Whether you're building from scratch or installing straight from the store, this is the only book you'll need to make sure your shelves, cabinets, and built-ins look professional and well integrated in your home or office. For the do-it-yourself builder, there's more than enough guidance to make shelves and cabinets that could earn the praise of a master craftsman. Minimalist design--maximum style! In the middle of the last century, a new generation of designers sought to render furniture to its most essential forms. In doing so, they created timeless designs that defined Mid-Century Modern Style. From the sleek geometric lines of Bauhaus-inspired design to the sculptural shapes of Danish masters, this furniture captured the imagination of the era and enjoys growing popularity today. Now for the first time, author Michael Crow has carefully detailed 29 seminal works by the era's foremost designers, including Hans Wenger, Finn Juhl and George Nelson. At their best, these spare, often sculptural designs transcend their period and are at home in a variety of settings. Each piece has been selected carefully so it can be built in an average workshop. Inside this book you'll find:

- More than 100 drawings with exploded views, elevations and details for projects to fit every room in your house.
- Practical advice on wood selection, hardware sources and construction and finishing techniques.
- Two step-by-step project builds.
- A richly illustrated historical overview tracing the evolution of the style and exploring the designers and makers who shaped it.

From the author of the highly praised *The Pencil* and *The Evolution of Useful Things* comes another captivating history of the seemingly mundane: the book and its storage. Most of us take for granted that our books are vertical on our shelves with the spines facing out, but Henry Petroski, inveterately curious engineer, didn't. As a result, readers are guided along the astonishing evolution from papyrus scrolls boxed at Alexandria to upright books shelved at the Library of Congress. Unimpeachably researched, enviably written, and charmed with anecdotes from Seneca to Samuel Pepys to a nineteenth-century bibliophile who had to climb over his books to get into bed, *The Book on the Bookshelf* is indispensable for anyone who loves books.

Even as oversized McMansions continue to elbow their way into tiny lots nationwide, a much different trend has taken shape. This return to traditional architectural principles venerates qualities that once were taken for granted in home design: structural common sense, aesthetics of form, appropriateness to a neighborhood, and even sustainability. Marianne Cusato, creator of the award-winning *Katrina Cottages*, has authored and illustrated this definitive guide to what makes houses look and feel right--to the eye and to the soul. She teaches us the language and grammar of classical architecture, revealing how balance, harmony, and detail all contribute to creating a home that will be loved rather than tolerated. And she takes us through the do's and don'ts of every element of home design, from dormers to doorways to columns. Integral to the book are its hundreds of elegant line drawings--clearly rendering the varieties of lintels and cornices, arches and eaves, and displaying "avoid" and "use" versions of the same elements side by side.

Nick Offerman, woodworker, actor, and co-host of NBC's *Making It*, invites you on a hilarious and

informative woodworking adventure that takes you behind the scenes of his very own woodshop. Nestled among the glitz and glitter of Tinseltown is a testament to American elbow grease and an honest-to-god hard day's work: Offerman Woodshop. Captained by hirsute woodworker, actor, comedian, and writer Nick Offerman, the shop produces not only fine handcrafted furniture, but also fun stuff—kazoos, baseball bats, ukuleles, mustache combs, even cedar-strip canoes. Now Nick and his ragtag crew of champions want to share their experience of working at the Woodshop, tell you all about their passion for the discipline of woodworking, and teach you how to make a handful of their most popular projects along the way. This book takes readers behind the scenes of the woodshop, both inspiring and teaching them to make their own projects and besotting them with the infectious spirit behind the shop and its complement of dusty wood-elves. In these pages you will find a variety of projects for every skill level, with personal, easy-to-follow instructions by the OWS woodworkers themselves; and, what's more, this tutelage is augmented by mouth-watering color photos (Nick calls it "wood porn"). You will also find writings by Nick, offering recipes for both comestibles and mirth, humorous essays, odes to his own woodworking heroes, insights into the ethos of woodworking in modern America, and other assorted tomfoolery. Whether you've been working in your own shop for years, or if holding this stack of compressed wood pulp is as close as you've ever come to milling lumber, or even if you just love Nick Offerman's brand of bucolic yet worldly wisdom, you'll find *Good Clean Fun* full of useful, illuminating, and entertaining information.

This is a "how-to" book, packed with information to help you go beachcruising and/or coastal camping, no matter what your level of expertise may be. This book includes everything you need to know about selecting a beachcruising boat, where to beachcruise, how to make camp, what gear to buy, and more, including how to go cruising and camping at low cost. Ida Little has beachcruised and coastal camped full time for 20 years (in a variety of boats) and has observed what other cruisers and campers were doing. She shares her knowledge and adventures with you. In this book, "beachcruising" means cruising a small boat along a coast with the intention of camping ashore. Though it is possible to use 50-foot schooners to go beachcruising, this book focuses on small sailboats that are light enough to be lifted or rolled ashore, and sailboats under 30 feet which are designed to dry out flat on an ebb tide. This book elaborates upon the unique aspects of camping that apply to boating.
