A Research Agenda for Creative Tourism Walter de Gruyter GmbH & Co KG
The inherent mobility of tourists and consequent relative ephemerality of contact between the visitor and the visited tourism phenomenon have specific characteristics that challenge the usual fieldwork practices of the social and physical sciences. Such conditions create specific concerns for the tourism researcher in terms of their positionality, relationality, accessibility, ethics, reflexivity, and methodological appropriateness. *Fieldwork in Tourism* is the first book to focus on this extremely significant component of contemporary tourist research and provides hands on approaches to conducting tourism fieldwork in a range of settings, exploring the methodological considerations and offering strategies to mitigate these. The book also discusses how fieldwork affects researchers personally and what happens to field

relationships. Divided into five sections, each with an introduction and a guide to further reading, the chapters cover the context of fieldwork, research relationships, politics and power, the position of the researcher in the field, research methods and processes, including virtual fieldwork, and the relationships between being a tourist and doing fieldwork. The concluding chapter suggests that the link between tourism and fieldwork perhaps offers greater insights into understanding creative fieldwork than may be imagined. This book incorporates a rich and diverse set of fieldwork experiences, insights and reflections on conducting fieldwork in different settings, the problems that emerge, the solutions that were developed, and the realities of being 'in the field'. *Fieldwork in Tourism* is an essential guide for Tourism higher level students, academics and researchers embarking on research in this field.

Winter Tourism Routledge
This Handbook brings together experts from around the world to reflect critically on the relationship between tourism and rural

community development. It first orients the reader in the important conceptual and epistemological foundations of the topic, before moving to consider key concepts and the most significant and salient theoretical and methodological developments in the field.

Stories of Practice: Tourism Policy and Planning Edward Elgar Publishing

Although destination management is regarded as the supreme discipline in tourism management, little attention is paid to destination development, especially from a geographical perspective. This book analyses destination development and proposes key strategies for a positive destination development in the future in regard to sustainability, accessibility and economic prosperity. International scholars from a range of disciplines explore current issues in destination development and propose solutions that can help policy-makers prepare for future challenges. This book includes case studies from all around the globe to illustrate the diversity of destination development. This book thus offers

students, colleagues from the scientific community as well as practitioners and political decision-makers numerous suggestions, considerations and decision-making aids with regard to destination development.

Fieldwork in Tourism

Edward Elgar Publishing

Although blurred and heavily contested, the concept of 'tourist destination' still deserves careful attention. Despite its unstable characteristics, 'destination' is a central and meaningful term in play among all parties in the field of tourism, including tourists, tourism operators, and politicians, as well as students and tourism scholars. This anthology draws on different approaches and discourses of tourism destination development, while focusing on how they are shaped and reshaped and how they should be read and rehearsed. The book reveals dominant as well as alternative approaches to the field. The authors demonstrate how tourism destinations are commercial, but socially embedded; how they are both material and territorial, but at the same time socially constructed;

how production of touristic brands and images are vital, but contested. Such tensions are unfolded through paradigmatic discussions and a series of case studies from the northern hemisphere. The chapters in the book investigate how destination development is catalysed through theming, how changing environments lead to reorientations, and how destinations are political. Altogether, the book provides experts and students with an up-to-date theoretical and empirical insight into tourist destinations.

Arctic Tourism

Experiences Springer

Nature

Original and thought-provoking, this book investigates how creative experiences, interactions, and place-specific dynamics and contexts combine to give shape to the expanding field of creative tourism across the globe. Exploring the evolution of research in this field, the authors investigate pathways for future research that advance conceptual questions and pragmatic issues.

