The Cambridge History of Western Music Theory is the first comprehensive history of Western music theory to be published in the English language. A collaborative project by leading music theorists and historians, the volume traces the rich panorama of music-theoretical thought from the Ancient Greeks to the present day. Recognizing the variety and complexity of music theory as an historical subject, the volume has been organized within a flexible framework. Some chapters are defined chronologically within a restricted historical domain, whilst others are defined conceptually and span longer historical periods. Together the thirty-one chapters present a synthetic overview of the fascinating and complex subject that is historical music theory. Richly enhanced with illustrations, graphics, examples and cross-citations as

well as being thoroughly indexed and supplemented by comprehensive bibliographies of the most important primary and secondary literature, this book will be an invaluable resource for students and scholars alike.

 Was Franco sympathetic to Nazi Germany? Why didn't Spain enter World War II? In what ways did Spain collaborate with the Third Reich? How much did Spain assist Jewish refugees? This is the first book in any language to answer these intriguing questions. Stanley Payne, a leading historian of modern Spain, explores the full range of Franco's relationship with Hitler, from 1936 to the fall of the Reich in 1945. But as Payne brilliantly shows, relations between these two dictators were not only a matter of realpolitik. These two titanic egos engaged in an extraordinary tragicomic drama often verging on the dark absurdity of a Beckett or Ionesco play. Whereas Payne investigates the evolving relationship of the two regimes up to the conclusion of World War II, his principal concern is the enigma of Spain's unique position during the war, as a semi-fascist country struggling to maintain a tortured neutrality. Why Spain did not enter the war as a German ally, joining with Hitler to seize Gibraltar and close the Mediterranean to the British navy, is at the center of Payne's narrative. Franco's only

personal meeting with Hitler, in 1940 to discuss precisely this, is recounted here in groundbreaking detail that also sheds significant new light on the Spanish government's vacillating policy toward Jewish refugees, on the Holocaust, and on Spain's German connection throughout the duration of the war.

Beyond Doctorates Downunder is the third book in the highly successful Doctorates Downunder trilogy published by ACER Press. Doctorates Downunder (2006) helps candidates complete their doctorates and Supervising Doctorates Downunder (2007) helps supervisors with their vital tasks to assist candidates during research training. This third book is designed to assist doctoral graduates use their doctorates in their lives and careers, and is designed as a comprehensive guide to maximizing the benefits of completing a doctorate and communicating its research. Beyond Doctorates Downunder is written for candidates in their final year of doctoral study and for doctoral graduates in their first five years after completion. The 27 chapters are clustered around the key

steps in finalizing the doctoral process: concluding and reflecting, learning from experience, result production, strategic planning, and setting the course for the first five years after graduation. Thirty three contributors from universities, enterprise, consultancy, government, and other professions in Australia and Aotearoa/New Zealand have produced clear and engaging chapters on how pending and recent doctoral graduates can ensure that they and the community will benefit from their doctorates. Australian Council for Educational Stemmatology studies aspects of textual criticism that use genealogical methods to analyse a set of copies of a text whose autograph has been lost. This handbook is the first to cover the entire field, encompassing both theoretical and practical aspects of traditional as well as modern digital methods and their history. As an art (ars), stemmatology's main goal is editing and thus presenting to the reader a historical text in the most satisfactory way. As a more abstract discipline (scientia), it is interested in the general principles of how texts change in the process of being copied. Thirty eight

experts from all of the fields involved have joined forces to write this handbook, whose eight chapters cover material aspects of text traditions, the genesis and methods of traditional "Lachmannian" textual criticism and the objections raised against it, as well as modern digital methods used in the field. The two concluding chapters take a closer look at how this approach towards texts and textual criticism has developed in some disciplines of textual scholarship and compare methods used in other fields that deal with "descent with modification". The handbook thus serves as an introduction to this interdisciplinary field.

A comprehensive portrayal of the life and

Op. 7, for Piano Solo Alfred's Sacred Performer Coll

This is the first comprehensive study of the trombone in English. It covers the instrument, its repertoire, the way it has been played, and the social, cultural, and aesthetic contexts within which it has developed. The book explores the origins of the instrument, its invention in the fifteenth century, and its story up to modern times, also revealing hidden aspects of the trombone in different eras and countries. The book looks not only at the trombone within classical music but also at its place in jazz, popular music, popular religion, and light music. Trevor Herbert examines each century of the trombone's development and details the fundamental impact of jazz on the modern trombone. By the late twentieth century, he shows, jazz techniques had filtered into the performance idioms of almost all styles of music and transformed ideas about virtuosity and lyricism in trombone playing.

This volume, published in the year of the one hundredth anniversary of Bonhoeffer's

birth, documents Bonhoeffer's life under the increasing restraints and fateful events of World War II Germany. In hundreds of letters, including ten never-before-published letters to his fiancée, Maria von Wedemeyer, as well as official documents, short original pieces, and a few final sermons, the volume sheds light on Bonhoeffer's active resistance to and increasing involvement in the conspiracy against the Hitler regime, his arrest, and his long imprisonment. Finally, Bonhoeffer's many exchanges with his family, fiancée, and closest friends, demonstrate the affection and solidarity that accompanied Bonhoeffer to his prison cell, concentration camp, and eventual death.

Gretchaninov started his musical studies rather late because his father, a businessman, had expected him to take over the family firm. Gretchaninov began his studies at the Moscow Conservatory in 1881, later moving to St. Petersburg where he studied composition and orchestration with Nikolai Rimsky-Korsakov until 1893. It is not surprising

that Rimsky's influence can be heard in Gretchaninov's early works. The Missa Festiva was not written until 1937. This is the choral score of the work, with Latin text, and without notated accompaniment.
