LAMBERT CAROLYN

Building Resilient Cities MIT Press

The third edition of *Online Journalism* builds on the foundations of journalism to clearly show how they can be integrated into online environments. It takes the perspective that web content shouldn't be a separate component or an afterthought but instead is a vital part of story creation. From doing research to creating the web space, to posting and getting stories into the hands of users, this useful resource gives students the tools they need. *Online Journalism* readies readers for wherever their news careers take them, whether it's to the online portion of legacy news organizations, to online-only startups, or to blogs, news apps and beyond. Key features include a companion website, practical activities at the end of each chapter, screenshots illustrating key concepts and a Glossary.

Electoral Dynamics in Indonesia SAP PRESS

Most managers today understand the value of building a learning organization. Their goal is to leverage knowledge and make it a key corporate asset, yet they remain uncertain about how best to get started. What they lack are guidelines and tools that transform abstract theory—the learning organization as an ideal—into hands-on implementation. For the first time in *Learning in Action*, David Garvin helps managers make the leap from theory to proven practice. Garvin argues that at the heart of organizational learning lies a set of processes that can be designed, deployed, and led. He starts by describing the basic steps in every learning process—acquiring, interpreting, and applying knowledge—then examines the critical challenges facing managers at each of these stages and the various ways the challenges can be met. Drawing on decades of scholarship and a wealth of examples from a wide range of fields, Garvin next introduces three modes of learning—intelligence gathering, experience, and experimentation—and shows how each mode is most effectively deployed. These approaches are brought to life in complete, richly detailed case studies of learning in action at organizations such as Xerox, L. L. Bean, the U. S. Army, and GE. The book concludes with a discussion of the leadership role that senior executives must play to make learning a day-to-day reality in their organizations.

Brain Gym Duke University Press

Heutagogy, or self-determined learning, redefines how we understand learning and provides some exciting opportunities for educators. It is a novel approach to educational practice, drawing on familiar concepts such as constructivism, capability, andragogy and complexity theory. Heutagogy is also supported by a substantial and growing body of neuroscience research. *Self-Determined Learning* explores how heutagogy was derived, and what this approach to learning involves, drawing on recent research and practical applications. The editors draw together contributions from educators and practitioners in different fields, illustrating how the approach can be used and the benefits its use has produced. The subjects discussed include: the nature of learning, heutagogy in the classroom, flexible curriculum, assessment, e-learning, reflective learning, action learning and

research, and heutagogy in professional practice settings.

Managing Knowledge Creation, Acquisition, Sharing, and Transformation Asian Development Bank
A text for tourism students, presenting a four-part model of the tourism system that encompasses demand, travel, destination, and marketing. Concepts and theories from disciplines such as psychology, economics, and planning are incorporated into material. Topics include characteristics of travelers

Developing an Effective Evaluation Plan BSAVA

This book is a landmark contribution to the rapidly growing field of wildlife tourism, especially in regard to its underpinning foundations of science, conservation and policy. Written by a number of environmental and biological scientists it explains the synergy between wildlife and tourism by drawing on their global experiences.

Reframing teachers' professional learning and development Channel View Publications

Leading practitioners and management scientists identify and discuss the key issues affecting the management of interdisciplinary research. The intention of this collection of papers is to capture the main themes discussed, to illustrate the variety of activity in the field, and to bring out and clarify important issues of method and practice.