Tourism Employment in Nordic Countries

Routledge

Introduction to Nordic

Cultures is an innovative, interdisciplinary introduction to Nordic history, cultures and societies from medieval times to today. The textbook spans the whole Nordic region, covering historical periods from the Viking Age to modern society, and engages with a range of subjects: from runic inscriptions on iron rings and stone monuments, via eighteenth-century scientists, Ibsen's dramas and turn-of-the-century travel, to twentieth-century health films and the welfare state, nature ideology, Greenlandic literature, Nordic Noir, migration, 'new' Scandinavians, and stereotypes of the Nordic. The chapters provide fundamental knowledge and insights into the history and structures of Nordic societies, while constructing critical analyses around specific case studies that help build an informed picture of how societies grow and of the interplay between history, politics, culture, geography and people. Introduction to Nordic Cultures is a tool for understanding issues related to the Nordic region as a whole, offering the reader engaging and stimulating ways of

discovering a variety of cultural expressions, historical developments and local preoccupations. The textbook is a valuable resource for undergraduate students of Scandinavian and Nordic studies, as well as students of European history, culture, literature and linguistics.

Nordic Tourism Policy Analysis Nordic Council of Ministers

Rural regions are experiencing fundamental challenges to their ways of life and social fabric, as traditional land-based occupations are in decline and younger and better-educated rural residents migrate to cities for greater work, social and cultural opportunities. Rural tourism offers a possible solution to the problems associated with lost economic opportunities and population decline that accompany the waning of agriculture. Many governments and regional authorities have embraced rural tourism as an opportunity to bring new money into rural regions, stimulating growth, providing employment opportunities and thus beginning to halt rural decline. However, the possibilities of rural tourism to promote rural

regeneration have been criticised for being overstated and unrealistic. Rural tourism has frequently been found to under-deliver in terms of expected economic benefits and job creation, and may sometimes exacerbate local hierarchies and inequalities. This edited collection questions the contribution tourism can and does make to rural regions. Drawing on a range of geographically diverse, research-driven case studies, the book is thematically organised to explore a variety of issues relevant to rural tourism, from the perspectives of local communities, businesses, government/policy makers and the tourists themselves.

[Tourism and Change in Polar Regions](#) Channel View Publications

"Experiences have become the hottest commodities the market has to offer. No matter where we turn, we are constantly inundated by advertisements promoting products that promise to provide us with some ephemeral experience that is newer, better, more thrilling, more genuine, more flexible, or more fun than anything we have previously

encountered. In turn, consumers themselves are increasingly willing to go to great lengths, invest large sums of money, and take great risks to avoid "the beaten track" and "experience something new." "Working with an interdisciplinary approach, this book critically analyzes the significance this market for experiences (and interest in them) is having as a generative motor of cultural and socioeconomic change in modern society."--Jacket. *Tourism and the Lodging Sector* UCL Press

The working group on Sustainable Consumption and Production, under the Nordic Council of Ministers requested consultants from Gaia to identify, write out and publish best practice cases of sustainable consumption and production on the UNEP SCP Clearinghouse. This report presents nineteen initiatives that cover two particular themes: 1) Sustainable Lifestyles and Education and 2) Sustainable Public Procurement. The cases have also been added into the UNEP's 10 Year Framework Program (10YFP) information platform, the SCP Clearinghouse which is a concrete result of Rio+20.

The objective is to enhance international cooperation in order to accelerate a shift towards sustainable consumption and production in developed and developing countries. The SCP Clearinghouse is a web-based information sharing tool, which can be used by different actors as an inspiration for advancing SCP worldwide.

Second Home Tourism in Europe MDPI

This book examines the "oil-tourism interface", the broad range of direct and indirect contact points between offshore oil extraction and nature-based tourism. Offshore oil extraction and nature-based tourism are pursued as development paths across the North Atlantic region. Offshore oil promises economic benefits from employment and royalty payments to host societies, but is based on fossil fuel-intensive resource extraction. Nature-based tourism, instead, is based on experiencing natural environments and encountering wildlife, including whales, seals, or seabirds. They share social-ecological space, such as oceans, coastlines, cities and towns where tourism and offshore oil operations

