The new  
exhibition  
Tutankhamun  
and the  
Golden Age of  
the Pharaohs  
offers a  
unique insight  
into the art,  
wealth and  
power of  
Egypt's New  
Kingdom. This  
Rough Guide  
provides all  
the

background, with compelling details on the treasures and their discovery. Who was Tutankhamun ? From the opulence and riches of the royal court at Thebes, to the cult of the god Amun and the great heresy of Akhenaten, the extraordinary era of Tutankhamun's Egypt is explained. The full story of the Valley of the Kings is told, shedding light on why the royal tombs were built, who

built them, and how they were decorated, together with the significance of the treasures and the practice and processes of mummification. Fascinating background on Howard Carter and Lord Carnarvon, the discoverers of Tutankhamun's tomb, and on the fabled curse and its supposed victims. And a report on the CT scan of Tutankhamun's mummy, done in 2005 to reveal the

pharaoh's true cause of death.

### **Iron from Tutankhamun's Tomb**

National Geographic Kids  
As archaeologist Howard Carter cut his way into an underground chamber on November 26, 1922, he was overcome with excitement. When Carter finally peered through the tiny hole he had made, he could not believe his eyes. What incredible treasures would he find inside King

Tutankhamen's tomb? And how had the tomb remained undiscovered for more than 3,000 years? *Tutankhamun* National Geographic Society Penned by a scholar who was personally involved in research into the enigmatic young pharaoh, this fully illustrated study reviews our knowledge about the life, death, and burial of Tutankhamun. Zahi Hawass places the king in the

broader context of Egyptian history, unravelling the intricate and much debated relationship between various members of the royal family, and the circumstances surrounding the turbulent Amarna period. the golden age of tutankhamun Metropolitan Museum of Art Mysterious boy king Tutankhamun returns to the U.S. in 2008, bringing rare treasures

never before seen outside Egypt. For the millions of fans wanting a keepsake and chronicle of this magnificent new exhibition, this book will delight. Created by world-renowned art historians under the guidance of Zahi Hawass—director of Egypt's Supreme Council of Antiquities and a well-known media personality—it surveys 3,000 years of ancient Egyptian

history by focusing on the lives and lifestyles of great pharaohs. Master photographer Sandro Vannini spotlights every dazzling artifact, using an innovative technique that makes the image jump off the page. The book's design echoes the exhibition, grouping objects representing family life, religious practices, funerary rituals, and gold. In each artifact—a queen's eye

makeup container, a likeness of a princess eating duck, a sarcophagus made for a prince's cat—we glimpse the life of ancient Egyptian royalty: exotic and fascinating, yet so human. Gold gleams in a leopard-mask of gilded wood, a brilliant pendant bearing tiny goddesses, even the golden finger and toe covers of Tutankhamun himself, meant to protect his

extremities in the afterlife. Featuring more than 120 treasures, a dozen evocative landscape and archaeology photos, and illuminating text, this book makes palpable the excitement, riches, and mysteries of ancient Egypt. It will be prominently displayed in all exhibition venues, and its contents will interest visitors to the show as well as Tut enthusiasts across the country. National

Through this fascinating story we experience the adventure, the painstaking work, the magic, the excitement and the awe through the eyes of the "tomb raider"

himself, archaeologist Howard Carter. This book tells the story of one of the greatest archeological discoveries ever, the discovery of the intact tomb of the 18th Dynasty Pharaoh, Tutankhamun (colloquially known as "King Tut" and "the boy king"), in November 1922. Oxford University Press

The ultimate book on King Tut and his tomb—the most exciting archaeological find the world has ever known—now in a compact edition The tomb of Tutankhamun, with its breathtaking treasures, remains the most sensational archaeological find of all time. This brilliantly illustrated volume takes the reader

through Tutankhamun's tomb room-by-room in the order that it was discovered and excavated by Howard Carter, illuminating the tomb's most magnificent artifacts and objects. Leading authority Dr. Zahi Hawass imbues the text with his own inimitable flavor, imagining how the uncovering and opening of the tomb must have felt for Carter, while Sandro Vannini's

extraordinary photographs reproduce the objects in infinitesimal detail. Now available in a compact edition, and published to coincide with a global touring exhibition that begins in Los Angeles in March 2018 and ends at the Metropolitan Museum of Art in New York in 2023, this sumptuous volume is the definitive record of Tutankhamun's legacy. The Collector's Daughter Scholastic Inc.

