The *Jaws Book: New Perspectives on the Classic Summer Blockbuster* is an exciting illustrated collection of new critical essays that offers the first detailed and comprehensive overview of the film's significant place in cinema history. Bringing together established and young scholars, the book includes contributions from leading international writers on popular cinema including Murray Pomerance, Peter Krämer, Sheldon Hall, Nigel Morris and Linda Ruth Williams, and covers such diverse

topics as the film's release, reception and canonicity; its representation of masculinity and children; the use of landscape and the ocean; its status as a western; sequels and fan-edits; and its galvanizing impact on the horror film, action movie and contemporary Hollywood itself.

This book examines performances in the American film industry's highest-earning and most influential films. Countering decades of discourse and the conventional notion that special effects are the real stars of Hollywood blockbusters, this book finds that the acting performances in these big-budget action movies are actually better, and more genre-appropriate, than reputed. It argues that while blockbusters are often edited for speed, thrills, and simplicity, and performances are sometimes tailored to this style, most major productions feature more scenes of stage-like acting than hyper-kinetic action. Knowing this, producers of the world's highest-budgeted motion pictures usually cast strong or generically appropriate actors. With chapters offering unique readings of some of cinema's biggest hits, such as *The Dark Knight*, *Pirates of the Caribbean*, *Star Wars*, *Iron Man* and *The Hunger Games*, this unprecedented study sheds new light on the importance of performance in the Hollywood blockbuster.

It's a typical summer Friday night and the smell of popcorn is in the air. Throngs of fans jam into air-conditioned multiplexes to escape for two hours in the dark, blissfully lost in Hollywood's latest glittery confection complete with megawatt celebrities, awesome special effects, and enormous marketing budgets. The world is in love with the blockbuster movie, and these cinematic behemoths have risen to dominate the film industry, breaking box office records every weekend. With the passion and wit of a true movie buff and the insight of an internationally renowned critic, Tom Shone is the first to make sense of this phenomenon by taking readers through the decades that have shaped the modern blockbuster and forever transformed the face of Hollywood. The moment the shark fin broke the water in 1975, a new monster was born. Fast, visceral, and devouring all in its path, the blockbuster had arrived. In just a few weeks *Jaws* earned more than \$100 million in ticket sales, an unprecedented feat that heralded a new era in film. Soon, blockbuster auteurs such as Steven Spielberg, George Lucas, and James Cameron would revive the flagging fortunes of the studios and lure audiences back into theaters with the promise of thrills, plenty of action, and an escape from art house pretension. But somewhere along the line, the beast they awakened took on a life of its own, and by the 1990s production budgets had escalated as quickly as profits.

Hollywood entered a topsy-turvy world ruled by marketing and merchandising mavens, in which flops like *Godzilla* made money and hits had to break records just to break even. The blockbuster changed from a major event that took place a few times a year into something that audiences have come to expect weekly, piling into the backs of one another in an annual demolition derby that has left even Hollywood aghast. Tom Shone has interviewed all the key participants -- from cinematic visionaries like Spielberg and Lucas and the executives who greenlight these spectacles down to the effects wizards who detonated the *Death Star* and blew up the White House -- in order to reveal the ways in which blockbusters have transformed how Hollywood makes movies and how we watch them. As entertaining as the films it chronicles, *Blockbuster* is a must-read for any fan who delights in the magic of the movies.

Can blockbuster films be socially relevant or are they just escapist diversions to entertain the masses and enrich the studios? Not every successful film contains thoughtful commentary, but some that are marketed as pure entertainment do seriously engage social issues. Popular science fiction films of the late 1970s and early 1980s-- such as George Lucas' *Star Wars* trilogy, Ridley Scott's *Alien* and *Aliens*, and James Cameron's *Terminator* films-- present a critique of our engagement with technology in a way that resonates with 1960s counterculture. As challengers of the status quo's technological underpinnings, Luke Skywalker, Ellen Ripley and Sarah Connor echo the once-popular social criticism of philosopher Herbert Marcuse

and speak directly to the concerns of people living in a technologically complex society. The films of Lucas, Scott and Cameron made money but also made us think about the world we live in.

How does an iconic brand die? For more than two decades, Blockbuster was America's favorite way to watch movies. Millions of customers visited more than eight thousand stores around the globe every week, providing more data about movie audiences than anyone in history had ever owned. If any company should have predicted the disruptive forces coming down the pike, it was Blockbuster. But as new threats emerged, none of its five CEOs had answers, and the company collapsed long before its time. *Built to Fail* tells the complete inside story of Blockbuster's meteoric rise and catastrophic fall. Beneath the surface of explosive growth lay a shaky foundation of financial difficulty, tunnel vision, and missed opportunities. Written by Alan Payne, the man who built the longest-lasting Blockbuster franchise chain in the country, *Built to Fail* is a cautionary tale for today's disruptive marketplace, explaining why Blockbuster was a broken company long before Netflix ever streamed a single movie.

