To properly tune, you MUST: 1. Have selected the BEST main jet for full throttle power (not just a "good" main jet - we mean "the BEST main jet" for power at high rpm). That eliminates the common severe tweaking of the midrange and lower tuning ranges to compensate for a "wrong" main jet. 2.CV Carb Tuning Procedures - Factory Pro Solution Check the air filter to see if it is blocked or dirty. Remove the filter and put in new plugs to see if idle improves Adjust the mixture screw to lean the mixture (see above on how to identify whether you have a fuel-mixture screw or... Install a smaller pilot jet. Move down to a marginally ...Mikuni Tuning and Jetting Guide - THE VINTAGE BIKE BUILDER Find the adjustment screws on the front of the carburetor. There should be two screws on the front of the carburetor, which are used to adjust the air and fuel mixture. Often these look like flat-head screws and you can use a screwdriver to turn them, adjusting the amount of fuel and air mixing in the carb. How to Adjust a Carburetor: 10 Steps (with Pictures) - wikiHow Here's our simple outline for basic tuning to get you started. 1) Idle Circuit: With your idle circuit, start at 1 1/2 to 2 turns out on the mixture screw and then wind your idle screw back to give a very slow idle whilst at operating engine temp with the bike upright. Tuning Tips & Manual Downloads | Mikunioz The pilot screw on your carb controls the idle to about 1/8 - 1/4 throttle position. The pilot screw, which is also made of brass, is long and skinny with a tapered end and a spring. It typically sits on the outside of the carb body. The exact location of the pilot screw will determine whether it controls the air flow or the fuel flow. Motorcycle Carb Tuning & Rejetting | MotorcycleZombies.com Mikuni Motorcycle Carburetor Theory 101 Motorcycle carburetors look very complex, but with a little theory, you can tune your bike for maximum performance. All carburetors work under the basic principle of atmospheric pressure. Atmospheric pressure is a powerful force which exerts pressure on everything. Mikuni carburetor operation and tuning H Type Carburettor:

Tuning (Multi-Carbs) Remove the air cleaners and carry out the instructions in item 1 (single units) on all carburetters then: 1. (a) Slacken one of the clamping bolts on the throttle spindle interconnections. (b) Disconnect the jet control linkage by removing one or, in the case of triple carburetters, two of the linkage swivel pins. Tuning - Multi - SU Carburetters Linkage Setup.
