twentieth century. *The Man Who Knew Infinity* New Press, The Khadi: Gandhi's Mega Symbol of Subversion investigates the power of a symbol to qualitatively transform society, studying Mahatma Gandhi's use of clothing as a metaphor for unity, empowerment and liberation from imperial subjugation. Bringing together historical evidence of Gandhi's search for a semiotics of attire in his quest for personal integrity and socio-political change, this book elaborates on the subversion underlying Gandhi's sartorial communication from a multidisciplinary perspective. It brings out the complexity of the issue in diverse contexts such as British Empire and the

Indian National Congress, Hindu-Muslim tension, the urban-rural divide, and Ambedkar and untouchability. *History of Indian Cinema* Disha Publications
 Now a film from Netflix India, this memorable novel confronts issues of sexuality in a changing society through a love triangle between a brother, sister, and their family's lodger. Recently adapted into a stunning Netflix film, *Cobalt Blue* is a tale of rapturous love and fierce heartbreak told with tenderness and unsparing clarity. Brother and sister Tanay and Anuja both fall in love with the same man, an artist lodging in their family home in Pune, in western India. He

seems like the perfect tenant, ready with the rent and happy to listen to their mother's musings on the imminent collapse of Indian culture. But he's also a man of mystery. He has no last name. He has no family, no friends, no history, and no plans for the future. When he runs away with Anuja, he overturns the family's lives. Translated from the Marathi by acclaimed novelist and critic Jerry Pinto, Sachin Kundalkar's elegantly wrought and exquisitely spare novel explores the disruption of a traditional family by a free-spirited stranger in order to examine a generation in transition. Intimate, moving, sensual, and wry in its portrait of young love, Cobalt Blue is a frank and

lyrical exploration of gay life in India that recalls the work of Edmund White and Alan Hollinghurst—of people living in emotional isolation, attempting to find long-term intimacy in relationships that until recently were barely conceivable to them. *The London Stock Exchange* Sankalp Publication

This book provides a fresh perspective on the importance of the Hindi media in India's political, social and economic transformation with evidence from the countryside and the cities. Accessed by more than forty percent of the public, it continues to play an important role in building political awareness and mobilising public

opinion. Instead of viewing the media as a singular entity, this book highlights its diversity and complexity to understand the changing dynamics of political communication that is shaped by the interactions between the news media, political parties and the public, and how various media forms are being used in a rapidly transforming environment. The book offers insights into how print, television, and digital media work together with, rather than in isolation from, each another to grasp the complexities of the emerging hybrid media environment and the future of mobilisation.

Douglas Bullis goes beyond the usual superficial accounts found in the usual import/export books and provides something truly unique: an in-depth analysis of what India needs from the rest of the world, not what the world can get out of India. What most businesspeople don't know, and what is crucial if they are to succeed in their transactions with India, is what India needs from them—and not always is this mere capital. Bullis describes the rise of India's middle class and consumer economy since 1991, and provides readers with what very few outsiders know: how India really works. The result is an essential resource for corporate

management in marketing, sales, strategic planning and investment, and important collateral reading for students and teachers of international business. Bullis argues that India has long been misunderstood by the West. Now, as the business climate goes global, India looms as the largest country in the world to embrace the market economy. As India emerges as a mass consumer market and a major low-cost manufacturing center, not only the Indian economy, but the world economy is likely to be changed. If overseas businesspeople are to enter India and compete successfully, they need a clear, broad, up-to-the-minute and useful view

of the country, its markets, its resources, and its people. In this book, Bullis provides just that.

The most popular book 'Manache Shlok or Manobodh' includes 205 shloka with 4 lines each. Since the 17th century, 'Manache Shlok are being recited by common people in Maharashtra. Many have learnt them by heart, since the style of shlokas is unique, easy, beautiful and simple, though artistic and meaningful.

Manache Shlok teaches your mind to change yourself gradually. The great saint Samartha Ramdas teaches us to have dialogue with our own mind. Your own

mind is your friend, your enemy and your own mind can be also your Guru. Find out the reasons of your anger, jealousy, greed, sorrow, depression, fear, because these are the negative emotions, which you have to face constantly in your life. Convince your mind with Ramdas's words as he says, "O you, my coward mind, why are you afraid of worldly sorrows? Get rid of fear and hold courage".

Appreciating Melodrama: Theory and Practice in Indian Cinema and Television seeks to identify and appreciate the continual influence of

the ancient Sanskrit drama treatise, the Natyashastra, and its theory of aesthetics, the rasa theory, on the unique narrative attributes of Indian cinema. This volume of work critically engages with a representative sample of landmark films from 100 years of Indian film history across genres, categories, regions and languages. This is the first time a case study-based rigorous academic review of popular Indian cinema is done using the Indian aesthetic appreciation theory of rasa (affect/emotion). It proposes a theoretical model for film appreciation, especially for content made in the melodramatic genre, and challenges existing First World/Euro-

American film criticism canons and notions that privilege cinematic 'realism' over other narrative forms, which will generate passionate debates for and against its propositions in future studies and research on films. This is a valuable academic reference book for students of film and theatre, world cinema and Indian cinema studies, South Asian studies and culture, Indology and the 'Sociology of Cinema' studies. It is a must-have reference text in the curriculum of both practical-oriented acting schools, as well as courses and modules focusing on a theoretical study of cinema, such as film criticism and appreciation, and the history of movies and

performance studies.

In 2001, the London Stock Exchange will be 200 years old, though its origins go back a century before that. This book traces the history of the London Stock Exchange from its beginnings around 1700 to the present day, chronicling the challenges and opportunities it has faced, avoided, or exploited over the years. Throughout, the history seeks to blend an understanding of the London Stock Exchange as an institution with that of the securities market of which it was - and is - such an important component. One cannot be examined satisfactorily without the other. Without a knowledge of both, for example, the causes of the 'Big Bang' of 1986

would forever remain a mystery. However, the history of the London Stock Exchange is not just worthy of study for what it reveals about the interaction between institution and market. Such was the importance of the London Stock Exchange that its rise to world dominance before 1914, its decline thereafter, and its renaissance from the mid-1980s, explain a great deal about Britain's own economic performance and the working of the international economy. For the first time a British economic institution of foremost importance is studied throughout its entire history, with regard to the roles played and the constraints under which it operated, and the results evaluated

against the background of world economic progress.
