Advanced Structural Chemistry Discover the relationships between inorganic chemical synthesis, structure, and property with these comprehensive and insightful volumes Advanced Structural Chemistry: Tailoring Properties of Inorganic Materials and their Applications (3 Volume Set) offers readers the opportunity to discover the relationship between the structure and function of matter, develop efficient and precise synthesis methodology, and to understand the theoretical for new functional substances. Advanced Structural Chemistry clarifies the relationships between synthesis and structure, as well as structure and

property, both of which are central to the creation of new materials with unique functions. In addition to subjects like the syntheses of metal-oxide clusters, metal-organic cages, and metal-organic frameworks with tailored optical, electric, ferroelectric, magnetic, adsorption, separation, and catalytic properties, the accomplished editor Rong Cao provides readers with information on a wide variety of topics, such as: Coordination-assembled metal-organic macrocycles and cages, including metallacycles and metallacages The structural chemistry of metal-oxo clusters, including the oxo clusters of transition metal, main group metal, and lanthanides Synthetic approaches, structural diversities, and biological aspects of molybdenum-based

heterometallic sulfide clusters and coordination polymers Group 11-15 metal chalcogenides, including discrete chalcogenide clusters synthesized in ionic liquids The structures of metal-organic frameworks, including one-, two-, and three-dimensional MOFs Perfect for inorganic chemists, structural chemists, solid state chemists, material scientists, and solid state physicists, Advanced Structural Chemistry also belongs on the bookshelves of catalytic and industrial chemists who seek to improve their understanding of the structure and functions of inorganic materials.

The controversial British writer Ford Madox Ford (1873-1939) is increasingly recognized as a major presence in early

twentieth-century literature. This series of International Ford Madox Ford Studies was founded to reflect the recent resurgence of interest in him. Each volume is based upon a particular theme or issue; and relates aspects of Ford's work, life, and contacts, to broader concerns of his time. The present book is part of a large-scale reassessment of his roles in literary history. Ford is best-known for his fiction, especially *The Good Soldier*, long considered a modernist masterpiece; and *Parade's End*, which Anthony Burgess described as 'the finest novel about the First World War'; and Samuel Hynes has called 'the greatest war novel ever written by an Englishman'. In these, as in most of his books, Ford renders and analyses the crucial transformations in modern

society and culture. One of the most striking features of his career is his close involvement with so many of the major international literary groupings of his time. In the South-East of England at the fin-de-siècle, he collaborated for a decade with Joseph Conrad, and befriended Henry James and H. G. Wells. In Edwardian London he founded the *English Review*, publishing these writers alongside his new discoveries, Ezra Pound, D. H. Lawrence, and Wyndham Lewis. After the war he moved to France, founding the transatlantic review in Paris, taking on Hemingway as a sub-editor, discovering another generation of Modernists such as Jean Rhys and Basil Bunting, and publishing them alongside Joyce and Gertrude Stein. Besides his role as contributor and enabler to

various versions of Modernism, Ford was also one of its most entertaining chroniclers. This volume includes twelve new essays on Ford's engagement with the literary networks and cultural shifts of his era, by leading experts and younger scholars of Ford and Modernism. Two of the essays are by well-known creative writers: the novelist Colm Tóibín, and the novelist and cultural commentator Zinovy Zinik.

Making History New CQ Press

All organizations must cope with future uncertainties. These uncertainties affect the strategic choices they make. They must commit scarce organizational resources to future outcomes which they have little assurance will come into being. Marcus explores how decision makers in the energy industry made

choices in the face of such uncertainties, specifically examining two major uncertainties they confronted in the 2012-2018 period - price volatility and climate change. Marcus tells the story of how different companies in the integrated oil and natural gas sector and in the motor vehicle sector responded to these uncertainties. In the face of these challenges, companies in the energy industry hedged their bets by staking out paradoxical or contrasting positions. On the one hand, they focused on capturing as much gain as they could from the world's current dependence on fossil fuels and on the other hand they made preparations for a future in which fossil fuels might not be the world's dominant energy source.

This year's budget made some significant changes to annual road tax (vehicle excise duty or VED). The main changes included: introduction of six new VED bands from 2009-10, bringing the total number of bands to 13; applying this new regime of 13 bands to existing cars on the road first registered on or after 1 March 2001; and introduction of a new rate of VED for new cars in the first year in which they are bought. The Environmental Audit Committee's aims in this report were to examine the projected environmental impacts of these changes, to review how fair these changes are, and to make recommendations to the Treasury as to how it should proceed. The Committee felt that there was nothing intrinsically

wrong in the rebanding of cars registered since 2001 but that there was a lack of data about the financial impacts of these change on lower-income groups. The new-first year rates were welcomed. However concerns remain that the differentials between VED bands are still not large enough to drive market transformation. The Treasury should have taken much greater care to explain the changes in VED in the Budget. If the point of green taxes is to change behaviour, they need to be properly publicised. In general, the Treasury needs to develop a proper communications strategy

Eco-driving has the potential to save fuel and reduce emissions without having to make any changes to vehicles or road

infrastructure. This book provides an in-depth understanding of the contemporary issues in the human factors aspects of eco-driving strategies and interfaces and the effects on driver behaviour. A review of the literature concerning design, behaviour, and energy use led to an exploration of Ecological Interface Design, and the Skills, Rules, and Knowledge (SRK) taxonomy of human behaviour, particularly with regard to haptic information presented through the accelerator pedal. This book explains that eco-driving can be performed by anyone in control of a vehicle.

