Paris, and father and daughter flee to the walled citadel of Saint-Malo, where Marie-Laure's reclusive great uncle lives in a tall house by the sea. With them they carry what might be the museum's most valuable and

dangerous jewel. In a mining town in Germany, the orphan Werner grows up with his younger sister, enchanted by a crude radio they find. Werner becomes an expert at building and fixing these crucial new instruments, a talent that wins him a place at a brutal academy for Hitler Youth, then a special assignment to track the Resistance. More and more aware of the human

cost of his intelligence, Werner travels through the heart of the war and, finally, into Saint-Malo, where his story and Marie-Laure's converge. Doerr's "stunning sense of physical detail and gorgeous metaphors" (San Francisco Chronicle) are dazzling. Deftly interweaving the lives of Marie-Laure and Werner, he illuminates the ways, against all odds, people try to be good to one

another. Ten years in the writing, *All the Light We Cannot See* is a magnificent, deeply moving novel from a writer “whose sentences never fail to thrill” (Los Angeles Times). [Ghost Girl](#) Gallery Books Perfect for fans of *Small Spaces* and *Nightbooks*, Ally Malinenko’s debut is an empowering and triumphant ghost story—with spooky twists sure to give readers a few good

goosebumps! Zee Puckett loves ghost stories. She just never expected to be living one. It all starts with a dark and stormy night. When the skies clear, everything is different. People are missing. There’s a creepy new principal who seems to know everyone’s darkest dreams. And Zee is seeing frightening things: large, scary dogs that talk and maybe even . . . a ghost.

When she tells her classmates, only her best friend Elijah believes her. Worse, mean girl Nellie gives Zee a cruel nickname: Ghost Girl. But whatever the storm washed up isn’t going away. Everyone’s most selfish wishes start coming true in creepy ways. To fight for what’s right, Zee will have to embrace what makes her different and what makes her Ghost Girl. And all three of them—Zee,

Elijah, and Nellie—will have to work together if they want to give their ghost story a happy ending. Penguin The original novel as seen in Showtime's Californication , starring David Duchovny. Heather Havrilesky's writing has been called

"whip-smart and profanely funny" (Entertainment Weekly) and "required reading for all humans" (Celeste Ng). In her work for New York, The Baffler, The New York Times Magazine, and The Atlantic, as well as in "Ask Polly," her advice column for The Cut, she dispenses a singular, cutting wisdom--an ability to inspire, provoke, and put a name to our most insidious cultural

delusions. What If This Were Enough? is a mantra and a clarion call. In its chapters--many of them original to the book, others expanded from their initial publication--Havrilesky takes on those cultural forces that shape us. We've convinced ourselves, she says, that salvation can be delivered only in the form of new products, new technologies, new lifestyles. From the allure of materialism to

our misunderstandings of romance and success, Havrilesky deconstructs some of the most poisonous and misleading messages we ingest today, all the while suggesting new ways to navigate our increasingly bewildering world. Through her incisive and witty inquiries, Havrilesky urges us to reject the pursuit of a shiny, shallow future that will never come. These timely, provocative,

and often hilarious essays suggest an embrace of the flawed, a connection with what already is, who we already are, what we already have. She asks us to consider: What if this were enough? Our salvation, Havrilesky says, can be found right here, right now, in this imperfect moment. God Hates Us All The Rosen Publishing Group, Inc All Washed Up All Washed Up Harper Collins

The miraculous account of the man who survived alone and adrift at sea longer than anyone in recorded history. For fourteen months, Alvarenga survived constant shark attacks. He learned to catch fish with his bare hands. He built a fish net from a pair of empty plastic bottles. Taking apart the outboard motor, he fashioned a huge fishhook. Using fish vertebrae as needles, he

stitched together his own clothes. Based on dozens of hours of interviews with Alvarenga and interviews with his colleagues, search and rescue officials, the medical team that saved his life and the remote islanders who nursed him back to health, this is an epic tale of survival. Print run 75,000.