'Impeccably researched and beautifully written' David Wengrow 'Utterly original' Paul Strathern When it was found in 1922, the 3,300-year old tomb of Tutankhamun sent shockwaves around the world, turning the boy-king into a household name overnight and kickstarting an international media obsession that endures to this day. From pop culture and politics to tourism and

heritage, and from the Jazz Age to the climate crisis, it's impossible to imagine the twentieth century without the discovery of Tutankhamun - yet so much of the story remains untold. Here, for the first time, Christina Riggs weaves compelling historical analysis with tales of lives touched by an encounter with Tutankhamun, including her own. Treasured offers a bold new history of the young

pharaoh who has as much to tell us about our world as his own. 'Searching, masterful and eloquent' James Delbourgo Tutankhamun and the Golden Age of the Pharaohs Penguin The purpose of this book is to describe by text and illustration the extraordinary tomb of this seemingly unimportant king of the late Eighteenth Dynasty, with its exceptional contents. An introductory

chapter sets the historical scene for the reign of Tutankhamun, placing it in the context of the anciently reviled period of heresy associated with King Akhenaten, and its disintegration after his death. Tutankhamun ruled on the point of the change back to a traditional Egyptian regime, with the rehabilitation of the old gods, a change, which was consolidated after his death

by his general Horemheb. A second chapter discusses the archaeology of the discovery of the tomb by Howard Carter in 1922. It will show, more clearly than has previously been appreciated, how Carter's obsession with the Valley of the Kings and, secondarily with the Amarna Period and its aftermath, developed from his earliest days in Egypt, the course of this search for 'the' royal tomb. The

drama of the final season, with the discovery, the revelation of a virtually unrobbed royal tomb's contents, and the poignant death of the Earl of Caernarfon, provides the element of the Greek tragedy to this unique event. A large selection of the objects found in the tomb is described in the main body of the book. Colour photographs specially taken for this publication accompany the

descriptive texts, which place the objects in their distinctive settings as exceptional example of the creativity of the ancient Egyptian artists and craftsmen.

As the golden face of Tutankhamun was found garlanded with fresh flowers exquisitely preserved for 3,000 years, the plants of ancient Egypt are brought back to life in this botanical exploration of the Pharaoh's tomb. Usually ignored by grave robbers intent on gold, the baskets, fabrics, papyri, timber, unguent vases, and model granaries filled to the brim with

seeds that were buried with Tutankhamun have survived, completely intact, and each chapter of the book carries detailed descriptions of the plant species found or represented in the tomb, including emmer, fenugreek, chickpea, and types of reed and grass. F. Nigel Hepper groups the plants according to their uses, with categories such as Flowers and Leaves; Oils,

Resins, and Perfumes; and Papyrus, Flax, and Other Fibrous Plants. This new edition of the fascinating book that was first published in 1990 has been fully updated to take into account recent finds and interpretations, and it features a revised and annotated further reading section, now with a guide to websites; a glossary of botanical terms; a new diagram of the tomb;

additional illustrations; and a Bible references section, keyed to the main text and with quotations from the Old Testament that illuminate ancient botanical knowledge and practices. *Treasured* Bearport Publishing An illustrated story of Tutankhamun by leading Egyptian archaeologist Zahi Hawass that reveals details of the boy king's life and dynasty, archival photographs of Howard

Book Brecourt Academic A wildly entertaining and surprisingly educational dive into art history as you've never seen it before, from the host of the beloved ArtCurious podcast We're all familiar with the works of Claude Monet, thanks in no small part to the ubiquitous reproductions of his water lilies on umbrellas, handbags, scarves, and dorm-room posters. But did you also know that

Monet and his cohort were trailblazing rebels whose works were originally deemed unbelievably ugly and vulgar? And while you probably know the tale of Vincent van Gogh's suicide, you may not be aware that there's pretty compelling evidence that the artist didn't die by his own hand but was accidentally killed--or even murdered. Or how about the fact that one of Andy Warhol's most

enduring legacies involves Caroline Kennedy's moldy birthday cake and a collection of toenail clippings? ArtCurious is a colorful look at the world of art history, revealing some of the strangest, funniest, and most fascinating stories behind the world's great artists and masterpieces. Through these and other incredible, weird, and wonderful tales,

ArtCurious presents an engaging look at why art history is, and continues to be, a riveting and relevant world to explore.

Between the 1880s and 1980s, British excavations at locations across Egypt resulted in the discovery of hundreds of thousands of ancient objects that were subsequently sent to some 350 institutions worldwide.

These finds included unique discoveries at iconic sites such as the tombs of ancient Egypt's first rulers at Abydos, Akhenaten and Nefertiti's city of Tell el-Amarna and rich Roman Era burials in the Fayum. Scattered Finds explores the politics, personalities and social histories that linked fieldwork in Egypt with the varied organizations around the world that received finds.

Case studies range from Victorian municipal museums and women's suffrage campaigns in the UK, to the development of some of the USA's largest institutions, and from university museums in Japan to new institutions in post-independence Ghana. By juxtaposing a diversity of sites for the reception of Egyptian cultural heritage over the period of a century, Alice Stevenson presents new

ideas about the development of archaeology, museums and the construction of Egyptian heritage. She also addresses the legacy of these practices, raises questions about the nature of the authority over such heritage today, and argues for a stronger ethical commitment to its stewardship. Praise for Scattered Finds 'Scattered Finds is a

remarkable achievement. In charting how British excavations in Egypt dispersed artefacts around the globe, at an unprecedented scale, Alice Stevenson shows us how ancient objects created knowledge about the past while firmly anchored in the present. No one who reads this timely book will be able to look at an Egyptian antiquity in the same way again.' Professor