La contabilizzazione dei costi del personale rappresenta, anche per gli

addetti ai lavori, un'operazione non sempre facile e spesso fonte di dubbi: la presente guida ha l'obiettivo di illustrare, in maniera semplice e mediante l'ausilio di esempi pratici, come contabilizzare il costo del personale, evitando problematiche legate al non corretto appostamento delle voci nel bilancio di esercizio - soprattutto in presenza di eventi particolari, come la malattia, gli infortuni e così via - e alle conseguenti ripercussioni, in termini di imposizione fiscale. In virtù di questa considerazione, al fine di appostare correttamente tutte quelle voci di bilancio utili al calcolo delle imposte, è necessario valutare gli aspetti relativi agli oneri contributivi ed assicurativi, al fine dell'eventuale deduzione dalla base imponibile IRAP. La disamina, alle cui fundamenta

soggiacciono i principi contabili, si caratterizza per il gran numero di esempi - che, di fatto, rappresentano una sintesi delle casistiche più comuni che possono incontrarsi in azienda - volti a consentire un rapido approccio al lettore, soprattutto in quelle situazioni di particolare urgenza, come nel caso di dover calcolare il costo per esigenze di budget. Viene, infine, proposto un caso concreto di contabilizzazione del costo, partendo dal cosiddetto "cedolone", vale a dire il riassunto avvenuto nel periodo di lavoro considerato. Fantasy writing, like literature in general, provides a powerful vehicle for challenging the status quo. Via symbolism, imagery and supernaturalism, fantasy constructs secondary-world narratives that both mirror and critique the political paradigms of our own world. This critical work explores the role of the portal in fantasy, investigating the ways in which magical nexus points and movement between worlds are used to illustrate real-world power dynamics, especially those impacting women and children. Through an examination of high and low

fantasy, fairy tales, children's literature, the Gothic, and science fiction, the portal is identified as a living being, place or magical object of profound metaphorical and cultural significance.

Spanning eight decades and chronicling the wild ride of a Greek-American family through the vicissitudes of the twentieth century, Jeffrey Eugenides' witty, exuberant novel on one level tells a traditional story about three generations of a fantastic, absurd, lovable immigrant family -- blessed and cursed with generous doses of tragedy and high comedy. But there's a provocative twist. Cal, the narrator -- also Callie -- is a hermaphrodite. And the explanation for this takes us spooling back in time, through a breathtaking review of the twentieth century, to 1922, when the Turks sacked Smyrna and Callie's grandparents fled for their lives. Back to a tiny village in Asia Minor where two lovers, and one rare genetic mutation,

set our narrator's life in motion.

Middlesex is a grand, utterly original fable of crossed bloodlines, the intricacies of gender, and the deep, untidy promptings of desire. It's a brilliant exploration of divided people, divided families, divided cities and nations -- the connected halves that make up ourselves and our world.

“..this most thorough commentary must be regarded as the Bible on the Charter” Peter Oliver, Common Market Law Review This second edition of the first commentary of the EU Charter of Fundamental Rights in English, written by experts from several EU Member States, provides an authoritative but succinct statement of how the Charter impacts upon EU, domestic and international law. Following the conventional article-by-article approach, each commentator offers an expert view of how each article is either already being interpreted in the courts, or is likely to be interpreted. Each commentary is referenced to the case law and is augmented with extensive references to further reading. This is a much-welcomed new edition of the

Seemingly the most fantastical of television series, Buffy the Vampire Slayer proves on close examination to be firmly rooted in real-world concerns. In this collection of critical essays, 15 authors from several disciplines,

including literature, the visual arts, theatre, philosophy, and political science, study ways in which Buffy illuminates viewers' real-life experiences. Topics include the series' complicated portrayals of the relationship between soul, morality, and identity; whether Buffy can truly be described as a feminist icon; stereotypes of Native Americans in the episode "Pangs"; the role of signs in the interaction between Buffy's aesthetics and audience; and the problem of power and underhanded politics in the Buffy universe.

The Facts, the Figures, the Knowledge Oxford University Press, USA

In the past decade, few subjects at the intersection of medicine and sports have generated as much public interest as sports-related concussions - especially among youth. Despite growing awareness of sports-related concussions and campaigns to educate athletes, coaches, physicians, and parents of young athletes about concussion recognition and management, confusion and controversy persist in many areas. Currently, diagnosis is based primarily on the symptoms reported by the individual rather than on objective

diagnostic markers, and there is little empirical evidence for the optimal degree and duration of physical rest needed to promote recovery or the best timing and approach for returning to full physical activity. Sports-Related Concussions in Youth: Improving the Science, Changing the Culture reviews the science of sports-related concussions in youth from elementary school through young adulthood, as well as in military personnel and their dependents. This report recommends actions that can be taken by a range of audiences - including research funding agencies, legislatures, state and school superintendents and athletic directors, military organizations, and equipment manufacturers, as well as youth who participate in sports and their parents -

to improve what is known about concussions and to reduce their occurrence. Sports-Related Concussions in Youth finds that while some studies provide useful information, much remains unknown about the extent of concussions in youth; how to diagnose, manage, and prevent concussions; and the short- and long-term consequences of concussions as well as repetitive head impacts that do not result in concussion symptoms. The culture of sports negatively influences athletes' self-reporting of concussion symptoms and their adherence to return-to-play guidance. Athletes, their teammates, and, in some cases, coaches and parents may not fully appreciate the health threats posed by concussions. Similarly, military recruits are immersed in a

culture that includes devotion to duty and service before self, and the critical nature of concussions may often go unheeded. According to Sports-Related Concussions in Youth, if the youth sports community can adopt the belief that concussions are serious injuries and emphasize care for players with concussions until they are fully recovered, then the culture in which these athletes perform and compete will become much safer. Improving understanding of the extent, causes, effects, and prevention of sports-related concussions is vitally important for the health and well-being of youth athletes. The findings and recommendations in this report set a direction for research to reach this goal.
