No feminism or feminist philosophy without "A Vindication of the Rights of Woman". Wollstonecraft argues not only that women ought to have the education of a woman should fit her position and role in society, but also that they are human beings and thus deserve the same fundamental rights as men.

The story of hysteria is a curious one, for it persists as an illness for centuries before disappearing. Andrew Scull gives a fascinating account of this socially constructed disease that came to be strongly associated with women, showing the shifts in social, cultural, and medical perceptions through history.

London and the Making of Provincial Literature Penguin UK Best Book of Fall (Esquire) and a Most Anticipated Book of 2021 (Lit Hub) What Has Happened to Fiction in the Age of Platform Capitalism? Since it was first launched in 1994, Amazon has changed the world of literature. The "Everything Store" has not just transformed how we buy books; it has affected what we buy, and even what we read. In *Everything and Less*, acclaimed critic Mark McGurl explores this new world where writing is no longer categorized as high or lowbrow, literature or popular fiction.

Charting a course spanning from Henry James to E. L. James, McGurl shows that contemporary writing has less to do with writing per se than with the manner of its distribution. This consumerist logic—if you like this, you might also like ...—has reorganized the fiction universe so that literary prize-winners sit alongside fantasy, romance, fan fiction, and the infinite list of hybrid genres and self-published works. This is an innovation to be cautiously celebrated. Amazon's platform is not just a retail juggernaut but an aesthetic experiment driven by an unseen algorithm rivaling in the depths of its effects any major cultural shift in history. Here all fiction is genre fiction, and the niches range from the categories of crime and science fiction to the more refined interests of Adult Baby Diaper Lover erotica. *Everything and Less* is a hilarious and insightful map of both the commanding heights and sordid depths of fiction, past and present, that opens up an arresting conversation about why it is we read and write fiction in the first place.

The Dale Earnhardt Memorial Pilgrimage is the last trip Judge

Bekasu Holifield would have chosen for her vacation. But this year it's her sister Justine's turn to make their plans, and soon Bekasu's boarding a silver cruise bus for a tour of Southern stock car speedways with Justine, their cousin Cayle, and a group of strangers—all of whose lives have somehow been touched by the legendary racer they never met. . . For Shane McKee, the tour is a chance to get married at the speedway with his hero there in spirit. New York stockbroker Terence Palmer has made the trip to honor his only link with the father he never knew. Rev. Bill Knight, whose hobby is medieval pilgrimages, agrees to chaperone a dying child—and finds himself on a strangely familiar journey of faith and devotion. Bekasu begins connecting with her fellow travelers in unexpected ways. But she's not the only one. As the bus rolls down an uncertain road, prayers will be answered, secrets will be revealed, bonds will be forged, and no one will leave this journey of self-discovery quite the same.  NEW YORK TIMES EDITORS' CHOICE • Big Tobacco meets Silicon Valley in this "deeply reported and illuminating" (The New York Times Book Review) corporate exposé of what happened when two of the most notorious industries collided—and the vaping epidemic was born. "The best business book I've read since *Bad Blood*."—Jonathan Eig, New York Times bestselling author of *Ali: A Life* Howard Willard lusted after Juul. As the CEO of tobacco giant Philip Morris's parent company and a veteran of the industry's long fight to avoid being regulated out of existence, he grew obsessed with a prize he believed could save his company—the e-cigarette, a product with all the addictive upside of the original without the same apparent health risks and bad press. Meanwhile, in Silicon Valley, Adam Bowen and James Monsees began working on a device that was meant to save lives and destroy Big Tobacco, but they ended up baking the industry's DNA into their invention's science and marketing. Ultimately, Juul's e-cigarette was so effective and so market-dominating that it put the company on a collision course with Philip Morris and sparked one of the most explosive public health crises in recent

memory. In a deeply reported account, award-winning journalist Lauren Etter tells a riveting story of greed and deception in one of the biggest botched deals in business history. Etter shows how Philip Morris's struggle to innovate left Willard desperate to acquire Juul, even as his own team sounded alarms about the startup's reliance on underage customers. And she shows how Juul's executives negotiated a lavish deal that let them pocket the lion's share of Philip Morris's \$12.8 billion investment while government regulators and furious parents mounted a campaign to hold the company's feet to the fire. *The Devil's Playbook* is the inside story of how Juul's embodiment of Silicon Valley's "move fast and break things" ethos wrought havoc on American health, and how a beleaguered tobacco company was seduced by the promise of a new generation of addicted customers. With both companies' eyes on the financial prize, neither anticipated the sudden outbreak of vaping-linked deaths that would terrorize a nation, crater Juul's value, end Willard's career, and show the costs in human life of the rush to riches—while Juul's founders, board members, and employees walked away with a windfall. "[A work of] wit, wisdom and richness. . . . A grand tour of derangement, from matricide to anorexia." —John Leonard,

Harper's This fascinating history of mind doctors and their patients probes the ways in which madness, badness, and sadness have been understood over the last two centuries. Lisa Appignanesi charts a story from the days when the mad were considered possessed to our own century when the official psychiatric manual lists some 350 mental disorders. Women play a key role here, both as patients—among them Virginia Woolf, Sylvia Plath, and Marilyn Monroe—and as therapists. Controversially, Appignanesi argues that women have significantly changed the nature of mind-doctoring, but in the process they have also inadvertently highlighted new patterns of illness.

