Observer Church and Censorship in Eighteenth-Century Italy Edizioni Mondadori The history of totalitarian states bears witness to the fact that literature and print media can be manipulated and made into vehicles of mass deception. Censorship and Literature in Fascist Italy is the first comprehensive account of how the Fascists

attempted to control Italy's literary production. Guido Bonsaver looks at how the country's major publishing houses and individual authors responded to the new cultural directives imposed by the Fascists. Throughout his study, Bonsaver uses rare and previously unexamined materials to shed light on important episodes in Italy's literary history, such as

<p>relationships between the regime and particular publishers, as well as individual cases involving renowned writers like Moravia, Da Verona, and Vittorini. Censorship and Literature in Fascist Italy charts the development of Fascist censorship laws and practices, including the creation of the Ministry of Popular Culture and the anti-Semitic crack-down of the late 1930s.</p>	<p>Examining the breadth and scope of censorship in Fascist Italy, from Mussolini's role as 'prime censor' to the specific experiences of female writers, this is a fascinating look at the vulnerability of culture under a dictatorship. <i>De la prédication. This work, in assessing cosmopolitanism as a cause, argues that justifications and critiques of the cosmopolitan are shaped as much by political and cultural forces as by the distinctive philosophical tradition in which it is situated. The Faces of Janus Yale University

Arrigo Petacco racconta la verità sulle gesta quasi leggendarie del prefetto Cesare Mori, incorruttibile funzionario "piemontese" inviato dal governo fascista in Sicilia per debellare la mafia.

L'uomo di ferro L'UOMO DI FERRO (Racconti di Boxe) Attempting to understand the catalogue of horrors that has characterised much of twentieth-century history, Western scholars generally distinguish between violent revolutions of the "right" and the "left". Fascist regimes are assigned to the evil right, Marxist-Leninist regimes to the benign left.

But this distinction has left us without a coherent understanding of the revolutionary history of the twentieth century, contends A. James Gregor in this insightful book. He traces the evolution of Marxist theory from the 1920s through the 1990s and argues that the ideology of Marxism-Leninism devolved into fascism. Fascist regimes and Communist regimes - both anti-

democratic ideocracies - are far more closely related than has been recognised. Employing wide-ranging primary source materials in Italian, German, Russian, and Chinese, the book opens with an examination of the first standard Marxist interpretation of Mussolini's fascism in the early 1920s and proceeds through the emergence of fascist phenomena in post-Communist

Russia. A clearer understanding of the relation between fascism and communism provides a sharper lens through which to view twentieth-century history as well as the present and future politics of Russia, Communist China, and other non-democratic states, Gregor concludes. *Bellezza e cuor di ferro, dramma per musica [in two acts and in verse], etc* Campi di Carta

This pioneering book offers the first account of the work of the photographers, both official and freelance, who contributed to the forging of Mussolini's image. It departs from the practice of using photographs purely for illustration and places them instead at the centre of the analysis. Throughout the 1930s photographs of the Italian dictator Benito Mussolini were chosen with

much care by the regime. They were deployed to highlight those physical traits - the piercing eyes, protruding jaw, shaved head - that were meant to evoke the Duce's strength, determination and innate sense of leadership in the mind of his contemporaries. The chapters in this volume explore the photographic image in the socio-political context of the time and shows how it

was a significant contributor to the development of Italian mass culture between the two world wars.

Dealing with the issue of ecclesiastical censorship and control over reading and readers, this study challenges the traditional view that during the eighteenth century the Catholic Church in Italy underwent an inexorable decline. It

reconstructs the strategies used by the ecclesiastical leadership to regulate the press and culture during a century characterized by important changes, from the spread of the Enlightenment to the creation of a state censorship apparatus. Based on the archival records of the Roman Inquisition and the Congregation of the Index of Forbidden Books preserved in the Vatican, it provides a

comprehensive analysis of the Catholic Church's endeavour to keep literature and reading in check by means of censorship and the promotion of a "good" press. The crisis of the Inquisition system did not imply a general diminution of the Church's involvement in controlling the press. Rather than being effective instruments of repression, the Inquisition and the Index combined to create an ideological

apparatus to resist new ideas and to direct public opinion. This was a network mainly inspired by Counter-Enlightenment principles which would go on to influence the Church's action well beyond the eighteenth century. This book is an English translation of *Il governo della lettura: Chiesa e libri nell'Italia del Settecento* (Bologna: Il Mulino, 2007). Italiano ed inglese

Conosciuto in Italia unicamente per essere il creatore del personaggio di Conan il Barbaro, Robert E. Howard (1906-1936) ha invece scritto tantissima narrativa di generi diversi, dalla fantasy al giallo, dal fantastico al poliziesco, sino a racconti dedicati allo sport e nello specifico, il pugilato. "L'Uomo di Ferro" è una raccolta di tre storie di boxe, tradotte per la prima volta in

Italia che non mancherà di incuriosire e affascinare i lettori. In esse non mancano le caratteristiche di ogni opera di Howard: la forza, il coraggio, l'ignoto.
