Mood mapping simply involves plotting how you feel against your energy levels, to determine your current mood. Dr Liz Miller then gives you the tools you need to lift your low mood, so improving your mental health and wellbeing. Dr Miller developed this technique as a result of her own diagnosis of bipolar disorder (manic depression), and of overcoming it, leading her to seek ways to improve the mental health of others. This innovative book illustrates: \* The Five Keys to Moods: learn to identify the physical or emotional factors that affect your moods \* The Miller Mood Map: learn to visually map your mood to increase self-awareness \* Practical ways to implement change to alleviate low mood Mood mapping is an essential life skill; by giving an innovative perspective to your life, it enables you to be happier, calmer and to bring positivity to your own life and to those around you. 'A gloriously accessible read from a truly unique voice' Mary O'Hara, Guardian 'It's great to have such accessible and positive advice about our moods, which, after all, govern everything we do. I love the idea of MoodMapping' Dr Phil Hammond 'Can help you find calm and take the edge off your anxieties' Evening Standard 'MoodMapping is a fantastic tool for managing your mental health and taking control of your life' Jonathan Naess, Founder of Stand to Reason

It often seems today that no dispute is barred from resolution by arbitration. Even the fundamental question of whether a dispute falls under the exclusive jurisdiction of a judicial body may itself be arbitrable. Arbitrability is thus an elusive concept; yet a systematic study of it, as this book shows, yields innumerable guidelines and insights that are of substantial value to arbitral practice. Although the book takes the form of a collection of essays, it is designed as a comprehensive commentary on practical issues that emerge from the idea of arbitrability. Fifteen leading academics and practitioners from Europe and the United States each explore different facets of arbitrability always with a perspective open to international developments and comparative evaluation of standards. The presentation falls into two parts: in the first the focus is on the general features of arbitrability, its rationale and the laws applicable to it. In the second, arbitrability is specifically examined in the context of administrative, criminal, corporate, IP, financial, commercial, and criminal law This book has its origins in an International Conference on Arbitrability held at Athens in September 2005. Seven papers presented there are here reviewed and updated, and nine others are added. The subject of the book and arbitrability and is one that is much talked about, but seldom if ever given the in-depth treatment presented here. Arbitrators and other practitioners in the field will welcome the way the analysis moves logically from theory to practice regarding every issue, and academics will recognize a definitive treatment of arbitrability as understood and applied in the settlement of disputes today.

The examinations of the present era are becoming tough nuts to crack with the rise of every Sun on the academic horizon of the world. The tests related to General Mental Ability have also received greater attention of papersetters. Thus, these tests would be more difficult in test session commencing from 2002 AD. We, at RPH, decided to give an edge to the candidates such examinations. We worked hard for more than a year on the manuscript of this volume. What finally turned out to be, was a systematic and neatly planned compendium, exclusively dedicated to general mental ability tests. Students preparing of entrance test and competitive examination of MBA, CDS, NDA, CAT, MAT, CMAT, RRB, SCRA, SBIPO, SSC EXAMS, UPSC, GMAT, GINDOMAT, IBPSCWE, B.Ed. etc., would find it to be a boon for themselves. This systematic study and practice

will help them succeed in their examinations. On behalf of publishers, we wish you all the best for your forthcoming examinations.

Solar energy is in focus worldwide. So is the role of cities and public governments for creating a more sustainable urban future. This volume highlights the role of solar energy and other solar related energy technologies for a low carbon and sustainable energy system, particularly for cities and city regions in the South. The articles refer to solar energy generation technologies, smart city planning concepts, as well as 'passive' solar building design approaches. Thus, the volume takes a broad and applied approach by analysing projects and different solutions for a more efficient and solar oriented building design and technology implementation.