Poet, pattern-designer, environmentalist and maker of fine books, William Morris (1834-96) was also a committed socialist and visionary writer, obsessively concerned with the struggle to achieve a perfect society on earth. *News From Nowhere*, one of the most significant English works on the theme of utopia, is the tale of William Guest, a Victorian who wakes one morning to find himself in the year 2102 and discovers a society that has changed beyond recognition into a pastoral paradise, in which all people live in blissful equality and contentment. A socialist masterpiece, *News From Nowhere* is a vision of a future free from capitalism, isolation and industrialisation. This volume also contains a wide selection of Morris's writings, lectures, journalism and letters, which expand upon the key themes of *News From Nowhere*.

In the early nineteenth century, London publishers dominated the transatlantic book trade. No one felt this more keenly than authors from Ireland, Scotland, and the United States who struggled to establish their own national literary traditions while publishing in the English metropolis. Authors such as Maria Edgeworth, Sydney Owenson, Walter Scott, Washington Irving, and James Fenimore Cooper devised a range of strategies to transcend the national rivalries of the literary field. By writing prefaces and footnotes addressed to a foreign audience, revising texts specifically for London markets, and celebrating national particularity, provincial authors appealed to English readers with idealistic stories of cross-cultural communion. From within the messy and uneven marketplace for books, Joseph Rezek argues, provincial authors sought to exalt and purify literary exchange. In so doing, they helped shape the Romantic-era belief that literature inhabits an autonomous sphere in society. *London and the Making of Provincial Literature* tells an ambitious story about the mutual entanglement of the history of books and the history of aesthetics in the first three decades of the nineteenth century. Situated between local literary scenes and a distant cultural capital, enterprising provincial authors and publishers worked to maximize success in London and to burnish their reputations and

build their industry at home. Examining the production of books and the circulation of material texts between London and the provincial centers of Dublin, Edinburgh, and Philadelphia, Rezek claims that the publishing vortex of London inspired a dynamic array of economic and aesthetic practices that shaped an era in literary history.

A startling and profound exploration of how Jewish history is exploited to comfort the living. Renowned and beloved as a prizewinning novelist, Dara Horn has also been publishing penetrating essays since she was a teenager. Often asked by major publications to write on subjects related to Jewish culture—and increasingly in response to a recent wave of deadly antisemitic attacks—Horn was troubled to realize what all of these assignments had in common: she was being asked to write about dead Jews, never about living ones. In these essays, Horn reflects on subjects as far-flung as the international veneration of Anne Frank, the mythology that Jewish family names were changed at Ellis Island, the blockbuster traveling exhibition Auschwitz, the marketing of the Jewish history of Harbin, China, and the little-known life of the "righteous Gentile" Varian Fry. Throughout, she challenges us to confront the reasons why there might be so much fascination with Jewish deaths, and so little respect for Jewish lives unfolding in the present. Horn draws upon her travels, her research, and also her own family life—trying to explain Shakespeare's Shylock to a curious ten-year-old, her anger when swastikas are drawn on desks in her children's school, the profound perspective offered by traditional religious practice and study—to assert the vitality, complexity, and depth of Jewish life against an antisemitism that, far from being disarmed by the mantra of "Never forget," is on the rise. As Horn explores the (not so) shocking attacks on the American Jewish community in recent years, she reveals the subtler dehumanization built into the public piety that surrounds the Jewish past—making the radical argument that the benign reverence we give to past horrors is itself a profound affront to human dignity.

The golden age of cultural theory (the product of a decade and a half, from 1965 to 1980) is long past. We are living now in its aftermath, in an age which, having grown rich in the insights of thinkers like Althusser, Barthes and Derrida, has also moved beyond them. What kind of new, fresh thinking does this new era demand? Eagleton concludes that cultural theory must start thinking ambitiously again - not so that it can hand the West its legitimation, but so that it can seek to make sense of the grand narratives in which it is now embroiled.

Theory of Literature was born from the collaboration of René Wellek, a Vienna-born student of Prague School linguistics, and Austin Warren, an independently minded "old New Critic." Unlike many other textbooks of its era, however, this classic kowtows to

no dogma and toes no party line. Wellek and Warren looked at literature as both a social product--influenced by politics, economics, etc.--as well as a self-contained system of formal structures. Incorporating examples from Aristotle to Coleridge, written in clear, uncondescending prose, *Theory of Literature* is a work which, especially in its suspicion of simplistic explanations and its distrust of received wisdom, remains extremely relevant to the study of literature today.

A trailblazing, conversation-starting history of women's health—from the earliest medical ideas about women's illnesses to hormones and autoimmune diseases—brought together in a fascinating sweeping narrative. Elinor Cleghorn became an unwell woman ten years ago. She was diagnosed with an autoimmune disease after a long period of being told her symptoms were anything from psychosomatic to a possible pregnancy. As Elinor learned to live with her unpredictable disease she turned to history for answers, and found an enraging legacy of suffering, mystification, and misdiagnosis. In *Unwell Women*, Elinor Cleghorn traces the almost unbelievable history of how medicine has failed women by treating their bodies as alien and other, often to perilous effect. The result is an authoritative and groundbreaking exploration of the relationship between women and medical practice, from the "wandering womb" of Ancient Greece to the rise of witch trials across Europe, and from the dawn of hysteria as a catchall for difficult-to-diagnose disorders to the first forays into autoimmunity and the shifting understanding of hormones, menstruation, menopause, and conditions like endometriosis. Packed with character studies and case histories of women who have suffered, challenged, and rewritten medical orthodoxy—and the men who controlled their fate—this is a revolutionary examination of the relationship between women, illness, and medicine. With these case histories, Elinor pays homage to the women who suffered so strides could be made, and shows how being unwell has become normalized in society and culture, where women have long been distrusted as reliable narrators of their own bodies and pain. But the time for real change is long overdue: answers reside in the body, in the testimonies of unwell women—and their lives depend on medicine learning to listen.
