The Counseling Skills Practice Manual is a practical guide for students who are working on improving their counseling skills. Designed as a companion to The Essential Counselor and its accompanying DVD of professionally demonstrated skills, this manual works directly with the student, offering a discussion of each skill set along with examples and practice exercises. The manual features 12 practice sessions, each of which focuses on a specific counseling skill set. Many of the essential skills are covered, such as using questions, nonverbal behaviors, making reflections of

client meaning, and feeling. But the student also gains practice here with other important skills, such as learning how to deal with clients in crisis and reluctant clients, how to appropriately confront, and how to give and receive accurate and supportive feedback to one another. These practice sessions are designed to help the students recognize and build upon their natural interpersonal skill set as they learn new skills. They will help students become more competent in their use of counseling skills and feel more comfortable and confident in their roles as emerging counseling professionals.
