forms of capital structure change are examined: issuer exchange offers, and recapitalizations. The results indicate that both stock prices and firm values are positively related to changes in debt level and leverage; senior security prices are negatively related to these capital structure change variables. This evidence is
The Impact of Capital Structure Change on Firm Value: Some ...
Capital structure maximizes the market value of a firm, i.e. in a firm having a properly designed capital structure the aggregate value of the claims and ownership interests of the shareholders are maximized.
Cost Minimization: Capital structure minimizes the firm's cost of capital or cost of financing.
Capital Structure: Concept, Definition and Importance
The authors hypothesize that there is a negative relationship between capital structure and firm performance. To examine the association, the authors run a Pearson correlation and multiple regression analysis. Results of this study reveals that there is a significant negative relationship between leverage and firm performance (ROA, ROCE), strong negative relationship between liquidity and firm performance and highly significant positive relationship between size and the firm performance.