Self-Determined Learning Random House India

Investing in Resilience: Ensuring a Disaster-Resistant Future focuses on the steps required to ensure that investment in disaster resilience happens and that it occurs as an integral, systematic part of development. At-risk communities in Asia and the Pacific can apply a wide range of policy, capacity, and investment instruments and mechanisms to ensure that disaster risk is properly assessed, disaster risk is reduced, and residual risk is well managed. Yet, real progress in strengthening resilience has been slow to date and natural hazards continue to cause significant loss of life, damage, and disruption in the region, undermining inclusive, sustainable development. *Investing in Resilience* offers an approach and ideas for reflection on how to achieve disaster resilience. It does not prescribe specific courses of action but rather establishes a vision of a resilient future. It stresses the interconnectedness and complementarity of possible actions to achieve disaster resilience across a wide range of development policies, plans, legislation, sectors, and themes. The vision shows how resilience can be accomplished through the coordinated action of governments and their development partners in the private sector, civil society, and the international community. The vision encourages “investors” to identify and prioritize bundles of actions that collectively can realize that vision of resilience, breaking away from the current tendency to pursue disparate and fragmented disaster risk management measures that frequently trip and fall at unforeseen hurdles. *Investing in Resilience* aims to move the disaster risk reduction debate beyond rhetoric and to help channel commitments into investment, incentives, funding, and practical action

Revised and Expanded IGI Global

This brand new Manual focuses on soft tissue surgery of the head, neck and thorax. Together with its companion volume, the BSAVA Manual of Canine and Feline Abdominal Surgery, it highlights for

the veterinary surgeon in general practice the most commonly performed techniques. Procedures that are undertaken by those surgeons with more experience are also discussed so that practitioners can better inform their clients as to clinical options. The Manual begins with a consideration of general patient assessment and stabilization, anaesthesia and analgesia, and postoperative care for surgical conditions of the head, neck and thorax. An illustrated description of surgical instruments and materials follows. Chapters on different organs/systems consider relevant anatomy, clinical signs and diagnostics, and medical treatment in addition to surgical techniques. Emergency management of respiratory distress is described, including instructions on how to perform an emergency tracheostomy. Surgical approaches to the thoracic wall and drainage of the thoracic cavity are described in detail and illustrated. Step-by-step Operative Techniques detail the common procedures in an easy-to-follow practical way, with notes on patient positioning and preparation, instrumentation and postoperative care. Full-colour photographs and specially commissioned drawings illustrate both the Operative Techniques and the accompanying text. Surgical diseases of the head, neck and thorax are considered a challenge by many surgeons. This Manual, written by an international panel of authors, serves to demystify common techniques and provide a firm foundation for further development of surgical skills.

Money Politics, Patronage and Clientelism at the Grassroots OECD

Promoting organizational knowledge is an important consideration for any business looking toward the future. Understanding the dynamics of knowledge-intensive organizations is a crucial first step in establishing a strong knowledge base for any organization. *Organizational Knowledge Dynamics: Managing Knowledge Creation, Acquisition, Sharing, and Transformation* introduces the idea that organizational knowledge is composed of three knowledge fields: cognitive knowledge, emotional knowledge, and spiritual knowledge. This book is useful for graduate students, researchers, and practitioners in knowledge management, intellectual capital, human resources management, change management, and strategic management.

Business User Guide Routledge

Researchers finally have a resource that focuses on the research question, providing them with a unique approach that will help in the field. Key Ideas sections presented in each chapter act as an organising mechanism and look at the big picture of that chapter. Many of the writing activities are open-ended questions that allow them to write questions or what they are thinking about the topic at that point. In-Text Activities ask them to write down what they are working on, such as a research question, review of literature, or potential sample. Case study examples are also integrated throughout to demonstrate how decisions are made and how they affect everything in a study. This enables researchers to create the most effective studies.

The Art of War Edu Kinesthetics

A great book for anyone hoping to improve their basic Indonesian, learn Javanese, or as a comprehensive reference for skilled speakers. Contains a large number of topics related to life in Indonesia. Ideal for expats and travelers of all kinds: teachers; gov, NGO, or military personnel; businessmen; or anyone interested in Indonesia. Topics include village life, food, medicine, religion, tools, repairs, the military, education, terrorism, and many more.

Educational Research Taylor & Francis

In this book researchers investigate what happened after violent protests all over the country had forced President Suharto to step down in 1998 and Indonesia successfully made the transition from an authoritarian state to a democracy. This title was made Open Access by libraries from around the world through Knowledge Unlatched.