Ben-Hur (1959), Jaws (1975), Avatar (2009), Wonder Woman (2017): the blockbuster movie has held a dominant position in American popular culture for decades. In *American Blockbuster* Charles R. Acland charts the origins, impact, and dynamics of this most visible, entertaining, and disparaged cultural form. Acland narrates how blockbusters emerged from Hollywood's turn to a hit-driven focus during the industry's business crisis in the 1950s. Movies became bigger, louder, and more spectacular. They also became prototypes for ideas and commodities associated with the future of technology and culture, accelerating the

prominence of technological innovation in modern American life. Acland shows that blockbusters continue to be more than just movies; they are industrial strategies and complex cultural machines designed to normalize the ideologies of our technological age. Blockbuster Rutgers University Press Before there was Arthur Conan Doyle's Sherlock Holmes, there was Fergus Hume's *The Mystery of a Hansom Cab*—the biggest- and fastest-selling detective novel of the 1800s, and Australia's first literary blockbuster. Fergus Hume was an aspiring playwright when he moved from Dunedin to Melbourne in 1885. He wrote *The Mystery of a Hansom Cab* with the humble hope of bringing his name to the attention of theatre managers. The book sold out its first run almost instantly and it became a runaway word-of-mouth phenomenon—but its author sold the copyright for a mere fifty pounds, missing out on a potential fortune. *Blockbuster!* is the engrossing story of a book that would help define the genre of crime fiction, and a portrait of a great

city in full bloom. Rigorously researched and full of arresting detail, this captivating book is a must-read for all fans of true crime, history and crime fiction alike.

The consumer videocassette recorder (VCR) was first introduced in the United States as a timeshifting device for recording and playing back broadcast television, but within a decade this use was overshadowed by the wildly popular rental and sale of motion pictures on video. This dissertation charts the invention and establishment of this alternate technological frame, describing how a technology that was originally intended as a peripheral to broadcast television was reconstructed as a "movie machine." The argument has two main thrusts: first, that because the information being mediated by a communication technology is an integral part of its technological frame, this new understanding of the VCR required the production of new knowledge not just about the nature of the machine but also about the movies that it played; and second, that this new knowledge was mainly produced not by the manufacturers of movies and VCRs nor by their end-users, but rather by the mediators who occupied the space between them. As retailers, distributors, clerks and other mediators built a new consumption junction between

Hollywood studios, hardware manufacturers and consumers, they quite literally built a new cultural institution, the "video store," that was a physical manifestation of their new technological frame for the VCR.

Although the blockbuster is the most popular and commercially successful type of filmmaking, it has yet to be studied seriously from a formalist standpoint. This is in opposition to classical Hollywood cinema and International Art cinema, whose form has been analyzed and deconstructed in great detail. Directed By Steven Spielberg fills this gap by examining the distinctive form of the blockbuster. The book focuses on Spielberg's blockbusters, because he is the most consistent and successful director of this type of film - he defines the standard by which other Hollywood blockbusters are judged and compared. But how did Spielberg attain this position? Film critics and scholars generally agree that Spielberg's blockbusters have a unique look and use visual storytelling techniques to their utmost effectiveness. In this book, Warren Buckland examines Spielberg's distinct manipulation of film form, and his singular use of stylistic and narrative techniques. The book demonstrates the aesthetic options available to Spielberg, and particularly the choices he makes in structuring his blockbusters. Buckland emphasizes the director's activity in making a film (particularly such a powerful director as Spielberg), including: visualizing the scene on paper via storyboards; staging and blocking the scene; selecting camera placement and movement; determining the progression or flow of the film from shot to shot; and deciding how to narrate the story to the

spectator. Directed By Steven Spielberg combines film studies scholarship with the approach taken by many filmmaking manuals. The unique value of the book lies in its grounding of formal film analysis in filmmaking.

For this revised edition of *Writing the Blockbuster Novel*, Zuckerman has added an analysis of Nora Roberts's *The Witness*, which he uses along with classic books like *Gone With the Wind* and *The Godfather*, to illustrate his points. Zuckerman's commentary on Ken Follett's working outlines for *The Man From St. Petersburg* provide a blueprint for building links between plot and character. A new introduction discusses social media and self-publishing. *Writing the Blockbuster Novel* is an essential tool for any aspiring author. decades ago a book that in many ways changed my life. I was halfway through writing my first novel when I was given a copy of Writing the Blockbuster Novel. [Zuckerman's] book helped me complete my manuscript and get it published. [When] I met Mr. Zuckerman for the first time. I gratefully told him that he had helped me. Seeking to rebuild the Russian film industry after its post-Soviet collapse, directors and producers sparked a revival of nationalist and patriotic sentiment by applying Hollywood techniques to themes drawn from Russian history. Unsettled by the government's move toward market capitalism, Russians embraced these historical blockbusters, packing the American-style multiplexes that sprouted across the country. Stephen M. Norris examines the connections among cinema, politics, economics, history, and patriotism in the creation of "blockbuster history"—the adaptation of an American cinematic style to Russian historical epics.
