Love alternative photographic processes ...Sunlight, Water and Leaves: Using the pigments of the life-giving photosynthesis process to develop images The chlorophyll process is an organic alternative photography process akin to the anthotype process. However, instead of printing on the crushed extract of fruit or plant matter, the prints are bleached by sunlight directly onto the surface of leaves using a positive. The

chlorophyll process - AlternativePhotography.com The term alternative process refers to any non-traditional or non-commercial photographic printing process. Currently the standard analog photographic printing process is the gelatin silver process, and standard digital processes include the pigment print, and digital laser exposures on traditional color photographic paper. Alternative processes are often called historical, or non-silver processes. Most of these processes were invented over 100 years ago and were used by early photographers. Man Alternative process - Wikipedia A unique photography non-profit based in New York City,

with offerings that include educational workshops in a variety of contemporary and historic analog processes, public artist's talks, an artist in residence workspace program for emerging artists, a tintype portrait studio, and a project space.