The Tourism System IGI Global

The Internet of Things is a technological revolution that represents the future of computing and communications. Even though efforts have been made to standardize Internet of Things devices and how they communicate with the web, a uniform architecture is not followed. This inconsistency directly impacts and limits security standards that need to be put in place to secure the data being exchanged across networks. *Cryptographic Security Solutions for the Internet of Things* is an essential reference source that discusses novel designs and recent developments in cryptographic security control procedures to improve the efficiency of existing security mechanisms that can help in securing sensors, devices, networks, communication, and data in the Internet of Things. With discussions on cryptographic algorithms, encryption techniques, and authentication procedures, this book is ideally designed for managers, IT consultants, startup companies, ICT procurement managers, systems and network integrators, infrastructure service providers, students, researchers, and academic professionals.

Indonesian & Javanese for Professionals Landlinks Press

In recent years, the academy has undergone significant changes: a more competitive and volatile job market has led to widespread precarity, teaching and service loads have become more burdensome, and higher education is becoming increasingly corporatized. In this revised and expanded edition of *The Academic's Handbook*, more than fifty contributors from a wide range of disciplines and backgrounds offer practical advice for academics at every career stage, whether they are first entering the job market or negotiating the post-tenure challenges of leadership and administrative roles. Contributors affirm what is exciting and fulfilling about academic work while advising readers about how to set and protect boundaries around their energy and labor. In addition, the contributors tackle topics such as debates regarding technology, social media, and free speech on campus; publishing and grant writing; attending to the many kinds of diversity among students, staff, and faculty; and how to balance work and personal responsibilities. A passionate and compassionate volume, *The Academic's Handbook* is an essential guide to navigating life in the academy. Contributors. Luis Alvarez, Steven Alvarez, Eladio Bobadilla, Genevieve Carpio, Marcia Chatelain, Ernesto Chávez, Miroslava Chávez-García, Nathan D. B. Connolly, Jeremy V. Cruz, Cathy N. This book consists of a selection of papers that discuss the challenges in the increasingly complex world of education and various educational problems such as moral degradation, lack of literacy, pedagogical curriculum and innovation, educational technology. Moreover, the book provides papers that deal with educational innovation in the era of Society 5.0, with a view to discuss and resolve various social challenges, issues, and problems relating to educators, students, the dynamics of the education system, and social dynamics. The subject areas treated in this book are: Character Education in Society 5.0 Era, Multiliteracy Education in Society 5.0 Era, Early Childhood Education in Society 5.0 Era, Inclusive Education in Society 5.0 Era, Curriculum, Media and Educational Technology for Primary Education in Society 5.0 Era, Joyful and Meaningful Learning in Society 5.0 Era, and HOTS in Society 5.0 Era. This book will help educators, stakeholders, and also parents to cope with the challenges in education.

Progress, Challenges, and Issues Ian Randle Publishers

Asian cities are particularly vulnerable to risks associated with natural disasters. While they are exposed to various types of natural hazards, flooding and other water-related disasters pose particularly significant risks and undermine long-term economic growth, especially in coastal cities. Managing such natural disaster risks is an essential component of urban policies in fast-growing Southeast Asian cities, especially as the impacts of climate change worsen. In addition to providing a framework for assessing disaster risk management policies in cities, this report also presents the results of assessment and locally tailored policy recommendations in five cities of different institutional, geographic, socio-economic and environmental contexts in Southeast Asia. They include Bandung (Indonesia), Bangkok (Thailand), Cebu (Philippines), Hai Phong (Viet Nam) and Iskandar (Malaysia). The study highlights that Southeast Asian cities are largely underprepared for natural disaster risks. Through an assessment of disaster risk management (DRM) policies at national and subnational levels, the study aims to enhance urban resilience by: i) identifying policy challenges related to DRM ; ii) assessing the impacts of current DRM policy practices; and iii) proposing more efficient and effective policy options to enhance urban resilience.