and offices are located. However, they rarely share cultural or political space, in terms of media coverage, public debate, or policy discussion that integrates both modes of development. Through a comparative analysis of Denmark, Iceland, Newfoundland and Labrador, Norway, and Scotland, this book offers important lessons for how coastal societies can better navigate relationships between resource extraction and nature-based tourism in the interests of social-ecological wellbeing. *The Nordic Wave in Place Branding* Routledge Analyses of contemporary tourism planning and policymaking practice at local to global scales is lacking and there is an urgent need for research that informs theory and practice. Illustrated with a set of cohesive, theoretically-informed, international case studies constructed through storytelling, this volume expands readers' knowledge about how tourism planning and policymaking takes place. Challenging traditional notions of tourism planning and policy processes, this book also provides critical insights into how theoretical

concepts and frameworks are applied in tourism planning and policy making practice at different spatial scales. The book engages readers in the intellectual, political, moral and ethical issues that often surround tourism policymaking and planning, highlighting the great value of reflective learning grounded in the social sciences and revealing the complexity of tourism planning and policy.

Nordic Tourism Routledge The new millennium has been characterised by several crises ranging from dramatic acts of terror to natural disasters, as well as the most significant economic recession since the late 1920s. However, despite such challenges the global tourism system has in the main retained its past vitality although in some cases in a different form. The book investigates different kinds of "crisis" and unpacks understandings of crisis in relation to various components in the contemporary tourism system. The aim of this book therefore is to critically analyse the relationship between tourism and crises. The volume focuses on the roles and potential of

tourism for development and relations between tourism, environment and broad global process of change at different levels of analysis, highlighting different types of "crisis". In particular it questions the general conviction that tourism-led development is a sustainable and necessarily solid platform from which to develop local, national and regional economies from a range of perspectives. Written by leading academics in the field this book offers valuable insight into tourism's relationship with socio-cultural, environment, economic and political crisis as well as the challenges facing future tourism development.

A Research Agenda for Arctic Tourism

Routledge

Winter tourism has seen increased levels of investment in recent times, in an effort to reduce economic risk, address environmental concerns and adapt to the effects of global warming. New ski destinations are developing and merging with traditional ones to increase spatial distribution, while many established leading resorts are adapting their management models.

Climate change adaptation processes are supported by the reduction of CO2 emissions and energy consumption in ski resorts. Current planning challenges include the increasing importance of scenic beauty, nature and sustainable development, as well as snow reliability, snow management and safety issues.

Tourism Entrepreneurship

Edward Elgar Publishing

Addressing the methodological and topical challenges facing demographers working in remote regions, this book compares and contrasts the research, methods and models, and policy applications from peripheral regions in developed nations. With the emphasis on human populations as dynamic, adaptive, evolving systems, it explores how populations respond in different ways to changing environmental, cultural and economic conditions and how effectively they manage these change processes.

Theoretical understandings and policy issues arising from demographic modelling are tackled including: competition for skilled workers; urbanisation and ruralisation; population

ageing; the impacts of climate change; the life outcomes of Indigenous peoples; globalisation and international migration. Based on a strong theoretical framework around issues of heterogeneity, generational change, temporariness and the relative strength of internal and external ties, *Demography at the Edge* provides a common set of approaches and issues that benefit both researchers and practitioners.

Arctic Tourism in Times of Change

Routledge

Tourism and

Entrepreneurship:

International Perspectives

provides an innovative, interdisciplinary

approach. This book takes

as its central theme the

role of entrepreneurship

in the context of regional,

local and national tourism

development. By

engaging with top

academics in both tourism

and entrepreneurship this

book delivers a cohesive,

interdisciplinary

examination of the most

recent developments in

both tourism and

entrepreneurship. Several

key themes are explored

and articulated through

the following concepts

and issues: tourism,

innovation and

entrepreneurship; the role and nature of individual and collective entrepreneurship in different contexts; the role of tourism in responding to development opportunities created by global forces; and finally, issues associated with tourism strategies and policies. Divided into four parts, the book reflects on the most relevant areas of tourism entrepreneurship:

- * Understanding the conceptual basis of tourism entrepreneurship
- * Creative use of entrepreneurship and processes of social innovation
- * Tourism entrepreneurship mediating the global-local divide
- * Sectoral strategies and policy issues of tourism entrepreneurship