Norton & Company From the former director of the Museum of Arts and Design in New York, a timely and passionate case for the role of the well-designed object in the digital age. Curator and scholar Glenn

Adamson opens *Fewer, Better Things* by contrasting his beloved childhood teddy bear to the smartphones and digital tablets children have today. He laments that many children and adults are losing touch with the material objects that have nurtured human development for thousands of years. The objects are still here, but we seem to care less and know less about them. In his

presentations to groups, he often asks an audience member what he or she knows about the chair the person is sitting in. Few people know much more than whether it's made of wood, plastic, or metal. If we know little about how things are made, it's hard to remain connected to the world around us. *Fewer, Better Things* explores the history of craft in its many forms, explaining

how raw materials, tools, design, and technique come together to produce beauty and utility in handmade or manufactured items. Whether describing the implements used in a traditional Japanese tea ceremony, the use of woodworking tools, or the use of new fabrication technologies, Adamson writes expertly and lovingly about the aesthetics of objects, and the care and attention that

goes into producing them. Reading this wise and elegant book is a truly transformative experience. *Goodbye, Vitamin* Random House North Americans are some of the least healthy people on Earth. Despite advanced medical care and one of the highest standards of living in the world, one in three Americans will be diagnosed with cancer in their lifetime and 50% of US children are

overweight. This crisis in personal health is largely the result of chronically poor dietary and lifestyle choices. In *Whitewash*, Joseph Keon unveils how North Americans unwittingly sabotage their health every day by drinking milk, and shows that our obsession with calcium is unwarranted. Citing scientific literature, *Whitewash* builds an unassailable case that not

only is milk unnecessary for human health; its inclusion in the diet may increase the risk of serious diseases including: prostate, breast, and ovarian cancers osteoporosis diabetes vascular disease Crohn's disease. Many of America's dairy herds contain sick and immunocompromised animals whose tainted milk regularly makes it to market. Cow's milk is also a

sink for environmental contaminants, and has been found to contain traces of pesticides, dioxins, PCBs, rocket fuel, and even radioactive isotopes. Whitewash offers a completely fresh, candid and comprehensively documented look behind dairy's deceptively green pastures, and gives readers a hopeful picture of life after milk.

Italian nobleman is marooned on an empty ship in this "astonishing intellectual journey" by the author of Foucault's Pendulum (San Francisco Chronicle). In the year 1643, a violent storm in the South Pacific leaves Roberto della Griva shipwrecked—on a ship. Swept from the Amaryllis, he has managed to pull himself aboard the Daphne, anchored in the bay of a beautiful

island. The ship is fully provisioned, he discovers, but the crew is missing. As Roberto explores the different cabinets in the hold, he looks back on various episodes from his life: Ferrante, his imaginary evil brother; the siege of Casale, that meaningless chess move in the Thirty Years' War in which he lost his father and his illusions; and the lessons given him on Reasons of State, fencing,

the writing of love letters, and blasphemy. In this “intellectually stimulating and dramatically intriguing” novel, Umberto Eco conjures a young dreamer searching for love and meaning; and an old Jesuit who, with his clocks and maps, has plumbed the secrets of longitudes, the four moons of Jupiter, and the Flood (Chicago Tribune).