Christina Riggs, UEA Tutankhamun Oxford University Press "Tutankhamun has fascinated the world ever since Howard Carter's spectacular discovery of his treasure-filled tomb in the Valley of the Kings in 1922. Egypt's leading Egyptologist, Zahi Hawass, here tells the story of this golden king, a short-lived pharaoh who came to the throne of Egypt as a child and died before the age of twenty, and

of the royal dynasty that bred him. The reader meets Tutankhamun's grandparents, the Sun King Amenhotep III and his beautiful wife Tiye as well as the boy-king's 'heretic' father, Akhenaten, his stepmother Neferiti, and his half-sisters, the sun-kissed princesses of Amarna. Tutankhamun lived and died during one of the most fascinating periods in Egyptian history; this

book provides a window into this extraordinary time of turmoil and treasure." "The Golden Age of Tutankhamun is illustrated, primarily with photographs of objects from the traveling exhibit. "Tutankhamun and the Golden Beyond: Treasures from the Valley of the Kings," which takes objects from Cairo's Egyptian Museum collections to Switzerland and Japan. Many of these

photographs were taken by National Geographic photographer Kenneth Garrett, supplemented by archival photographs from the era of the tomb's discovery, a fascinating period of transition - in archaeology as much as politics - between the age of colonialism and the dawn of Egyptian nationalism."--

Brimming with vivid historical detail, King Tut and the Girl Who Loved Him is a thrilling tale of a modern teenager catapulted into the glory and intrigue of Egypt's 18th Dynasty. Johanna Wilson is a quick-thinking fifteen-year-old with a penchant for falling into trouble and digging her way out again. After a rough day at school, Johanna comes home, eager for a nice, relaxing evening. But while reading

a book on ancient Egypt, she's suddenly "misplaced" from her apartment in twenty-first century Miami to Egypt's 18th Dynasty. A few strange twists of fate later, Johanna is masquerading as Princess Johenaten, cousin to Pharaoh Tutankhamun and member of Egypt's royal family. Completely dependent on the pharaoh for her safety and comfort, she also knows from her high school history

class that the king will die soon. And when he does, her life will be in jeopardy. Johanna's search for answers to the pharaoh's fate takes her on a dangerous journey into the inner circle of the most powerful kingdom on Earth. Surrounded by treachery and deceit, Johanna vows to uncover the threat to Pharaoh Tutankhamun's life, scarcely realizing how her actions will change the lives of those around

her-and the course of history. *Discovering Tutankhamun* Routledge It has been almost three decades since the first traveling exhibition of Tutankhamun's treasures drew nearly 10 million viewers and sparked worldwide "Tut-mania." Now, celebrating this priceless collection's new tour of Europe and the United States, National Geographic presents a jewel-like little

book featuring more than 30 of its finest pieces. Based on the official catalog, captured in lavish detail and magnificent color, here are objects from Tutankhamun, whose tomb yielded the richest trove of all, and other 18th-Dynasty pharaohs. These superbly crafted artifacts offer vivid insight into the skill, artistry, and astonishing sophistication of Egyptian culture's golden age.

Intricate jewelry glitters with precious gems, stylized statues summon ancient gods, lifelike busts bring long-dead kings and queens back to life, while vivid paintings and bas-relief panels depict not just great events but everyday scenes as well. Zahi Hawass contributes a concise history of Tutankhamun's world. The book also examines new research that provides

unprecedented information about the boy king's life, his exact age, and the mystery of his death, highlighted by a unique forensic reconstruction that uses state-of-the-art CT-scan data to recreate Tut's face. A charming memento of a stunning exhibition, the Souvenir Book gazes back across the millennia to show us the astonishing splendor of a great civilization at its pinnacle.

Aims to set the reign of Akhenaten in its full historical context, by providing a narrative account of the history of Egypt from the end of the reign of Amenhotep II to the high point of the reign of Akhenaten, highlighting the threads that led to the establishment of the latter's monotheistic cult of the Aten. While written as a stand-alone

work, it will also act as a 'prequel' to the same author's Amarna Sunset, published by AUC Press in 2009.

A comprehensive study of the iron objects found in Tutankhamun's tomb that include daggers, quivers, arrows, and an elaborately decorated bow case A century after Howard Carter and Lord Carnarvon's sensational

discovery in 1922 of the virtually intact tomb of Tutankhamun in the Valley of the Kings, the boy-king and his treasures continue to fascinate people all over the world. Although nearly 5,400 objects accompanied the young pharaoh on his journey to the afterlife, many of them have not been investigated in detail. Iron from Tutankhamun's Tomb analyzes iron artifacts from the tomb in

depth for the first time. This group consists of small iron chisels set into wooden handles, an Eye of Horus amulet, a miniature headrest, and the blade of a richly decorated golden dagger. The most important of these were placed in close proximity to the king's mummy, emphasizing the high value attributed to this rare material in late Bronze Age Egypt—a time when iron smelting was not yet known in the land of the Nile. Written by a research team of archaeologists, scientists, and conservators, this comprehensive study explores in fascinating detail the context and meaning of these artifacts, while establishing for the first time that Tutankhamun's iron came from meteorites. They complete their examination with the results of chemical analyses, offering in the process a rich overall understanding of iron and its significance in ancient Egypt.