Tourism and Entrepreneurship: International Perspective:

- * Explains the impact of tourism entrepreneurship on places and overall regional and destination development
- * Examines the role of the public sector in facilitating the need for sustainable tourism development
- * Examines the effects and implications of funding schemes and support programmes
- * Takes the owner, manager and entrepreneur as the

starting point of analysis to explore specific issues

- * Allows practitioners and policy-makers to explore practical applications and best practice of theory through a diverse range of international case studies
- * Contributed to by an international team of leading scholars in tourism and entrepreneurship

This book is a unique combination of theory, case studies and discussion highlighting the importance of entrepreneurial tourism activity for economic success. It is essential reading for students and researchers in both tourism and entrepreneurship.

Tourism and Entrepreneurship CABI Available online: <https://pub.norden.org/temanord2022-516/> The report presents findings from a workshop where researchers, students, tourism industry representatives, policy makers and entrepreneurs from the Arctic discussed the challenges of overtourism, the impact of COVID-19 and visions for restarting tourism. A key for sustainable management of tourism is that actors are aware that they are part of a wide ranging

tourism system that affects how they can tackle ensuing crisis or challenges such as overtourism and undertourism. The COVID-19 hit tourism hard across the Arctic although there are also regional differences. The pandemic revealed the vulnerability of the tourism product and opened a space for reconsidering tourism growth and the negative impacts of tourism on climate, biodiversity and communities. The report argues for the need to build tourism based on tourism-community collaboration.

Spices and Tourism
Edward Elgar Publishing

Tourism is an increasingly important industry in the Nordic countries (Denmark, Finland, Iceland, Norway and Sweden) that is integral to economic, social and sustainable development. Nordic Tourism is the first comprehensive and accessible introduction to tourism in the region and also includes case studies from leading Nordic researchers on specific destinations, attractions, resources, concepts and issues.

Experiencescapes
Routledge

Tourism is an important, growing industry in all the

Nordic countries, but until recently, it has not had a particularly strong focus within the Nordic cooperation framework. This is changing rapidly, and the Nordic Council of Ministers has given a strong signal that increased emphasis should be placed on tourism issues within the Nordic framework. This project is a result of that important political prioritisation. The key objective of this project is to create a framework on which a Nordic Tourism Strategy can be established. Thus, the desired outcome of the project is to define future strategies and projects that will underscore common opportunities and challenges within Nordic tourism. The objective of a Nordic Tourism Policy Analysis is to provide valuable input to each country's work within tourism as well as laying a foundation for a common Nordic Tourism Policy.

Sustainable Tourism and Indigenous

Peoples Cambridge Scholars Publishing
The seasonal nature of tourism is increasingly receiving the attention of various actors: tourism destination planners and economic development strategists at all levels, tour operators and the diverse businesses that significantly depend on tourism, and the host communities who negotiate tourism's potential to have both positive and negative impacts. The research report at hand identifies and discusses four main perspectives on the issues of seasonal tourism in the Arctic: local community perspectives; employment and workforce issues; the Arcticification of northern tourism; and global environmental change. These themes form the key issues around which the challenges and opportunities related to seasonality of tourism can be placed and worked with. Based on the discussion, the report outlines recommendations related to developing a thriving and sustainable

tourism sector in Arctic Europe.

Tourism and Crisis CABI

This is the first book to explore the relationship between tourism and spices. It examines the various layers of connection between spices and tourism in terms of destinations, attractions and cuisines. The book reveals how spice-producing destinations are employing spices in destination branding and encouraging spice farms to move towards tourism, while destinations not producing spices are employing spices and herbs in distinctive local cuisines. Both tangible and intangible spice heritages are highlighted as tools for developing destinations, creating attractions, inventing new forms of livelihoods and distinguishing local, regional and national cuisines. This volume will be useful for researchers and students in cultural tourism, culinary tourism, anthropology of food and food history.