Solo Simon

and Schuster Kimberley Patton examines the environmental crises facing the world's oceans from the perspective of religious history. Much as the ancient Greeks believed, and Euripides wrote, that “the sea can wash away all evils,” a wide range of cultures have sacralized the sea, trusting in its power to wash away what is dangerous, dirty, and morally contaminating. The sea

makes life on land possible by keeping it “pure.” Patton sets out to learn whether the treatment of the world's oceans by industrialized nations arises from the same faith in their infinite and regenerative qualities. Indeed, the sea's natural characteristics, such as its vast size and depth, chronic motion and chaos, seeming biotic inexhaustibility, and unique composition of powerful purifiers-salt and water-support a view

of the sea as a "no place" capable of swallowing limitless amounts of waste. And despite evidence to the contrary, the idea that the oceans could be harmed by wasteful and reckless practices has been slow to take hold. Patton believes that environmental scientists and ecological advocates ignore this relationship at great cost. She bases her argument on three influential

stories: Euripides' tragedy Iphigenia in Tauris; an Inuit myth about the wild and angry sea spirit Sedna who lives on the ocean floor with hair dirtied by human transgression; and a disturbing medieval Hindu tale of a lethal underwater mare. She also studies narratives in which the sea spits back its contents-sins, corpses, evidence of guilt long sequestered-suggesting

that there are limits to the ocean's vast, salty heart. In these stories, the sea is either an agent of destruction or a giver of life, yet it is also treated as a passive receptacle. Combining a history of this ambivalence toward the world's oceans with a serious scientific analysis of modern marine pollution, Patton writes a compelling, cross-disciplinary study that couldn't be more urgent

or timely.

And with the kind of storytelling magic that is the hallmark of Rushdie's work, the fully realized lives of DuChamp and Quichotte intertwine in a profoundly human quest for love and a wickedly entertaining portrait of an age in which fact is so often indiscernible from fiction. Praise for Quichotte

"Brilliant . . . a perfect fit for a moment of transcontinental derangement."
—Financial Times
"Quichotte is one of the cleverest, most enjoyable metafictional capers this side of postmodernism. . . . The narration is fleet of foot, always one step ahead of the reader—some where between a pinball machine and a three-dimensional game of snakes and

ladders. . . . This novel can fly, it can float, it's anecdotal, effervescent, charming, and a jolly good story to boot."
—The Sunday Times
"Quichotte [is] an updating of Cervantes's story that proves to be an equally complicated literary encounter, jumbling together a chivalric quest, a satire on Trump's America and a whole lot of postmodern playfulness in a novel that is as sharp as a flick-knife and

as clever as a barrel of monkeys. . . . This is a novel that feeds the heart while it fills the mind.”—The Times (UK)

The ocean gives up many prizes, just setting them on our beaches for us to find. From rubber ducks that started out somewhere in Indonesia to land Venice Beach, to an intact refrigerator makes it way to the Jersey Shore. Chunks of beeswax

found on the Oregon coast are the packing remnants of 18th century Spanish gold. Author Skye Moody walks the coast, dons her wet suit, and heads out to sea to understand the excellent debris that accrues along the tideline. There she finds advanced military technology applied to locating buried Rolexes, hardcore competitive beachcombing conventions,

and isolated beach communities whose residents are like flotsam congregated at the slightest obstacle on the coastline. This book confirms that the world is a mysterious place and that treasure is out there to be found.

favorite and underground celebrity Pete Jordan's amusing memoir of his dishwashing extravaganza. Part adventure, part parody, and part miraculous journey of self-discovery, it is the unforgettable account of Jordan's transformation from itinerant seeker into "Dishwasher Pete"—unlikely folk hero, writer, publisher of his own cult zine, and the ultimate

professional dish dog—and how he gave it all up for love. “For 12 years, I was the most prolific dishlicker of them all. From 1989 to 2001, I dished my way around the country, unwittingly searching for direction. From a bagel joint in New Mexico to a Mexican joint in Brooklyn; from a dinner train in Rhode Island to the Lawrence Welk Resort in Branson, Missouri; from an upper-crust

ladies' club to a crusty hippie commune—I washed the nation's dishes. Whether it was a gig so lousy that I walked out within an hour or one where I toiled 120 hours a week, I remained a man on a mission: to bust suds in every state in the union.”—Pete Jordan A smart, funny, and surprising look at life, Dishwasher is sure to appeal to fans of Nick Hornby and Tom Perotta.
